There are many ways to help you prepare for your Fortinet FCP_FML_AD-7.4 exam. iPassleader provide a reliable training tools to help you prepare for your Fortinet FCP_FML_AD-7.4 exam certification. The iPassleader Fortinet FCP_FML_AD-7.4 Exam Materials are including test questions and answers. Our materials are very good sofeware that through the practice test. Our

materials will meet all of theIT certifications.

Fortinet FCP - FortiMail 7.4 Administrator Sample Questions (Q37-Q42):

NEW QUESTION # 37
Refer to the exhibit, which shows a topology diagram of two MTAs.
MTA-1 is delivering an email intended for User 1 to MTA-2. User 1 uses Outlook as an email client. Which two statements about protocol usage between these devices are correct? (Choose two.)

- A. MTA-2 will use IMAP to download the email message from MTA-1.
- B. User 1 will use IMAP or POP3 to download the email message from MTA-2.
- C. MTA-1 will use POP3 to deliver the email message to User 1 directly.
- D. MTA-1 will use SMTP to deliver the email message to MTA-2.

Answer: B,D

NEW QUESTION # 38
Refer to the exhibit, which shows the IBE Encryption page of a FortiMail device.
Which user account behavior can you expect from these IBE settings?

- A. Registered IBE users have 90 days from the time they receive a notification email message to access their IBE email.
- B. First time IBE users must register to access their email within 90 days of receiving the notification email message.
- C. IBE user accounts will expire after 90 days of inactivity and must register again to access new IBE email message.
- D. After initial registration, IBE users can access the secure portal without authenticating again for 90 days.

Answer: C

Explanation:
With "Activation is required for account registration" enabled and an Account inactivity expiry time of 90 days, any IBE account that isn't used (i.e. that goes 90 days without a secure-portal login) will expire, requiring the user to re-register before they can access any new encrypted messages.

NEW QUESTION # 39
Refer to the exhibit, which shows the Authentication Reputation list on a FortiMail device running in gateway mode.
Why was the IP address blocked?

- A. The IP address had consecutive SSH login failures to FortiMail.
- B. The IP address had consecutive SMTPS login failures to FortiMail.
- C. The IP address had consecutive administrative password failures to FortiMail.
- D. The IP address had consecutive IMAP login failures to FortiMail.

Answer: B

Explanation:
Because the device's Authentication Reputation list shows a "Mail" violation and is blocking mail access (along with CLI and Web), it indicates repeated failures of the mail-protocol login. In gateway mode FortiMail only tracks SMTP (SMTPS) authentication failures under the "Mail" category, not IMAP, so consecutive SMTPS login failures triggered the block.

NEW QUESTION # 40
Which two antispam techniques query FortiGuard for rating information? (Choose two.)

- A. IP reputation
- B. SURBL
- C. URL filter
- D. DNSBL

Answer: A,C

Explanation:
URL filter: Queries FortiGuard's constantly updated web-rating database to check URLs in messages.
IP reputation: Uses FortiGuard's reputation service to look up sender IP addresses.

NEW QUESTION # 41
Refer to the exhibit, which shows a few lines of FortiMail logs.
Based on these log entries, which two statements describe the operational status of this FortiMail device? (Choose two.)

- A. The FortiMail device is in server mode.
- B. The FortiMail device is in gateway or transparent mode.
- C. FortiMail is experiencing issues accepting the connection from the external.labMTA.
- D. FortiMail is experiencing issues delivering the email to the internal.labMTA.

Answer: B,D

Explanation:
The FortiMail device is in gateway or transparent mode.
The log shows FortiMail accepting mail from an external MTA (acting as a proxy) and then relaying it on to an internal MTA at 10.0.1.99, which is characteristic of gateway/transparent operation.
FortiMail is experiencing issues delivering the email to the internal.lab MTA.
The final log entry shows stat=Deferred: Connection timed out with internal.lab., indicating FortiMail successfully received the message but is unable to complete delivery to the downstream internal server.

NEW QUESTION # 42
.....

Great concentrative progress has been made by our company, who aims at further cooperation with our candidates in the way of using our FCP_FML_AD-7.4 exam engine as their study tool. Owing to the devotion of our professional research team and responsible working staff, our FCP_FML_AD-7.4 Training Materials have received wide recognition and now, with more people joining in the FCP_FML_AD-7.4 exam army, we has become the top-raking FCP_FML_AD-7.4 learning guide provider in the international market.

Exam Dumps FCP_FML_AD-7.4 Demo: https://www.ipassleader.com/Fortinet/FCP_FML_AD-7.4-practice-exam-dumps.html

But without the PDF version of our FCP_FML_AD-7.4 study materials: FCP - FortiMail 7.4 Administrator, all of these would just be empty talks, And we check the updating of FCP_FML_AD-7.4 pdf vce everyday to make sure the accuracy of our questions, If you want to check the quality of our FCP_FML_AD-7.4 exam materials, you can download the demo from our website free of charge, Many people are taking part in the Fortinet Exam Dumps FCP_FML_AD-7.4 Demo exams for the first time.

And it's inordinately worse if you want to merge or split `Node`s, Analysis Model Traceability, But without the PDF version of our FCP_FML_AD-7.4 Study Materials: FCP - FortiMail 7.4 Administrator, all of these would just be empty talks.
