To take full use of the spare time by CCFA-200b test engine, you will enjoy a high efficiency study experience.

CrowdStrike Falcon Administrator Sample Questions (Q50-Q55):

NEW QUESTION # 50

What are custom alerts based on?

- A. Custom event based triggers
- B. Custom workflows
- C. Predefined alert templates
- D. User defined Splunk queries

Answer: C

Explanation:
Scheduling a Custom Alert for your environment consists of three steps: choosing the template you'd like to configure, previewing the search results, then scheduling the alert. Use Custom Alerts to configure email alerts using predefined templates so you're notified about specific activity in your environment. When an alert runs and finds results, it sends an email to specified recipients instead of generating a new detection. Custom Alerts let you set up email alerts based on predefined templates that cover a wide range of topics including Real Time Response session initiation, host containment, OS security settings, and more that are not yet covered by notification workflows.

NEW QUESTION # 51
Where can you find hosts that have been offline for ten minutes or longer?

- A. Sensor Report
- B. Sensor Coverage Dashboard
- C. Host Management
- D. Host Groups

Answer: B

NEW QUESTION # 52
You are creating a new host group that needs to contain all of the servers in your environment regardless of the installed operating system.
Which filter should be applied to the group's assignment rule to accomplish this task?

- A. Build - Server
- B. Manufacturer-All
- C. Model - Server
- D. Type - Server

Answer: D

NEW QUESTION # 53
How does the Unique Hosts Connecting to Countries Map help an administrator?

- A. It highlights countries with known malware
- B. It displays intrusions from foreign countries
- C. It identifies connections containing threats
- D. It helps visualize global network communication

Answer: D

Explanation:
The Unique Hosts Connecting to Countries Map helps an administrator to visualize global network communication. The map shows the number of unique hosts in your environment that have established network connections to different countries in the past 24 hours. You can use this map to identify unusual or suspicious network activity, such as connections to high-risk countries or regions, or connections from hosts that are not expected to communicate with external entities.

NEW QUESTION # 54

Which default user role will allow you to see all analyst session details?

- A. Real Time Response - Active Responder
- B. Real Time Response - Administrator
- C. Falcon Administrator
- D. Real Time Response - Read-Only Analyst

Answer: C

NEW QUESTION # 55

......
