Reliable C-S4EWM-2023 Exam Preparation | Sample C-S4EWM-2023 Questions

The SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management (C-S4EWM-2023) exam questions are real, valid, and verified by SAP C-S4EWM-2023 certification exam trainers. They work together and put all their efforts to ensure the top standard and relevancy of C-S4EWM-2023 Exam Dumps all the time. So we can say that with SAP C-S4EWM-2023 exam questions you will get everything that you need to make the C-S4EWM-2023 exam preparation simple, smart, and successful.

SAP C-S4EWM-2023 Exam Syllabus Topics:

Topic	Details
Topic 1	• Managing Clean Core: It covers evaluating and applying clean core principles to ERP to maximize business process agility, reduce adaptation efforts, and accelerate innovation.
Topic 2	• Cross Topics (Labor Management, Exception Handling, Batches, Serial Numbers): This topic includes setting up labor management and exception handling, and working with additional product information.
Topic 3	• System Integration, Master Data and Delivery Document Customizing: This focuses on setting up system integration, distributing master data, and customizing delivery documents.

Topic 4	• Warehouse Processing, Warehouse Task and Order Creation, Strategies: This topic includes defining warehouse process types and setting up determination, as well as defining putaway and picking strategies.
Topic 5	• Shipping and Receiving: It focuses on configuring Yard Management, SAP Dock Appointment Scheduling, and using the Shipping Cockpit.
Topic 6	• Outbound Processes (Wave Management, Cross-docking, Production Integration): This topic covers combining outbound deliveries using wave management, packing and kitting in outbound processes, and staging products for production.
Topic 7	• Warehouse Management (Monitor - Cockpit): This topic involves monitoring warehouse activities using the Warehouse Management Monitor, Warehouse Cockpit, and analytical apps.
Topic 8	• Internal processing (Physical Inventory, Replenishment): This topic involves defining physical inventory processes and setting up and executing replenishment.
Topic 9	• Process and Layout Oriented Storage Control: It covers creating customizing settings and using Process and Layout-Oriented Storage Control.
Topic 10	• Inbound Processes (Value Added Services, Cross-docking, Quality Management): This topic includes executing inbound processes with value added services (VAS) or deconsolidation, and setting up deliveries for cross-docking (CD) or quality inspection (QIE).

Sample C-S4EWM-2023 Questions - New C-S4EWM-2023 Exam Dumps

Actual4dump is also offering 1 year free C-S4EWM-2023 updates. You can update your C-S4EWM-2023 study material for 90 days from the date of purchase. The C-S4EWM-2023 updated package will include all the past questions from the past papers. You can pass the SAP C-S4EWM-2023 Exam easily with the help of the dumps. It will have all the questions that you should cover for the SAP C-S4EWM-2023 exam. If you are facing any issues with the products you have, then you can always contact our 24/7 support to get assistance.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q49-Q54):

NEW QUESTION # 49
What is required to perform explicit counting using the Quality Inspection Engine? Note: There are 2 correct answers to this question.

- A. Work center
- B. QM integration
- C. Inspection rule
- D. Sampling procedure

Answer: A,C

Explanation:
To perform explicit counting using the Quality Inspection Engine (QIE) in SAP Extended Warehouse Management (EWM) on SAP S/4HANA Cloud, Private Edition, the following elements are required:
* Inspection Rule (A)
* An inspection rule defines the criteria for triggering a quality inspection within the warehouse.
* It is essential to configure the inspection rule in EWM to specify the characteristics of the inspection, such as document type, item category, and relevance to counting.
* This rule acts as the basis for initiating explicit counting as part of quality management integration.
* Work Center (C)
* A work center in EWM is the physical or logical location where quality inspection activities occur.

