Free PDF Quiz High Pass-Rate SAP - Reliable C-S4CPB-2508 Exam Test

If you failed to do so then the customer gets a full refund from PassLeader according to the terms and conditions. Users can start using SAP C-S4CPB-2508 instantly after purchasing it. Three C-S4CPB-2508 Exam Questions format is provided to customers so that they can access the SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition (C-S4CPB-2508) prep material in every possible way according to their needs.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q39-Q44):

NEW QUESTION # 39

Which of the following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf?

Note: There are 2 correct answers to this question.

- A. The test process failed the execution pre-check.
- B. The process steps have been reordered.
- C. An execution variant has not been maintained.
- D. Data marked for deletion is picked for execution.

Answer: A,C

Explanation:

The following would prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf

* An execution variant has not been maintained: An execution variant is a set of test data that is used to execute a test process. It contains the input values and expected results for each test step. If an execution variant is not maintained for a test process, the system cannot run the test automatically and will skip it1.

* The test process failed the execution pre-check: The execution pre-check is a validation that is performed before the test execution to ensure that the test process and the execution variant are consistent and complete. If the execution pre-check fails, it means that there are some issues or gaps in the test process or the execution variant that need to be resolved before the test can be run2. The following would not prevent SAP from running a Post-Upgrade Test (PUT) on a customer's behalf:

* Data marked for deletion is picked for execution: Data marked for deletion is data that is no longer relevant or valid for the test process. It can be marked for deletion by the customer or by SAP. However, this does not affect the test execution, as the system will ignore the data marked for deletion and use the available data for the test process3.

* The process steps have been reordered: The process steps are the individual actions that are performed as part of the test process. They can be reordered by the customer or by SAP to reflect the changes in the business process or the user interface. However, this does not affect the test execution, as the system will follow the order of the process steps as defined in the test process4.

NEW QUESTION # 40

Through which component do you access your assigned process tasks from the SAP Activate Roadmap of SAP S/4HANA Cloud Public Edition (3-system landscape)?

- A. SAP Central Business Configuration
- B. SAP Cloud ALM for Operations
- C. SAP Cloud ALM for Implementation
- D. SAP Cloud ALM for Service

Answer: C

Explanation:

SAP Cloud ALM for Implementation is the component that provides access to the SAP Activate Roadmap of SAP S/4HANA Cloud Public Edition (3-system landscape). The SAP Activate Roadmap is a tool that guides the implementation project team through the phases, deliverables, tasks, and accelerators related to the SAP Activate methodology. The SAP Activate Roadmap is updated frequently to reflect the latest scope, processes, and best practices for SAP S/4HANA Cloud Public Edition. The SAP Cloud ALM for Implementation component also enables the project team to monitor the progress, status, and quality of the implementation project. References = SAP S/4HANA Cloud, Public Edition, 3-System Landscape - Upgrade & Maintenance Schedule, SAP Activate Content Updates for SAP S/4HANA Cloud, public edition (3-system landscape), News from SAP Activate - SAP S/4HANA Cloud, public edition 2308, SAP Activate Release Notes for SAP S/4HANA Cloud Public Edition

NEW QUESTION # 41

In which of the following systems do you access your assigned process tasks from the SAP Activate Roadmap of SAP S/4HANA Cloud Public Edition (3-system landscape)?

- A. SAP Cloud ALM for Implementation
- B. SAP Cloud ALM for Operations
- C. SAP Central Business Configuration
- D. SAP Cloud ALM for Service

Answer: C

NEW QUESTION # 42

Which tasks are mandatory before you can migrate data for a specific object? Note: There are 2 correct answers to this question.

- A. You select the same migration method previously used for other objects
- B. Predecessor objects have been migrated
- C. All previous migration projects are in the "Finished" status

- **D. Permission to migrate the data has been assigned**

Answer: B,D

Explanation:

Before you can migrate data for a specific object, you need to ensure that the following tasks are completed:

* Predecessor objects have been migrated: Some migration objects depend on other migration objects that need to be migrated first. For example, before you can migrate sales orders, you need to migrate customers, products, and pricing conditions. You can check the dependencies of migration objects in the Migration Cockpit or in the Migration Object Modeler¹².

* Permission to migrate the data has been assigned: In addition to having permission to access the Migrate Your Data app, you need permission to migrate each type of data. This is because the Migration Cockpit tool uses the same APIs and technical checks that would be done if you were to create a new data value through the respective application. For example, if you need to create a new bank record in your system, you would use the application, Manage Banks - Master Data. The app would present you with several fields capturing information about the new bank to create the record in your system. Now if you need to create 1,000 banks, it wouldn't be feasible to create each through the Manage Banks - Master Data app one-by-one. Therefore, you need to have the permission to use the Manage Banks - Master Data app in order to migrate bank data using the Migration Cockpit³.

The other tasks are not mandatory before you can migrate data for a specific object. You can select different migration methods for different objects, depending on your source system and data format. You can also have multiple migration projects in progress at the same time, as long as they do not contain the same migration objects⁴. References = Migration Object Modeler, Migrating Data with the SAP S/4HANA Migration Cockpit, SAP S/4 HANA Data Migration Cockpit: Migrate Your Data App Guide, Migrating Data to SAP S

/4HANA Cloud, Public Edition

NEW QUESTION # 43

Which of the following actions does the lead configuration expert carry out during content deployment in the SAP S/4HANA Cloud starter system? Note: There are 3 correct answers to this question.

- **A. Create two workspaces**
- B. Confirm primary logistics settings
- **C. Confirm primary finance settings**
- **D. Define the scope**
- E. Create one workspace

Answer: A,C,D

NEW QUESTION # 44

.....
