Valid Braindumps 1z0-1080-25 Ppt, 1z0-1080-25 Exam Torrent

In the 21st century, with the development of science and technology, the Internet is not only a entertainment platform, but also a world-class electronic library. On TorrentExam site you can find IT information knowledge treasure that belongs to you. Choosing TorrentExam's 1z0-1080-25 Exam Training materials is to choose to embrace the bright future. When you buy our 1z0-1080-25 exam training materials, we will ensure that you pass 1z0-1080-25 test.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.
Topic 2	• Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.
Topic 3	• Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Topic 4	• Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.
Topic 5	• Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.

Topic 6	• Explain required and user-defined dimensions; how dimension hierarchies impact Planning
Topic 7	• Planning Overview: This section of the exam measures the skills of an EPM Consultant and covers the general features of Planning. It includes how Planning works, its core capabilities, and how it fits into enterprise performance management.
Topic 8	• Set Up Planning Security: This section of the exam measures the skills of a Planning Administrator and includes provisioning user roles and assigning appropriate access rights across Planning artifacts and data.
Topic 9	• Creating System Reports: This section of the exam measures the skills of a Planning Administrator and focuses on system-generated reports that provide insights into application activity.
Topic 10	• Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 11	• Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system.
Topic 12	• Report on Planning Data: This section of the exam measures the skills of a Planning Administrator and focuses on generating reports to analyze and present Planning data effectively.
Topic 13	• Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 14	• Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.
Topic 15	• Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.
Topic 16	• Set up valid and invalid intersections and cell-level security: This section of the exam measures the skills of an EPM Consultant and focuses on defining valid data intersections and applying security controls to limit data access at the cell level.
Topic 17	• Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.
Topic 18	• Build validation rules: This section of the exam measures the skills of an EPM Consultant and includes creating rules that validate data entry in forms.
Topic 19	• Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 20	• Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Topic 21	• Design business rules and rulesets"'his section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.
Topic 22	• Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of an EPM Consultant and includes creating interactive forms and dashboards and setting up navigation flows for a better user experience.
Topic 23	• Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.
Topic 24	• Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.

Topic 25	• Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.
Topic 26	• Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.
Topic 27	• Create and manage navigation flows: This section of the exam measures the skills of an EPM Consultant and involves organizing navigation flows to simplify user interaction in Planning.
Topic 28	• This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 29	• Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.

100% Pass Unparalleled Valid Braindumps 1z0-1080-25 Ppt - Oracle Planning 2025 Implementation Professional Exam Torrent

These are expertly designed Oracle 1z0-1080-25 mock tests, under the supervision of thousands of professionals. A 24/7 customer service is available for assistance in case of any sort of pinch. It shows results at the end of every 1z0-1080-25 mock test attempt so you don't repeat mistakes in the next try. To confirm the license of the product, you need an active internet connection. TorrentExam desktop Oracle Planning 2025 Implementation Professional (1z0-1080-25) practice test is compatible with every Windows-based computer. You can use this software without an active internet connection.

Oracle Planning 2025 Implementation Professional Sample Questions (Q106-Q111):

NEW QUESTION # 106
Which step does NOT need to be completed to manage the configuration of Key Performance Indicators (KPIs) in Planning Financials?

- A. Adding KPIs to the alternate hierarchy
- B. Reviewing KPIs in the hierarchy
- C. Verifying enabled KPIs
- D. Adding KPIs in Configure: Financials
- E. Adding KPIs to the hierarchy

Answer: E

NEW QUESTION # 107
You are preparing to design a report in Cloud EPM Planning using Report Designer. Which two statements are true about data sources in reports?

- A. Control the way a report object is printed on the page relative to other report objects.
- B. Include a chart in your report without displaying the underlying data grid.
- C. Insert a report object into the report if you are in Modify mode.
- D. Insert charts in the report header to provide a quick visual summary of data.

Answer: A,B

Explanation:
When designing reports in Oracle Cloud EPM Planning using Report Designer, data sources and report objects (e.g., grids, charts) have specific capabilities. The two true statements about data sources in reports are:

* A. Insert charts in the report header to provide a quick visual summary of data: Incorrect. Report Designer does not support inserting charts directly into the report header; charts are added as objects within the report body, linked to data sources.
* B. Include a chart in your report without displaying the underlying data grid: Correct. You can create a chart object tied to a data source (e.g., a grid) and configure it to display only the chart, suppressing the grid for a cleaner visual presentation.
* C. Control the way a report object is printed on the page relative to other report objects: Correct. Report Designer allows you to adjust the layout and positioning of report objects (e.g., grids, charts) relative to each other, controlling how they appear when printed or exported.
* D. Insert a report object into the report if you are in Modify mode: Incorrect. While you modify reports in Report Designer, there's no specific "Modify mode" restriction-objects can be inserted during initial design or edits, but this is not a data source-specific feature.
The Oracle documentation verifies that B and C reflect Report Designer's flexibility with data sources and object management, making them the correct answers.
References:
Oracle Planning 2024 Implementation Study Guide: "Designing Reports with Report Designer" (docs.oracle. com, Published 2024-09-30).
Oracle EPM Cloud Documentation: "Report Designer Data Sources" (docs.oracle.com, Published 2023-12-05, updated for 2024).

