

Answers Cisco 300-745 Free | Interactive 300-745 Course

c) Macro lens
d) Fixed focal lens

Rationale: Wide-angle lenses capture more of a scene, making them ideal for large areas.

9. What does PoE stand for in IP camera installations?

a) Power over Ethernet
b) Protocol over Ethernet
c) *Power over Ethernet*
d) Peripheral over Ethernet

Rationale: PoE allows network cables to carry electrical power to IP cameras, simplifying installation.

10. Which component is essential for storing surveillance footage locally?

a) Switch
b) Router
c) *Hard drive*
d) Firewall

Rationale: Hard drives provide local storage for video recordings on NVRs and NDSs.

11. Which type of video camera is most suitable for low-light conditions?

a) *IR camera*
b) Analog camera

This is a mutually beneficial learning platform, that's why our 300-745 study materials put the goals that each user has to achieve on top of us, our loyal hope that users will be able to get the test 300-745 certification, make them successful, and avoid any type of unnecessary loss and effortless harvesting that belongs to their success. Respect the user's choice, will not impose the user must purchase the 300-745 Study Materials. We can meet all the requirements of the user as much as possible, to help users better pass the qualifying exams.

We are committed to providing our customers with the most up-to-date and accurate Cisco 300-745 preparation material. That's why we offer free demos and up to 1 year of free Cisco Dumps updates if the Cisco 300-745 Certification Exam content changes after purchasing our product. With these offers, our customers can be assured that they have the latest and most reliable Designing Cisco Security Infrastructure (300-745) preparation material.

2026 Perfect 300-745: Answers Designing Cisco Security Infrastructure Free

Our passing rate is 99% and our product boosts high hit rate. Our 300-745 test torrents are compiled by professionals and the answers and the questions we provide are based on the real exam. The content of our 300-745 exam questions is simple to be understood and mastered. To let you get well preparation for the exam, our software provides the function to stimulate the real exam and the timing function to help you adjust the speed. Based on those merits of our 300-745 Guide Torrent you can pass the exam with high possibility.

Cisco Designing Cisco Security Infrastructure Sample Questions (Q13-Q18):

NEW QUESTION # 13

A bank experienced challenges with compromised endpoints gaining access to the internal network. To enhance security, the bank wants to ensure that all endpoints are scanned for compliance check before being allowed to access the network. Which action achieves the level of security and control?

- A. Configure TrustSec using Cisco ISE.
- **B. Implement Posture validation using Cisco ISE.**
- C. Use MFA using Cisco DUO.
- D. Set up data loss prevention policy.

Answer: B

Explanation:

Posture validation with Cisco ISE checks endpoint compliance (such as antivirus status, patches, and security configurations) before granting network access. This ensures compromised or non-compliant endpoints are denied access, directly addressing the bank's security concern.

NEW QUESTION # 14

A company recently discovered that a former employee, who left to join a competitor, continued to access and exfiltrate sensitive data over several weeks after leaving. The breach highlighted vulnerabilities in the organization's data security and access management practices. To prevent such incidents in the future, the organization must adopt measures that detect and restrict unauthorized data access and transfer. Which mitigation strategy must be implemented to address the issue?

- A. Implement web application firewall.
- B. Deploy audit logging and monitoring solution.
- **C. Implement data loss prevention strategy.**
- D. Upgrade network policy access.

Answer: C

Explanation:

A Data Loss Prevention (DLP) strategy directly addresses the problem of unauthorized access and exfiltration of sensitive data. DLP tools monitor, detect, and block suspicious data transfers, ensuring that insiders or former employees cannot copy, email, or upload sensitive information without authorization. This provides the required prevention and control that the scenario calls for.

NEW QUESTION # 15

Network administrators at a medical facility cannot log in to network devices because of excessive resource consumption and high CPU utilization. The situation has led to delays in routine maintenance and troubleshooting, which affects overall network performance. An engineer must optimize the handling of traffic to reduce the impact and maintain consistent access and operational efficiency. Which approach must be implemented to meet the requirement?

- A. RBAC
- **B. Control Plane Policing**
- C. AAA
- D. SNMP

Answer: B

Explanation:

Control Plane Policing (CoPP) protects the CPU of network devices by filtering and rate-limiting control plane traffic. This prevents excessive resource consumption, ensures stability, and maintains administrator access for maintenance and troubleshooting.

NEW QUESTION # 16

A technology company has many remote workers who access corporate resources from various locations. The company must ensure that security policies are managed and enforced directly on endpoints, and endpoints are protected from threats regardless of location. Which firewall architecture meets the requirements?

- A. traditional firewall

- B. next-generation firewall
- **C. host-based firewall**
- D. web application firewall

Answer: C

Explanation:

A host-based firewall enforces security policies directly on endpoints, ensuring they remain protected regardless of location. This architecture provides consistent defense for remote workers accessing corporate resources from outside the traditional network perimeter.

NEW QUESTION # 17

How does a SOC leverage flow collectors?

- **A. It provides data for analysis in threat detection and response system**
- B. It performs load balancing capabilities across systems to optimize performance.
- C. It provides real time content filtering.
- D. It performs data backup and recovery.

Answer: A

Explanation:

A flow collector gathers metadata about network traffic (such as NetFlow or IPFIX), which SOC analysts use to analyze communication patterns. This data is critical for threat detection and response, helping identify anomalies, lateral movement, or potential attacks.

NEW QUESTION # 18

.....

The supremacy of Exam4Labs in the tech sector solely relies on its competency to offer its users updated and real 300-745 exam dumps. Our dedicated team takes feedback from experts all around the world to update its 300-745 actual dumps. This practice material will make your preparation for the Cisco 300-745 examination super easy and effective.
