- A. Identifies underutilized tools and compliance risks
- B. Translates all tools into multiple languages automatically
- C. Automates training development processes
- D. Enhances employee satisfaction scores by 50%

Answer: A

Explanation:

WalkMe Discovery is a key component of the SAP Business Transformation Management (BTM) suite through SAP's partnership with WalkMe. It is designed to provide visibility into the digital application landscape and analyze software usage across the enterprise.

"WalkMe Discovery automatically discovers all web-based applications used across the organization, revealing underutilized tools, shadow IT, and potential compliance risks." Reference:

The tool allows transformation leaders to map actual system usage, understand license utilization, and identify areas of inefficiency or non-compliance, which directly supports SAP's Business Transformation Management (BTM²) framework goals for transparency and optimization.

"By identifying unused or redundant applications, WalkMe Discovery helps organizations reduce costs and mitigate compliance risks as part of their transformation initiatives." Option A (translation automation) and C (automated training development) are functions more aligned with WalkMe Digital Adoption Platform (DAP), not the Discovery module.

"While the WalkMe DAP provides in-app guidance and user training automation, Discovery focuses on discovering and analyzing app usage." Option D (enhancing satisfaction by 50%) is not a defined or measurable objective of the Discovery module; SAP does not claim specific numerical outcomes related to satisfaction.
