## NEW QUESTION: 1

How can split fulfillment lines in Order Management be managed independently?

- ☒ A. Split fulfillment lines can be managed with an orchestration process instance that has been created for them.
- ☐ B. Split fulfillment lines cannot be managed independently.
- ☐ C. Split fulfillment lines can be managed independently because they are often being shipped from different warehouses.
- ☐ D. Split fulfillment lines can be managed independently because they have different attributes.

Answer: (SHOW ANSWER)

## NEW QUESTION: 2

Your customer wants to prohibit updates to the "Subcontractor License No" field in a fulfillment line after a fulfillment line is closed. The "Subcontractor License No" field is a context-based extensible flexfield in the fulfillment line.

Identify the correct sequence of steps for setting up the preceding constraint.

- ☐ A. Create a constraint entity > Enable the extensible flexfield > Create a validation rule set > Create a record set > Create a processing constraint.
- ☐ B. Enable the extensible flexfield > Create a validation rule set > Create a record set > Create the processing constraint.
- ☐ C. Enable the extensible flexfield > Create a record set > Create a validation rule set > Create the processing constraint.
- ☒ D. Enable the extensible exfield > Create a validation ruleset > Create the processing constraint.
- ☐ E. Create a constraint entity > Enable the extensible flexfield > Create a record set > Create a validation rule set > Create a processing constraint.

## Test

It is browser-based; therefore no need to install it, and you can start practicing for the Oracle Order Management Cloud Order to Cash 2025 Implementation Professional (1z0-1077-25) exam by creating the Oracle 1z0-1077-25 practice test. You don't need to install any separate software or plugin to use it on your system to practice for your actual Oracle Order Management Cloud Order to Cash 2025 Implementation Professional (1z0-1077-25) exam. PDFDumps Oracle Order Management Cloud Order to Cash 2025 Implementation Professional (1z0-1077-25) web-based practice software is supported by all well-known browsers like Chrome, Firefox, Opera, Internet Explorer, etc.

## Oracle Order Management Cloud Order to Cash 2025 Implementation Professional Sample Questions (Q69-Q74):

### NEW QUESTION # 69

Your company sells engines that are preconfigured by engineering, based on the customer location for which the engine-product is being sold. You must also include a user-manual specific to the customer's language, which represents a separate part number on the configured order.

Which type of Configurator model do you need to create?

- A. Kit
- B. Pick to Order (PTO)
- **C. Configure to Order (CTO)**
- D. Make to Stock
- E. Assemble to Order (ATO)

**Answer: C**

Explanation:

A Configure to Order (CTO) model is a type of configurator model that enables you to create customized products based on customer specifications. A CTO model allows you to define features and options that the customer can select, and apply rules and constraints to ensure the validity and feasibility of the configuration.

A CTO model also supports the inclusion of user manuals and other documentation as part of the configuration<sup>1</sup>. You need to create a CTO model to fulfill the requirement of selling engines that are preconfigured by engineering, based on the customer location, and include a user manual specific to the customer's language.

Overview of Configure-to-Order

### NEW QUESTION # 70

A drop ship sales order line is created for an item with quantity as 10. Later, a revision is made on this drop ship sales order to increase the quantity to 15.

At which stage of the fulfillment process, will this change be accepted?

- A. The entire quantity in the purchase order schedule has been shipped by the supplier.
- **B. A requisition is created from the drop ship sales order but the purchase order is yet to be created.**
- C. A purchase order is created against the drop ship sales order but it is not yet shipped by the supplier.
- D. The purchase order schedule against this drop ship sales order line has been partially shipped.

**Answer: B**

Explanation:

The drop ship flow is a variation of the order-to-cash flow, where ordered items are sourced from a supplier<sup>1</sup>.

A revision on a drop ship sales order line to increase the quantity will be accepted only if the requisition is created from the drop ship sales order but the purchase order is yet to be created. This is because once the purchase order is created, the quantity on the sales order line cannot be changed<sup>2</sup>. If the purchase order is partially or fully shipped by the supplier, the sales order line is also partially or fully fulfilled and cannot be revised.

