

Most LEED-AP-BD-C Reliable Questions - LEED-AP-BD-C Reliable Test Syllabus

Which of the following factors influence the recycling efforts within buildings?

- A) Lack of education
- B) Non-availability of recycling programs in town
- C) ignorance about recycling
- D) lack of convenient, physical spaces for recycling - ✓✓D) lack of convenient, physical spaces for recycling

A project team for a school project will reuse the shell of an existing building and recycle the rest of the construction and demolition debris. Which of the following MR credits will this have a positive affect? (choose 2)

- A) MR Credit Building Life-Cycle impact reduction
- B) MR Credit Furniture and Medical Furnishings
- C) MR Prerequisite Storage and Collection of Recyclables

Our advanced operation system on the USGBC LEED-AP-BD-C learning guide will automatically encrypt all of the personal information on our LEED AP Building Design + Construction (LEED AP BD+C) LEED-AP-BD-C practice dumps of our buyers immediately, and after purchasing, it only takes 5 to 10 minutes before our operation system sending our LEED AP Building Design + Construction (LEED AP BD+C) LEED-AP-BD-C Study Materials to your email address, there is nothing that you need to worry about, and we will spare no effort to protect your interests from any danger and ensure you the fastest delivery.

We declare that we can ensure you 100% pass, because we have the real exam questions for the LEED-AP-BD-C actual test. All the questions of USGBC LEED-AP-BD-C test pdf are taken from current pool of actual test, then after refined and checked, compiled into the complete dumps. Furthermore, the answers are correct and verified by our IT experts with decades of hands-on experience. So the high quality and accuracy of LEED-AP-BD-C Cert Guide are without any doubt. With our 100 % pass rate history & money back guarantee, you can rest assured to choose our LEED-AP-BD-C vce files.

LEED-AP-BD-C Reliable Test Syllabus - LEED-AP-BD-C Practice Test Fee

Our LEED-AP-BD-C preparation practice are highly targeted and have a high hit rate, there are a lot of learning skills and key points in the exam, even if your study time is very short, you can also improve your LEED-AP-BD-C exam scores very quickly. Even if you have a week foundation, I believe that you will get the certification by using our LEED-AP-BD-C Study Materials. We can claim that with our LEED-AP-BD-C practice engine for 20 to 30 hours, you will be ready to pass the exam with confidence.

USGBC LEED AP Building Design + Construction (LEED AP BD+C) Sample Questions (Q145-Q150):

NEW QUESTION # 145

When attempting Regional Priority Credit, what must be provided in LEED Online?

- A. Latitude and longitude
- B. ENERGY STAR score
- C. Heating and cooling degree days
- D. Climate zone

Answer: A

Explanation:

To pursue a Regional Priority Credit in LEED, project teams must provide the latitude and longitude (A) of the project in LEED Online. This information helps the LEED system identify which regional priorities are applicable based on the project's geographic location. Regional Priority Credits are customized credits specific to environmental concerns in a particular area, rewarding projects for addressing local issues. Other options like heating and cooling degree days (B), climate zone (C), and ENERGY STAR score (D) are not required to qualify for these credits.

NEW QUESTION # 146

Which of the following innovation proposals is most likely to be successful to achieve an Innovation Credit?

- A. Distributing leaflets to project occupants about available public transit services nearby
- B. Including locked, indoor bicycle storage for 100% of project occupants
- C. Providing an educational program on the environmental and human health benefits of green building practices
- D. Being located next to a 20 mi. (32 km) award-winning bicycle trail

Answer: C

Explanation:

Providing an educational program on the environmental and human health benefits of green building practices is a potential innovation strategy that is not addressed by any existing LEED credit. It also meets the criteria of being measurable, replicable, and having a positive impact on the project and the environment.

Reference: LEED v4 BD+C Reference Guide, Innovation Category, INc1: Innovation, Option 1. Innovation (1 point), page 704.

NEW QUESTION # 147

LEED project boundaries that include multiple similar buildings which are all eligible for certification can be registered as which of the following?

- A. Neighborhood project
- B. Master Site project
- C. Group project
- D. Batch project

Answer: C

Explanation:

LEED project boundaries that include multiple similar buildings which are all eligible for certification can be registered as a group project. A group project allows multiple buildings (or interior spaces within multiple buildings) on a shared site to be certified as a single LEED project. These projects must meet the criteria outlined in the LEED Campus Guidance for Projects on a Shared Site, such as having the same construction contract, ownership, management, space type, rating system, and compliance paths. A group project will receive one certification and rating for the entire group.

NEW QUESTION # 148

What is the system boundary that a building life cycle analysis must be defined to account for?

- A. Cradle-to-cradle
- B. Cradle-to-gate
- C. Cradle-to-building
- **D. Cradle-to-grave**

Answer: D

Explanation:

The system boundary that a building life cycle analysis must be defined to account for is the cradle-to-grave stage, which includes the production, construction, use, and end-of-life stages of the building. This stage covers all the inputs and outputs of the building system, such as materials, energy, water, emissions, waste, and maintenance.

NEW QUESTION # 149

The Required Breathing Zone Outdoor Airflow V_{bz} for a new banking facility is 0.120 CFM/ft² (0.6 L/s/m²). If the team decides to attempt Increased Ventilation under Option 2 in the Indoor Environmental Quality Credit, Enhanced Indoor Air Quality Strategies, what is the minimum Design Zone Outdoor Airflow?

- A. 0.168 CFM/ft² (0.85 L/s/m²)
- B. 0.30 CFM/ft² (1.5 L/s/m²)
- C. 0.156 CFM/ft² (0.79 L/s/m²)
- **D. 0.144 CFM/ft² (0.73 L/s/m²)**

Answer: D

Explanation:

This option requires the project to increase the breathing zone outdoor airflow by at least 20% above the minimum rates required by ASHRAE 62.1-2010. Therefore, the minimum design zone outdoor airflow is $0.120 \text{ CFM/ft}^2 \times 1.2 = 0.144 \text{ CFM/ft}^2$.

NEW QUESTION # 150

.....

Our App online version of LEED-AP-BD-C study materials, it is developed on the basis of a web browser, as long as the user terminals on the browser, can realize the application which has applied by the LEED-AP-BD-C simulating materials of this learning model, users only need to open the App link, you can quickly open the learning content in real time in the ways of the LEED-AP-BD-C Exam Guide, can let users anytime, anywhere learning through our App, greatly improving the use value of our LEED-AP-BD-C exam prep.
