Fortinet NSE7_SSE_AD-25 Pass Guide | NSE7_SSE_AD-25 Valid Test Vce

IT exam become more important than ever in today's highly competitive world, these things mean a different future. Fortinet NSE7_SSE_AD-25 exam will be a milestone in your career, and may dig into new opportunities, but how do you pass Fortinet NSE7_SSE_AD-25 Exam? Do not worry, help is at hand, with TestBraindump you no longer need to be afraid. TestBraindump Fortinet NSE7_SSE_AD-25 exam questions and answers is the pioneer in exam preparation.

Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Sample Questions (Q45-Q50):

NEW QUESTION # 45
In the Secure Private Access (SPA) use case, which two FortiSASE features facilitate access to corporate applications? (Choose two.)

- A. SD-WAN
- B. thin edge
- C. zero trust network access (ZTNA)
- D. cloud access security broker (CASB)

Answer: A,C

Explanation:
SD-WAN allows efficient and secure routing of traffic from users to corporate applications, while ZTNA enables secure access control and verification for users connecting to internal resources, both of which are essential for Secure Private Access (SPA) in FortiSASE.

NEW QUESTION # 46
Refer to the exhibit. The daily report for application usage for internet traffic shows an unusually high number of unknown applications by category.
What are two possible explanations for this? (Choose two.)

- A. The private access policy must be to set to log Security Events.
- B. Deep inspection is not being used to scan traffic.
- C. Certificate inspection is not being used to scan application traffic.
- D. The inline-CASB application control profile does not have application categories set to Monitor.

Answer: B,C

Explanation:
A high percentage of unknown applications often indicates that encrypted traffic is not being properly inspected. Without certificate inspection or deep inspection, FortiSASE cannot decrypt and analyze HTTPS traffic to identify applications, resulting in them being classified as
"unknown."

NEW QUESTION # 47
When viewing the daily summary report generated by FortiSASE. the administrator notices that the report contains very little data.
What is a possible explanation for this almost empty report?

- A. There are no security profile group applied to all policies.
- B. Digital experience monitoring is not configured.
- C. Log allowed traffic is set to Security Events for all policies.
- D. The web filter security profile is not set to Monitor

Answer: C

Explanation:
If the daily summary report generated by FortiSASE contains very little data, one possible explanation is that the "Log allowed traffic" setting is configured to log only "Security Events" for all policies. This configuration limits the amount of data logged, as it only includes security events and excludes normal allowed traffic.
* Log Allowed Traffic Setting:
* The "Log allowed traffic" setting determines which types of traffic are logged.
* When set to "Security Events," only traffic that triggers a security event (such as a threat detection or policy violation) is logged.
* Impact on Report Data:
* If the log setting excludes regular allowed traffic, the amount of data captured and reported is significantly reduced.
* This results in reports with minimal data, as only security-related events are included.
References:
FortiOS 7.6 Administration Guide: Provides details on configuring logging settings for traffic policies.
FortiSASE 23.2 Documentation: Explains the impact of logging configurations on report generation and data visibility.

NEW QUESTION # 48
In a FortiSASE SD-WAN deployment with dual hubs, what are two benefits of assigning hubs with different priorities? (Choose

two.)

- A. bandwidth allocated traffic shaping
- B. redundancy to seamlessly steer traffic
- C. load balancing based on session identification
- D. optimized performance that meets the minimum SLA requirements

Answer: B,D

Explanation:

Assigning hubs with different priorities in a FortiSASE SD-WAN deployment allows traffic to be routed through the optimal hub to meet SLA requirements and ensures redundancy by enabling automatic failover if the preferred hub becomes unavailable.

NEW QUESTION # 49
Refer to the exhibit.

Based on the configuration shown, in which two ways will FortiSASE process sessions that require FortiSandbox inspection? (Choose two answers)

- A. All files will be sent to an on-premises FortiSandbox for inspection.
- B. Only endpoints assigned a profile for sandbox detection will be processed by the sandbox feature.
- C. All files executed on a USB drive will be sent to FortiSandbox for analysis.
- D. FortiClient quarantines only infected files that FortiSandbox detects as medium level.

Answer: B,C

Explanation:

The exhibit (image_595357.jpg) illustrates the Sandbox configuration tab within a FortiSASE Endpoint Profile. This profile dictates how the managed FortiClient agent handles suspicious files and interacts with the sandbox service.
* Profile-Based Enforcement: In the FortiSASE architecture, security features are not applied globally by default; they are enabled through specific profiles assigned to endpoints. Therefore, the sandbox inspection and remediation logic will only be active for endpoints that have been assigned a profile where the Sandbox feature is enabled.
* Removable Media Protection: Under the File Submission Options in the exhibit, the setting All Files Executed from Removable Media is toggled on. This ensures that any file executed from a USB drive or other external storage is sent to the FortiSandbox for analysis before being permitted to run on the endpoint.
* Sandbox Mode: The Sandbox Mode is set to FortiSASE, indicating that files are sent to the integrated cloud-native sandbox rather than an on-premises appliance. This makes Option A incorrect.
* Quarantine Threshold: The Remediation Actions show that the Action is set to Quarantine for files meeting the Sandbox Detection Verdict Level of Medium. This acts as a minimum threshold; FortiClient will quarantine files identified as Medium, High, or Malicious. Option B is incorrect because it implies only medium-level files are quarantined, whereas higher-risk levels would also be blocked.

NEW QUESTION # 50
......

Our NSE7_SSE_AD-25 study braindumps are comprehensive that include all knowledge you need to learn necessary knowledge, as well as cope with the test ahead of you. With convenient access to our website, you can have an experimental look of free demos before get your favorite NSE7_SSE_AD-25 prep guide downloaded. It is not just an easy decision to choose our NSE7_SSE_AD-25 prep guide, because they may bring tremendous impact on your individuals development. Holding a professional certificate means you have paid more time and effort than your colleagues or messmates in your major, and have experienced more tests before succeed. Our NSE7_SSE_AD-25 Real Questions can offer major help this time. And our NSE7_SSE_AD-25 study braindumps deliver the value of our services. So our NSE7_SSE_AD-25 real questions may help you generate financial reward in the future and provide more chances to make changes with capital for you and are indicative of a higher quality of life.

NSE7_SSE_AD-25 Pass Guide: https://www.testbraindump.com/NSE7_SSE_AD-25-exam-prep.html

On the other hand, under the guidance of high quality NSE7_SSE_AD-25 research materials, the rate of adoption of the NSE7_SSE_AD-25 exam guide is up to 98% to 100%, If you decided to buy our questions, you just need to spend one or two days to practice the NSE7_SSE_AD-25 test cram review and remember the key points of NSE7_SSE_AD-25 exam questions

skillfully, you will pass the exam with high scores, High equality and profitable NSE7_SSE_AD-25 Pass Guide - Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator valid exam torrent helps you pass the NSE7_SSE_AD-25 Pass Guide - Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator exam smoothly.
