

Nokia 4A0-205 Hot Spot Questions, 4A0-205 Practice Test

DOWNLOAD the newest Exam4PDF 4A0-205 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=13S0LkLL3tcMqkPCW81INymF-6DN10_dT

Our 4A0-205 practice questions attract users from all over the world because they really have their own charm. No product like our 4A0-205 study guide will seriously consider the needs of users in all aspects. From product content to system settings, we will give you what you want! Firstly, you definitely want to pass the exam for sure. Our 4A0-205 Exam Questions are high-effective with a high pass rate as 98% to 100%. So don't hesitate, just come and buy our 4A0-205 learning braindumps!

The loss of personal information in the information society is indeed very serious, but 4A0-205 guide materials can assure you that we will absolutely protect the privacy of every user. Our 4A0-205 study braindumps users are all over the world, is a very international product, our 4A0-205 Exam Questions are also very good in privacy protection. And we offer good services on our 4A0-205 learning guide to make sure that every detail is perfect.

>> **Nokia 4A0-205 Hot Spot Questions** <<

Your Best Choice to Get Nokia 4A0-205 Certification is Exam4PDF

Considering that different customers have various needs, we provide three versions of 4A0-205 test torrent available: PDF version, PC Test Engine and Online Test Engine versions. One of the most favorable demo of our 4A0-205 exam questions on the web is also written in PDF version, in the form of Q&A, can be downloaded for free. This kind of 4A0-205 Exam Prep is printable and has instant access to download, which means you can study at any place at any time for it is portable. And after you have a try on our free demo of 4A0-205 training guide, then you will know our wonderful quality.

Nokia Optical Networking Fundamentals Sample Questions (Q51-Q56):

NEW QUESTION # 51

Which of the following statements about the ODUk unit is TRUE?

- A. The ODUk is processed at an optical level.
- B. The ODUk contains the FEC.
- **C. The ODUk is the basic payload that can be electronically groomed and switched in the OTN network.**
- D. The ODUk is the first container in which the client signal is inserted.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Nokia Optical Networking Fundamentals:

In the Optical Transport Network (OTN) hierarchy, the ODUk (Optical Data Unit of order k) is the fundamental unit for electronic grooming and switching. Unlike the OTUk layer, which is tied to a specific physical optical interface and includes the Forward Error Correction (FEC), the ODUk layer is "path-oriented." This means that in a switched WDM system like the Nokia 1830 PSS-24x, the ODUk containers can be switched across a backplane from one line card to another without needing to deconstruct the entire optical signal.

To clarify the other options: Option A is false because FEC is part of the OTUk (Transport Unit) layer. Option C is false because ODUk processing is entirely electrical (O-E-O must occur to access the ODUk overhead). Option D is false because the OPU (Optical Payload Unit) is actually the "first" container where the client signal is mapped; the ODUk then wraps around the OPU to add path-level monitoring and maintenance signals. Therefore, the ODUk acts as the "virtual container" that allows the network to manage services end-to-end across multiple optical spans.

NEW QUESTION # 52

What is the metro area network?

- A. The metro area network is that portion of network that passes through a city to provide connections to several customers.
- B. The metro area network is located in between two access area networks and made of photonic nodes only (no OCS/SWDM nodes are used there).
- C. The metro area network is located between access and core domains.
- D. The metro area network is made of OCS/SWDM nodes only, as no pure photonic nodes are used here.

Answer: A

Explanation:

The Metro Area Network (MAN) is a telecommunications network that spans a metropolitan area and connects multiple local area networks (LANs) or business networks together. It typically covers an area that is larger than a LAN but smaller than a wide area network (WAN). The purpose of a MAN is to provide a high-bandwidth, low-latency communication infrastructure for businesses and other organizations in a metropolitan area.

NEW QUESTION # 53

A user needs to retrieve the active alarm list from a network element. Which command should be issued through an 1830 PSS CLI?

- A. retrieve alarms
- B. show active alarms
- C. display alarms
- D. alm

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Nokia Optical Networking Fundamentals:

The Nokia 1830 PSS uses a Command Line Interface (CLI) that is distinct from the Nokia SR-OS used in routers. For technicians performing local maintenance or troubleshooting via a serial or SSH connection to the Shelf Controller (EC), the command to view the current status of the network element's alarms is show fault-database or the shorthand alm.

When the alm command is executed, the system displays a table containing all active alarms, their severity (Critical, Major, Minor, or Warning), the timestamp of the occurrence, and the specific object (e.g., a specific port or card) that is reporting the fault. This is the primary method for "Layer 0" local troubleshooting. While management software like WS-NOC provides a Graphical User Interface (GUI) to view these alarms, knowing the CLI command is essential for field operations where a connection to the central management system might not be available. Option B, C, and D are incorrect as they do not follow the specific syntax of the 1830 PSS CLI environment.

NEW QUESTION # 54

What is a degree-1 node?

- A. A node with one direction only and therefore used as In-Line-Amplifier (ILA)
- B. A node with only east and west sides without directions towards north and south
- C. A node with only one express channel and therefore made of two sides
- D. A node with only one direction and therefore a terminal node

Answer: D

Explanation:

A degree-1 node is a node that only has one direction, and it is therefore a terminal node. This means that the node only has one input and one output port. It does not have any other ports to connect to other nodes or fibers. This is a common feature of some optical transport networks, such as ring networks, where a degree-1 node serves as the endpoint of the ring.

NEW QUESTION # 55

What is a trail?

- A. A link between end points to increase the power budget of the optical link
- B. An entity to encapsulate a low order signal into a high order container
- C. A physical link between two optical amplifiers
- **D. A transparent transport of a client signal**

Answer: D

Explanation:

A trail is a transparent transport of a client signal. A trail is a physical link between two points in an optical network, allowing for the transport of a client signal from one point to the other. It is a low-order signal, such as a 10G Ethernet or a Fibre Channel signal, encapsulated into a high-order container, such as a 40G or 100G signal. This allows for the transport of the client signal over longer distances, increasing the power budget of the optical link.

NEW QUESTION # 56

.....

We provide varied functions to help the learners learn our 4A0-205 study materials and prepare for the exam. The self-learning and self-evaluation functions of our 4A0-205 exam questions help the learners check their learning results and the statistics and report functions help the learners find their weak links and improve them promptly. And you will be more confident as you know the inform of the 4A0-205 Exam and the questions and answers.

4A0-205 Practice Test: <https://www.exam4pdf.com/4A0-205-dumps-torrent.html>

It boosts the functions to stimulate the 4A0-205 exam, provide the time-limited exam and correct the mistakes online, Nokia 4A0-205 Hot Spot Questions We are forced to disclose your information by law and government authorities, Nokia 4A0-205 Hot Spot Questions Because of the Simplified and Relevant Information, Nokia 4A0-205 Hot Spot Questions In addition, you must buy some useful materials and test questions to increase your passing rate.

New appointment with, It was about three sprints 4A0-205 before I finally got it' A few times before that third sprint review, I almost quit, It boosts the functions to stimulate the 4A0-205 Exam, provide the time-limited exam and correct the mistakes online.

Nokia 4A0-205 Hot Spot Questions: Nokia Optical Networking Fundamentals - Exam4PDF Supplies you best Practice Test

We are forced to disclose your information by law and government authorities, 4A0-205 Latest Learning Material Because of the Simplified and Relevant Information, In addition, you must buy some useful materials and test questions to increase your passing rate.

4A0-205 certification has got many people attention so far.
