Our products have many advantages, I am going to introduce you the main advantages of our AB-730 Study Materials, I believe it will be very beneficial for you and you will not regret to use our products.

Microsoft AI Business Professional Sample Questions (Q91-Q96):

NEW QUESTION # 91

You create a prompt in Microsoft 365 Copilot to help you create a draft project report. You need the prompt to be available in the Copilot Prompt Gallery. What should you do first?

- **A. Run the prompt.**
- B. Add an agent.
- C. Create a page.
- D. Create a notebook.

Answer: A

Explanation:

In Microsoft 365 Copilot, the Copilot Prompt Gallery is used to store and reuse prompts that have been created and tested. To save a prompt into the gallery, Copilot must first have the prompt as an executed interaction so it can be captured as a reusable prompt (often alongside the context and intended outcome).

Microsoft guidance for prompt management emphasizes validating prompts by running them and reviewing the output, then saving the prompt for reuse once it produces the desired results.

Option D is therefore the correct first step: run the prompt . After execution, you can save it to the Prompt Gallery so it becomes easily discoverable and reusable for future project reports or for sharing within your organization (subject to policy).

Creating a notebook is useful for organizing reference materials across related conversations, but it is not required to publish a prompt to the gallery. Adding an agent is for creating specialized assistants with knowledge and capabilities, not for saving a single prompt. Creating a page is used to refine and collaborate on generated content, not to make a prompt available in the gallery.

Therefore, the first action is to run the prompt .

NEW QUESTION # 92

You are comparing the difference between Microsoft 365 Copilot and Microsoft 365 Copilot Chat. What is available in both versions?

- A. the Researcher agent
- B. Copilot Notebooks
- **C. Copilot Pages**

Answer: C

NEW QUESTION # 93

You create a Microsoft 365 Copilot notebook and add a file named Process.docx from a Microsoft SharePoint site as a reference. Yesterday, a user updated Process.docx in the SharePoint site. What will occur when you chat in the notebook?

- A. The chat will reference both versions of Process.docx.
- B. The chat will reference only the original version of Process.docx.
- **C. The chat will reference the most recent version of Process.docx.**

Answer: C

Explanation:

Comprehensive and Detailed 150 to 200 words of Explanation Microsoft AI Business professional documents:

When you add a file to a Microsoft 365 Copilot notebook from a Microsoft SharePoint site, you are referencing a document that is stored and managed within Microsoft 365. SharePoint maintains a single authoritative file that can be updated over time (with version history behind the scenes). Copilot notebooks that reference SharePoint content are designed to stay grounded in the current version of that cloud-hosted document, subject to your permissions.

Because Process.docx is stored in SharePoint, the notebook reference points to the SharePoint document itself rather than a static local snapshot. When another user updates the document in SharePoint, the "latest" content becomes the current version available at that location. When you chat in the notebook, Copilot will use the file as it exists now in SharePoint, which means it will reference the most recent version.

Option A would be typical only if you attached a local file upload (a static copy) rather than a SharePoint- hosted file. Option C is incorrect because Copilot uses the current file at the referenced location, not multiple historical versions simultaneously.

Therefore, the chat will reference the most recent version of Process.docx.

NEW QUESTION # 94

You create a prompt in Microsoft 365 Copilot to help you create a draft project report. You need the prompt to be available in the Copilot Prompt Gallery. What should you do first?

- A. Run the prompt.
- B. Add an agent.
- C. Create a page.
- D. Create a notebook.

Answer: A

Explanation:

Comprehensive and Detailed 150 to 200 words of Explanation Microsoft AI Business professional documents:

In Microsoft 365 Copilot, the Copilot Prompt Gallery is used to store and reuse prompts that have been created and tested. To save a prompt into the gallery, Copilot must first have the prompt as an executed interaction so it can be captured as a reusable prompt (often alongside the context and intended outcome).

Creating a page is used to refine and collaborate on generated content, not to make a prompt available in the gallery.

Therefore, the first action is to run the prompt.

NEW QUESTION # 95

What is a potential benefit of using AI in business operations?

- A. AI eliminates the need for data-driven decision-making
- B. AI can increase operational efficiency by automating repetitive tasks
- C. AI makes all decisions on behalf of human managers
- D. AI requires no human supervision

Answer: B

Explanation:

AI is highly effective at automating repetitive and mundane tasks, which helps businesses improve efficiency, reduce human error, and free up human workers for more strategic activities.

NEW QUESTION # 96