NEW QUESTION # 108
Your administrator wants to create a Planning application with EPM Enterprise Cloud.
Which three Planning application types can you select when creating an application with EPM Enterprise Cloud?

- A. Custom
- B. Hybrid
- C. Modules
- D. Free Form
- E. Plan

Answer: A,C,D

Explanation:
When creating a Planning application with EPM Enterprise Cloud in Oracle Planning 2024, administrators can select from specific application types. The three available types are:
* A. Modules: Correct. The Modules type allows creating a preconfigured application with options like Financials, Workforce, or Capital, tailored to specific planning needs.
* B. Plan: Incorrect. "Plan" is not a distinct application type; it's a generic term for planning, not an option in the creation wizard.
* C. Free Form: Correct. Free Form provides a blank slate for custom cube design without predefined structures, offering maximum flexibility.
* D. Hybrid: Incorrect. "Hybrid" is not an application type in EPM Enterprise Cloud; it may refer to Essbase configurations, not Planning application creation.
* E. Custom: Correct. Custom allows building an application with user-defined dimensions and structures, distinct from Modules' prebuilt options.
The Oracle documentation lists Modules, Free Form, and Custom as the selectable types in EPM Enterprise Cloud, making A, C, and E the correct answers.
References:
Oracle Planning 2024 Implementation Study Guide: "Creating Planning Applications" (docs.oracle.com, Published 2024-10-20).
Oracle EPM Cloud Documentation: "Application Types in EPM Enterprise Cloud" (docs.oracle.com, Published 2023-11-25, updated for 2024).

NEW QUESTION # 109
You need to schedule a weekly data import job. Which two statements are true about scheduling jobs?

- A. You can check the execution status of a job only if it completed.
- B. You can set to receive notifications when the job has completed.
- C. You can set the daily maintenance time when scheduling cloning environment jobs.
- D. You can delete that are currently processing.
- E. You can schedule an Import Data job to run later at intervals.

Answer: B,E

Explanation:

In Oracle Planning 2024, scheduling jobs such as a weekly data import is managed through the Jobs interface, which provides options for automation, monitoring, and notifications. Let's evaluate the provided statements to identify the two that are true:

* A. You can check the execution status of a job only if it completed: This is false. The Jobs console in Oracle EPM allows users to check the status of a job (e.g., Running, Completed, Failed) at any time, not just after completion. Real-time monitoring is a key feature.

* B. You can set the daily maintenance time when scheduling cloning environment jobs: This is false.
Daily maintenance time is a system-wide setting controlled by administrators via Application Settings, not something adjustable when scheduling specific jobs like cloning or data imports.

* C. You can set to receive notifications when the job has completed: This is true. When scheduling a job (e.g., Import Data), users can enable email notifications to be alerted upon job completion, success, or failure, enhancing job management.

* D. You can schedule an Import Data job to run later at intervals: This is true. The scheduling feature supports recurring jobs, such as weekly data imports, allowing users to define the start time and frequency (e.g., daily, weekly) for tasks like importing data from external sources.

* E. You can delete that are currently processing: This is false. Jobs that are currently processing (i.e., in a "Running" state) cannot be deleted until they complete or fail, as per Oracle's job management rules.

Thus, the two true statements are C and D, reflecting the flexibility of scheduling recurring Import Data jobs and receiving completion notifications, both of which are explicitly supported in Oracle Planning 2024.

Oracle Planning Administration Guide: "Monitoring and Notifications" (docs.oracle.com, Published 2024-10-01).

NEW QUESTION # 110

You want to associate Insights with calendar events to associate with the insights so you can use the in IPM Insights, Auto Predict definitions, and Predictive Planning. Which two statements are true about incorporating events in IPM insights?

- A. When you use events, spikes or falls in data are automatically normalized and distributed over the analysis period.
- B. Using events helps you plan ahead for the events and take advantage of opportunities by allowing you to see anticipated spikes and falls in the insight data for specific events.
- C. After creating events, you cannot choose to skip the historical data spikes or falls, so that the data for the event is always included in the analysis.
- D. Events are typically one-off or recurring events that historically led to spikes or declines in data.
- E. All events are taken into consideration during prediction regardless of active or inactive status.

Answer: B,D

NEW QUESTION # 111
