JN0-336 New Dumps Pdf, Exam JN0-336 Quick Prep

PremiumVCEDump has designed Juniper JN0-336 pdf dumps format that is easy to use. Anyone can download the Juniper JN0-336 pdf questions file and use it from any location or at any time. Juniper PDF Questions files can be used on laptops, tablets, and smartphones. Moreover, you will get actual Juniper JN0-336 Pdf Dumps file.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q82-Q87):

NEW QUESTION # 82

What are two benefits of using a vSRX in a software-defined network? (Choose two.)

- A. no required software license
- B. infinite number of interfaces

- C. scalability
- D. granular security

Answer: C,D

Explanation:

- Scalability: vSRX instances can be easily added or removed as the needs of the network change, making it a flexible option for scaling in a software-defined network.

- Granular Security: vSRX allows for granular security policies to be enforced at the virtual interface level, making it an effective solution for securing traffic in a software-defined network.

The two benefits of using a vSRX in a software-defined network are scalability and granular security.

Scalability allows you to increase the number of resources available to meet the demands of network traffic, while granular security provides a level of control and flexibility to your network security that is not possible with a traditional firewall. With a vSRX, you can create multiple levels of security policies, rules, and access control lists to ensure that only authorized traffic can enter and exit your network.

Additionally, you would not require a software license to use the vSRX, making it an economical solution for those looking for increased security and flexibility.

NEW QUESTION # 83

Which two statements about SRX Series device chassis clusters are true? (Choose two.)

- A. Each chassis cluster member device can host active redundancy groups
- B. Redundancy group 0 is only active on the cluster backup node.
- C. Chassis cluster member devices must be the same model.
- D. Each chassis cluster member requires a unique cluster ID value.

Answer: A,C

Explanation:

In a chassis cluster, both nodes can host active redundancy groups. The active redundancy groups can be distributed between the two nodes, depending on the configuration and failover status, allowing each node to handle traffic for different sets of services or interfaces.

For the chassis clustering to function correctly, both nodes in the cluster must be of the same model.

This requirement ensures that the hardware capabilities, such as processing power and interface compatibility, are identical, which is crucial for maintaining consistent performance and behavior between cluster nodes.

NEW QUESTION # 84

Regarding static attack object groups, which two statements are true? (Choose two.)

- A. Group membership automatically changes when Juniper updates the IPS signature database.
- B. Group membership does not automatically change when Juniper updates the IPS signature database.
- C. Matching attack objects are automatically added to a custom group.
- D. You must manually add matching attack objects to a custom group.

Answer: B,D

NEW QUESTION # 85

You are experiencing excessive packet loss on one of your two WAN links route traffic from the degraded link to the working link. Which AppSecure component would you use to accomplish this task?

- A. APBR
- B. AppFW
- C. AppQoS
- D. AppQoE

Answer: A

Explanation:

APBR (Application Path-Based Routing) is an AppSecure component which can be used to route traffic from the degraded link to the working link in order to reduce packet loss. APBR is a policy-based routing solution that allows you to configure rules to direct traffic to the most appropriate path, based on application, user, or network metrics.

NEW QUESTION # 86

On an SRX5800, which port is used for chassis cluster out-of-band management?

- A. Txp0
- B. ge-0/0/0
- C. fxp1
- D. user-defined

Answer: D

NEW QUESTION # 87

.....

If you want to buy Juniper JN0-336 exam information, PremiumVCEDump will provide the best service and the best quality products. Our exam questions have been authorized by the manufacturers and third-party. And has a large number of IT industry professionals and technology experts, based on customer demand, according to the the outline developed a range of products to meet customer needs. Juniper JN0-336 Exam Certification with the highest standards of professional and technical information, as the knowledge of experts and scholars to study and research purposes. All of the products we provide have a part of the free trial before you buy to ensure that you fit with this set of data.
