Get Up-to-Date NIS-2-Directive-Lead-Implementer Valid Test Question to Pass the NIS-2-Directive-Lead-Implementer Exam

PrepPDF can not only save you valuable time, but also make you feel at ease to participate in the exam and pass it successfully. PrepPDF has good reliability and a high reputation in the IT professionals. You can free download the part of PECB NIS-2-Directive-Lead-Implementer exam questions and answers PrepPDF provide as an attempt to determine the reliability of our products. I believe you will be very satisfied of our products. I have confidence in our PrepPDF products that soon PrepPDF's exam questions and answers about PECB NIS-2-Directive-Lead-Implementer will be your choice and you will pass PECB certification NIS-2-Directive-Lead-Implementer exam successfully. It is wise to choose our PrepPDF and PrepPDF will prove to be the most satisfied product you want.

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q37-

Q42):

NEW QUESTION # 37

Scenario 5: Based in Altenberg, Germany, Astral Nexus Power is an innovative company founded by visionary engineers and scientists focused on pioneering technologies in the electric power sector. It focuses on the development of next-generation energy storage solutions powered by cutting-edge quantum materials. Recognizing the critical importance of securing its energy infrastructure, the company has adopted the NIS 2 Directive requirements. In addition, it continually cooperates with cybersecurity experts to fortify its digital systems, protect against cyber threats, and ensure the integrity of the power grid. By incorporating advanced security protocols, the company contributes to the overall resilience and stability of the European energy landscape. Dedicated to ensuring compliance with NIS 2 Directive requirements, the company initiated a comprehensive journey toward transformation, beginning with an in-depth comprehension of its structure and context, which paved the way for the clear designation of roles and responsibilities related to security, among others. The company has appointed a Chief Information Security Officer (CISO) who is responsible to set the strategic direction for cybersecurity and ensure the protection of information assets. The CISO reports directly to the Chief Executive Officer (CEO) of Astral Nexus Power which helps in making more informed decisions concerning risks, resources, and investments. To effectively carry the roles and responsibilities related to information security, the company established a cybersecurity team which includes the company's employees and an external cybersecurity consultant to guide them.

Astral Nexus Power is also focused on managing assets effectively. It consistently identifies and categorizes all of its digital assets, develops an inventory of all assets, and assesses the risks associated with each asset. Moreover, it monitors and maintains the assets and has a process for continual improvement in place. The company has also assigned its computer security incident response team (CSIRT) with the responsibility to monitor its on and off premises internet-facing assets, which help in managing organizational risks. Furthermore, the company initiates a thorough process of risk identification, analysis, evaluation, and treatment. By identifying operational scenarios, which are then detailed in terms of assets, threats, and vulnerabilities, the company ensures a comprehensive identification and understanding of potential risks. This understanding informs the selection and development of risk treatment strategies, which are then communicated and consulted upon with stakeholders. Astral Nexus Power's commitment is further underscored by a meticulous recording and reporting of these measures, fostering transparency and accountability.

Based on scenario 5, Astral Nexus Power's hired an external consultant to provide guidance to the cybersecurity team compromised by the company's employees. Is this acceptable?

- A. No, the cybersecurity team must be compromised by external cybersecurity experts only
- B. o, the cybersecurity team must be compromised by inside staff only to ensure confidentiality and avoid disclosing internal processes to external parties
- C. Yes, for establishing the cybersecurity team, decisions can be made to incorporate inside staff and guidance of an external expert

Answer: C

NEW QUESTION # 38

What should a cybersecurity policy specify with regard to the handling of sensitive information?

- A. Guidelines explaining how to permanently delete all sensitive data
- B. Guidance on sharing sensitive information on social media platforms
- C. Guidelines on sharing permissions and data masking techniques during threats

Answer: C

NEW QUESTION # 39

Scenario 1:

into incidents that could result in substantial material or non-material damage. When it comes to identifying and mitigating risks, the company has employed a standardized methodology. It conducts thorough risk identification processes across all operational levels, deploys mechanisms for early risk detection, and adopts a uniform framework to ensure a consistent and effective incident response. In alignment with its incident reporting plan, SecureTech reports on the initial stages of potential incidents, as well as after the successful mitigation or resolution of the incidents.

Moreover, SecureTech has recognized the dynamic nature of cybersecurity, understanding the rapid technological evolution. In response to the ever-evolving threats and to safeguard its operations, SecureTech took a proactive approach by implementing a comprehensive set of guidelines that encompass best practices, effectively safeguarding its systems, networks, and data against threats. The company invested heavily in cutting-edge threat detection and mitigation tools, which are continuously updated to tackle emerging vulnerabilities. Regular security audits and penetration tests are conducted by third-party experts to ensure robustness

against potential breaches. The company also prioritizes the security of customers' sensitive information by employing encryption protocols, conducting regular security assessments, and integrating multi-factor authentication across its platforms. SecureTech reports on the initial stages of potential incidents and after the successful mitigation or resolution of the incidents. Is this in compliance with the NIS 2 Directive requirements? Refer to scenario 1.

- A. No, the Directive requires that incidents are reported only in their initial stages
- **B. Yes, the Directive introduces a two-stage approach to incident reporting, requiring initial and final reports.**
- C. No, the Directive requires that incidents are reported only after they have been resolved

Answer: B

NEW QUESTION # 40

Which reporting method is best suited for presenting raw data in an easy-to-read format, including features like nested grouping, rolling summaries, and dynamic drill-through or linking?

- A. Tactical and operational dashboards
- B. Scorecards or strategic dashboards
- **C. Reports**

Answer: C

NEW QUESTION # 41

According to Article 31, what is the recommended approach for competent authorities to supervise public administration entities?

- A. They should rely solely on national frameworks for guidance on supervision
- B. They should consult legal experts for guidance on supervision
- **C. They should have operational independence**

Answer: C

NEW QUESTION # 42