* For explicit counting, the work center must be configured to handle QIE tasks.
* It serves as the location where warehouse staff can access and perform counting tasks, such as verifying quantities of materials against quality requirements.
Additional Considerations:
* QM Integration (B):While quality management (QM) integration ensures alignment with quality standards, it is not a mandatory requirement for explicit counting in QIE but can enhance the overall quality process.
* Sampling Procedure (D):Sampling procedures are used to define how samples are drawn for inspection but are not specifically required for explicit counting in this context.
References from SAP S/4HANA Cloud Private Edition, EWM Documentation:
* SAP Help Portal: EWM Quality Inspection Integration
* SAP Best Practices for EWM: Configuration Guide for Quality Inspection Engine
* SAP Learning Hub: Extended Warehouse Management Quality Processes
These references provide detailed insights into configuring and utilizing the QIE for explicit counting in SAP EWM.

NEW QUESTION # 50
With decentralized EWM, you can skip certain document categories. Which document category combination is still mandatory?

- A. An outbound delivery request and an outbound delivery order
- B. A posting change request and a posting change
- C. A production material request and a stock transfer
- D. An outbound delivery order and an outbound delivery

Answer: D

Explanation:
Comprehensive and Detailed In-Depth Explanation:
In decentralized EWM, some document categories can be bypassed, but option A ("An outbound delivery order and an outbound delivery") is mandatory because the outbound delivery order (ODO) is created in EWM from an ERP outbound delivery request, and the outbound delivery is completed after processing, configured in SPRO: SCM Extended Warehouse Management > Goods Issue Process > Outbound Delivery.
Other combinations (B, C, D) can be optional or situational.

NEW QUESTION # 51
Which of the following are characteristics of tailored measurement services? Note: There are 2 correct answers to this question.

- A. They can be displayed in the graphical warehouse layout.
- B. They can be used for the SAP Business Warehouse.
- C. They are based on calculated measurement services.
- D. They use basic measurement services for the key figures.

Answer: C,D

Explanation:
Tailored Measurement Services
* Tailored measurement services build upon basic measurement services (A) for foundational metrics.
* They also utilize calculated measurement services (C) for aggregating and deriving advanced KPIs.
Excluded Options
* Option B: Tailored measurement services are not specifically designed for SAP BW.
* Option D: Graphical warehouse layouts do not directly display tailored services.
SAP S/4HANA Cloud Private Edition Reference
* Refer to Measurement Services Configuration in EWM for comprehensive details.

NEW QUESTION # 52
What can you do with evaluation points?

- A. Influence which warehouse order is assigned to a resource.
- B. Influence the search sequence of storage types, storage sections, and bin types.

- C. Use them to measure the efficiency of your warehouse.
- D. Influence which items shall be picked first.

Answer: B

Explanation:
Evaluation points in SAP EWM are used to:
* C. Influence the Search Sequence of Storage Types, Storage Sections, and Bin Types:
* Evaluation points are part of storage type search logic.
* They assign priorities to storage types, sections, or bins to determine where goods are stored or picked from first.
Incorrect Options:
* A: Evaluation points do not influence resource assignment for warehouse orders.
* B: They do not directly influence picking priority; this is handled by warehouse task rules.
* D: Evaluation points are not used for measuring warehouse efficiency.
References:
* SAP EWM Documentation: Storage Type Search Sequence
* SAP Help Portal: Configuration of Evaluation Points in EWM

NEW QUESTION # 53

Your customer wants to use batch management in SAP Extended Warehouse Management (SAP EWM).
When do you have to create a batch during the inbound process?

- A. Before the inbound delivery is distributed from SAP ERP to SAP EWM
- B. Before the inbound delivery is created in SAP EWM
- C. Before the goods receipt is posted in SAP EWM
- D. Before the inbound delivery is created in SAP ERP

Answer: D

Explanation:
Batch Creation Timing in Inbound Process
* When using batch management in SAP EWM, the batch must be created in SAP ERP before creating the inbound delivery. This ensures the batch information is transferred seamlessly during integration.
Excluded Options
* A (Before goods receipt): Batch creation before goods receipt in SAP EWM is too late in the process.
* B (Before inbound delivery in SAP EWM): Inbound delivery in SAP EWM depends on ERP data.
* D (Before distribution to EWM): Batch creation must occur before document creation in ERP.
SAP S/4HANA Cloud Private Edition Reference
* Refer to Batch Management in SAP EWM Integration Guide for details on batch creation.

NEW QUESTION # 54
