Microsoft Power Platform Fundamentals Sample Questions (Q366-Q371):

NEW QUESTION # 366
A company is building a Power Apps portal.
You need to select out-of-the-box portal types to meet the company's requirements.
Which portal types should you use? To answer, drag the appropriate portal types to the correct requirements. Each portal type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:
Box 1: Partner portal
A partner portal allows every organization with resellers, distributors, suppliers, or partners to have real-time access to every stage of shared activities.
Box 2: Community portal
A community portal leverages peer-to-peer interactions between customers and experts to organically grow the catalog of available

knowledge from knowledge base articles, forums, and blogs as well as providing feedback through comments and ratings.
Incorrect Answers:
* Portal from blank: Create a website to share data with external and internal users. This template comes with sample pages to get you quickly started.
* Customer self-service portal: A customer self-service portal enables customers to access self-service knowledge, support resources, view the progress of their cases, and provide feedback.

NEW QUESTION # 367

You plan to use Power Automate to perform data-management tasks when users interact with sales opportunities in Dynamics 365. You need to identify the three types of events that can generate a trigger for the tasks.
Which three types of events should you identify? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. when a record is updated
- B. when a record is deleted
- C. when a record is created
- D. when a record is read
- E. when a record is displayed in a view

Answer: A,B,C

Explanation:
Section: Describe the business value of Power Automate
Explanation:
Triggers like When a record is created, When a record is updated, and When a record is deleted initiate your flow within a few minutes of the event occurring. In rare cases, your flow can take up to 2 hours to trigger.