How Drop Ship Works in Order Management

How Order-to-Cash Works in Order Management

### NEW QUESTION # 71

You are in the process of setting up a constraint that prohibits update to an extensible flexfield in a fulfillment line if Ship From Warehouse is X and the fulfillment line is booked. You are able to see the extensible flexfield on the "Manage Constraint Entities" page but not on the "Manage Processing Constraints" page. What could be the reason?

- A. The extensible flexfield is not enabled.
- B. The "Publish extensible flexfield" process was not run.
- C. A "Record Set" needs to be created for the extensible flexfield to be visible on the "Manage Processing Constraints" page.
- D. The "generate packages" program was not submitted.

**Answer: C**

Explanation:

A record set is a group of records that are bound by common attribute values for the purpose of constraint evaluation. You can define conditions and specify a record set to be validated for a given condition as defined by the validation template.

### NEW QUESTION # 72

Which three statements about Managerial Accounting are correct?

- A. Supply Chain Orchestration automatically selects the correct process based on user-defined subledger accounting rules when a supply creation is initiated.
- B. Receipt Accounting is the application that performs the accrual accounting for all types of receipts.
- C. Landed Cost Management gives organizations financial visibility into their extended supply chain costs.
- D. Cost method can be defined granularity down to individual items.
- E. A cost organization does not require a primary cost book associated with the primary ledger.

**Answer: A,C,D**

Explanation:

\* A is correct because cost method is the way of valuing inventory and cost of goods sold. Cost method can be defined at different levels of granularity, such as item category, item, or lot. This allows for more flexibility and accuracy in cost accounting.

\* B is incorrect because a cost organization must have a primary cost book associated with the primary ledger. A cost book is a set of cost accounting policies and valuation structures that determine how inventory transactions are accounted for. A cost organization can have multiple cost books, but one of them must be primary.

\* C is correct because Supply Chain Orchestration is the application that coordinates and executes the fulfillment of sales orders across multiple sources and systems. Supply Chain Orchestration automatically selects the appropriate orchestration process based on user-defined subledger accounting rules when a supply creation is initiated. Subledger accounting rules define how transactions are accounted for in the general ledger.

\* D is correct because Landed Cost Management is the application that enables organizations to capture, track, and allocate the actual costs associated with acquiring items from suppliers. Landed cost includes not only the purchase price, but also other charges such as freight, insurance, taxes, and duties. Landed Cost Management gives organizations financial visibility into their extended supply chain costs and helps them optimize their sourcing and pricing decisions.

\* E is incorrect because Receipt Accounting is not the application that performs the accrual accounting for all types of receipts. Receipt Accounting is the application that performs the accrual accounting for purchase order receipts, return to supplier transactions, and inventory adjustments. Other types of receipts, such as sales order receipts, are accounted for by other applications, such as Receivables.

:

1: Cost Methods 2: Cost Organizations and Cost Books 3: Supply Chain Orchestration : Landed Cost Management : Receipt Accounting

### NEW QUESTION # 73

Your organization has critical requirements for maintaining the supply of volatile, high-demand items to your customers. Global Order Promising can support this requirement through a multilevel allocation feature for allocating supplies for high-demand items with constrained availability.

How many user-defined segment hierarchies does this feature support?

- A. Unlimited
- B. Four

- C. Three
- D. Two

**Answer: B**

## NEW QUESTION # 74

.....

Thousands of Oracle Order Management Cloud Order to Cash 2025 Implementation Professional (1z0-1077-25) exam applicants are satisfied with our 1z0-1077-25 practice test material because it is according to the latest Oracle Order Management Cloud Order to Cash 2025 Implementation Professional (1z0-1077-25) exam syllabus and we also offer up to 1 year of free Oracle Dumps updates.
