Microsoft GH-100 - GitHub Administration Fantastic Reliable Exam Registration

We provide our candidates with valid GH-100 vce dumps and the most reliable pass guide for the certification exam. Our IT professionals written the latest GH-100 test questions based on the requirement of the certification center, as well as the study materials and test content. By using our online training, you may rest assured that you grasp the key points of GH-100 Dumps Torrent for the practice test.

Microsoft GitHub Administration Sample Questions (Q14-Q19):

NEW QUESTION # 14
You need to create a support bundle for your GitHub Enterprise Server instance with the hostname ghe.avocado.corp. What command should you use to create a support bundle?

- A. ssh -p 122 adming@ghe.avocado.corp - 'ghe-diagnostics' > support-bundle.tgz
- B. curl -u admin https://ghe.avocado.corp/diagnostics/support-bundle.tgz -o
- C. ssh -p 122 adming@ghe.avocado.corp -- 'ghe-support-bundle -o' > support-bundle.tgz
- D. ssh -p 122 adming@ghe.avocado.corp -- 'ghe-config generate-support-bundle' > support-bundle.tgz

Answer: C

Explanation:
Run the ghe-support-bundle command over SSH on your appliance and redirect its output to a file. For example:
ssh -p 122 admin@ghe.avocado.corp -- 'ghe-support-bundle -o' > support-bundle.tgz This invokes the built-in support-bundle utility on your GitHub Enterprise Server instance and captures the resulting archive locally.

NEW QUESTION # 15
You want to ensure a secret is automatically available to only workflows in internal and private repositories in the organization. Where do you configure the required access policy?

- A. Organization secret
- B. Actions policies
- C. Rulesets
- D. Runner groups

Answer: A

Explanation:
You set the access policy on the Organization Secret itself - configuring its visibility so it's scoped automatically to only internal and private repositories.

NEW QUESTION # 16
Which of the following are valid ways to pass data to a reusable workflow in a separate repository?

- A. Define the secrets in the reusable workflow's repository and reference the secret using the 'secrets' context.
- B. Use environment variables to pass data directly to the reusable workflow.
- C. Define inputs in the reusable workflow and pass values from the calling workflow.
- D. Define the secrets in the caller repository and call the reusable workflow using the 'secrets' keyword.

Answer: C,D

Explanation:
You declare namedinputs in the reusable workflow's on.workflow_call block and then pass values from the caller using thewithkeyword, allowing the called workflow to consume those parameters.
You define required secrets in the caller repository and supply them to the reusable workflow via thesecretskeyword in the workflow-call step, ensuring sensitive values are securely passed.

NEW QUESTION # 17
Which of the following accurately contrasts a GitHub App and a GitHub Action?

- A. GitHub Actions are limited to reading repository content only
- B. GitHub Actions can only be used to respond to events within a single repository while GitHub Apps can respond to events from multiple repositories
- C. GitHub Apps run only on GitHub-provided virtual machines, while GitHub Actions run only on customer-hosted machines
- D. GitHub Apps can only be used inside .github/workflows

Answer: B

Explanation:
GitHub Actions workflows are defined and triggered within a single repository's context, whereas GitHub Apps are installed at the organization or user level and can subscribe to events across multiple repositories.

NEW QUESTION # 18
When a user becomes a member of multiple GitHub organizations, which THREE of the following are important considerations for administrators? (Choose three.)

- A. The user will have different permission levels in each organization.
- B. The user will automatically have the same role across all organizations.
- C. The user's repository access and/or team membership needs to be managed separately for each organization.
- D. The user's personal repositories will become accessible to all organizations.
- E. The user's profile information becomes private to non-organization members.
- F. The user will need to authorize credentials separately for each SAML-enabled organization.

Answer: A,C,F

Explanation:
A user's repository access and team memberships are scoped to each organization, so admins must configure permissions separately per org.
When an organization enforces SAML SSO, each member must authorize their personal access tokens or SSH keys for that org, requiring separate approval for each SAML-enabled organization Roles and permission levels (owner, member, billing manager, repository roles, etc.) are assigned on a per-organization basis, so a user often has different permissions in different organizations.

NEW QUESTION # 19
......

By Finishing the GitHub Administration exam, you will save your work and even change to another better door way. By and by, it is not difficult to do Microsoft GH-100 dumps as you would confront two or three inconveniences during the trip. By utilizing Microsoft GH-100 Dumps, it is especially simple to appear at your goal. We can equip you with explicit tips that could show you the fundamental method for doing battling the difficulties and draw a definite guide toward your objective for the GitHub Administration exam.

GH-100 Valid Study Notes: https://www.actual4dump.com/Microsoft/GH-100-actualtests-dumps.html

Students preparing for the GH-100 Valid Study Notes certification have a choice of writing the GH-100 Valid Study Notes exam as a single paper or as two papers together, Microsoft Reliable GH-100 Exam Registration We can prove it by following reasons for your reference, Microsoft Reliable GH-100 Exam Registration passexamonline can be your trustworthy source for various IT certifications, because we have the following advantages, As working people if we do not grasp time to get more certificates such as Microsoft GH-100.
