### 질문 # 63

Which fact is driving technology to be more important now than ever?

- A. It helps drive better outcomes and experiences.
- B. It is cheaper.
- C. It is less powerful.
- D. It is less complex.

정답: A

설명:

Technology has become integral to business operations, especially for small and medium businesses (SMBs), because it enables better outcomes and experiences. This is driven by the need for SMBs to remain competitive and agile in a rapidly changing market. Technology provides the tools for improved efficiency, productivity, and customer engagement. It also allows SMBs to adapt quickly to market changes and customer needs, which is crucial for driving business growth and success<sup>12</sup>. #### 질문 # 64

Which Cisco solution is crucial for securing SMB's remote work environments?

- A. Cisco Firepower
- B. Cisco AnyConnect
- C. Cisco Duo
- D. Cisco Nexus

정답: C

설명:

Comprehensive and Detailed In-Depth Explanation: Cisco Duo is a crucial solution for securing SMBs' remote work environments due to its focus on multi-factor authentication (MFA) and zero-trust security.

Remote work increases risks like unauthorized access and phishing, especially for SMBs with limited security resources. Duo verifies user identities beyond passwords, ensuring only trusted users access applications and data, whether on-premises or in the cloud. Its ease of deployment and affordability make it ideal for SMBs, as demonstrated in cases like Sentara Healthcare, which reduced security costs by 75% while protecting remote users. Duo integrates with VPNs, cloud apps, and devices, providing a lightweight yet robust security layer tailored to the distributed nature of remote work.

\* A. Cisco Firepower: While Firepower (next-generation firewalls) offers strong network security, it's more suited for on-premises or perimeter defense, not specifically optimized for remote user authentication.

\* C. Cisco AnyConnect: This VPN solution secures remote connections but lacks MFA natively (though it integrates with Duo), making it less comprehensive alone for remote security.

\* D. Cisco Nexus: A data center switching platform, Nexus is irrelevant to securing remote work environments, focusing instead on infrastructure performance.

Cisco Duo (B) stands out as the go-to solution for SMB remote security due to its targeted, user-centric approach.

#### 질문 # 65

How do Meraki cameras perform in the smart SMB experience?

- A. recording room temperature
- B. counting people
- C. schedule policies for recording
- D. recording videos

정답: B

설명:

Cisco Meraki cameras are designed to provide enhanced security and business insights for SMBs. They do not record room temperature, as their primary function is not environmental monitoring. While they do record videos, this is a standard feature of most security cameras and not unique to the smart SMB experience.

Scheduling policies for recording is also a feature, but it is not highlighted as a key performance aspect in the context of smart SMB experience. The distinguishing feature of Meraki cameras in a smart SMB setup is their ability to count people<sup>1</sup>. This is part of the advanced analytics capabilities that Meraki cameras offer, which include motion heatmaps, historical person tracking, and intelligent motion indexing. These features are particularly useful for businesses to gain insights into customer behavior, occupancy, and usage patterns.

#### 질문 # 67

Which Cisco program offers knowledge about security resilience and how the Cisco Secure portfolio can help customers achieve it?

- A. MINT
- B. Fire Jumper
- C. EBC
- D. U-Learn

정답: B

설명:

The Cisco Fire Jumper program is designed to provide knowledge about security resilience and how the Cisco Secure portfolio can assist customers in achieving it. This program educates and enables partners on Cisco's security architecture, helping them to understand and sell Cisco security solutions effectively. It covers various aspects of security resilience, including threat defense, secure network access, and end-to-end protection, which are all crucial elements of the Cisco Secure portfolio.
