Free PDF 2026 Desktop-Specialist: Tableau Desktop Specialist Exam Perfect Test Dumps.zip

Once you establish your grip on our Desktop-Specialist exam materials, the real exam questions will be a piece of cake for you. There are three different versions of our Desktop-Specialist study questions for you to choose: the PDF, Software and APP online. Though the displays are totally different, the content of the Desktop-Specialist Practice Guide is the same. You can pass the exam with no matter whice version you want to buy.

Tableau Desktop Specialist Exam Sample Questions (Q110-Q115):

NEW QUESTION # 110
Dragging a _____ to colour creates distinct colours for each item whereas dragging a _____ to colour creates a gradient

- A. Longitude, Latitude
- B. Geographic Value, Discrete Value
- C. Continuous Value, Discrete Value
- D. Discrete value, Continuous Value

Answer: D

Explanation:
Explanation
Remember that dragging a discrete value to colour creates distinct colours for each item whereas dragging a continuous value to colour creates a gradient. (Same for Map) From the official documentation:

Categorical Palettes

When you drop a field with discrete values (typically a dimension) on **Color** on the **Marks** card, Tableau uses a categorical palette and assigns a color to each value of the field. Categorical palettes contain distinct colors that are appropriate for fields with values that have no inherent order, such as departments or shipping methods.

To change colors for values of a field, click in the upper-right corner of the color legend. In Tableau Desktop, select **Edit Colors** from the context menu. In Tableau Server or Tableau Online, the Edit Colors dialog opens automatically.
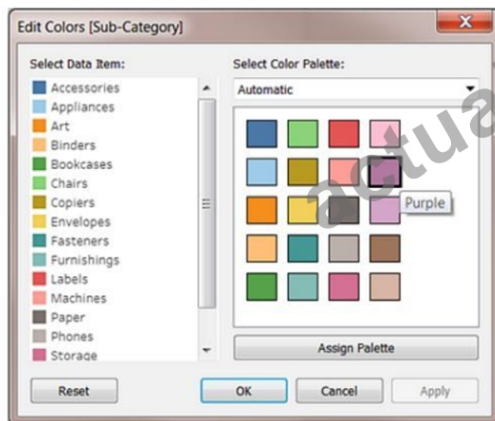

Quantitative Palettes

When you drop a field with continuous values on the **Marks** card (typically a measure), Tableau displays a quantitative legend with a continuous range of colors.

SUM(Sales)

$545 $105,643

You can change the colors used in the range, the distribution of color, and other properties. To edit colors, click in the upper right of the color legend. In Tableau Desktop, select **Edit Colors** from the context menu. In Tableau Server or Tableau Online, the Edit Colors dialog opens automatically.

When there are both negative and positive values for the field, the default range of values will use two color ranges and the Edit Colors dialog box for the field has a square color box on either end of the range. This is known as a diverging palette.

NEW QUESTION # 111
Which of the following can you use to create a Histogram?

- A. 1 measure
- B. 2 measures
- C. 2 dimensions
- D. 1 dimension

Answer: A

Explanation:
Explanation
A histogram is a chart that displays the shape of a distribution. A histogram looks like a bar chart but groups values for a continuous measure into ranges, or bins.
The basic building blocks for a histogram are as follows:

Mark type:	Automatic
Rows shelf:	Continuous measure (aggregated by Count or Count Distinct)
Columns shelf:	Bin (continuous or discrete). *Note*: This bin should be created from the continuous measure on the Rows shelf. For more information on how to create a bin from a continuous measure, see *Create Bins from a Continuous Measure*.

In Tableau you can create a histogram using **Show Me**.

1. Connect to the **Sample – Superstore** data source.

2. Drag **Quantity** to **Columns**.

3. Click **Show Me** on the toolbar, then select the histogram chart type.

NEW QUESTION # 112
Which two options can you use to change the device layout of a dashboard? Choose two.

- A. The Dashboard menu
- B. The Layout pane
- C. The Format menu
- D. The Dashboard pane

Answer: B,D

Explanation:
You can change the device layout of a dashboard by using the Dashboard pane or the Dashboard menu. The Dashboard pane allows you to select a device type and customize the layout for that device. The Dashboard menu allows you to create a new device layout or copy an existing one. The Format menu and the Layout pane do not have options for changing the device layout1

NEW QUESTION # 113
Which of the following can you use to create a Histogram?

- A. 1 measure
- B. 2 measures
- C. 2 dimensions
- D. 1 dimension

Answer: A

Explanation:
A histogram is a chart that displays the shape of a distribution. A histogram looks like a bar chart but groups values for a continuous

measure into ranges, or bins.
The basic building blocks for a histogram are as follows:

Mark type:	Automatic
Rows shelf:	Continuous measure (aggregated by Count or Count Distinct)
Columns shelf:	Bin (continuous or discrete). *Note: This bin should be created from the continuous measure on the Rows shelf. For more information on how to create a bin from a continuous measure, see Create Bins from a Continuous Measure .*

In Tableau you can create a histogram using **Show Me**.

1. Connect to the **Sample – Superstore** data source.

2. Drag **Quantity** to **Columns**.

3. Click **Show Me** on the toolbar, then select the histogram chart type.
