Quiz 2026 ECCouncil 312-85: Reliable Certified Threat Intelligence Analyst Latest Questions

Many candidates find the ECCouncil exam preparation difficult. They often buy expensive study courses to start their ECCouncil 312-85 certification exam preparation. However, spending a huge amount on such resources is difficult for many Certified Threat Intelligence Analyst applicants. The Latest 312-85 Exam Dumps are the right option for you to prepare for the 312-85 certification test at home.

ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q24-Q29):

NEW QUESTION # 24

An analyst wants to disseminate the information effectively so that the consumers can acquire and benefit out of the intelligence. Which of the following criteria must an analyst consider in order to make the intelligence concise, to the point, accurate, and easily understandable and must consist of a right balance between tables, narrative, numbers, graphics, and multimedia?

- A. The right content
- B. The right order
- C. The right presentation
- D. The right time

Answer: C

NEW QUESTION # 25

Flora, a threat intelligence analyst at PanTech Cyber Solutions, is working on a threat intelligence program.
She is trying to collect the company's crucial information through online job sites.
Which of the following information will Flora obtain through job sites?

- A. Top-level domains and subdomains of the company
- B. Open ports and services
- C. Hardware and software information, network-related information, and technologies used by the company

Answer: C

Explanation:
When attackers or analysts search job postings on online job portals, they often uncover technical details inadvertently shared by organizations.
Job listings frequently mention:
* Hardware and software used (e.g., "experience with Cisco firewalls, Windows Server 2019").
* Network details and tools (e.g., "knowledge of LAN/WAN, AWS, Azure").
* Security technologies (e.g., "SIEM tools like Splunk or QRadar").
This information can help analysts identify the technological footprint of the company, which is valuable during threat profiling or reconnaissance.
Why the Other Options Are Incorrect:
* B. Top-level domains and subdomains: Obtained through DNS enumeration tools, not job sites.
* C. Open ports and services: Found through active scanning tools like Nmap, not via job postings.
Conclusion:
Flora can obtain hardware, software, and network-related information from online job listings.
Final Answer: A. Hardware and software information, network-related information, and technologies used by the company
Explanation Reference (Based on CTIA Study Concepts):
CTIA recognizes online job sites as OSINT sources that can reveal technical environment details about organizations.

NEW QUESTION # 26

In which of the following attacks does the attacker exploit vulnerabilities in a computer application before the software developer can release a patch for them?

- A. Zero-day attack
- B. Advanced persistent attack
- C. Distributed network attack
- D. Active online attack

Answer: A

NEW QUESTION # 27

Henry. a threat intelligence analyst at ABC Inc., is working on a threat intelligence program. He was assigned to work on establishing criteria for prioritization of intelligence needs and requirements.
Which of the following considerations must be employed by Henry to prioritize intelligence requirements?

- A. Produce actionable data
- B. Develop a collection plan
- C. Understand frequency and impact of a threat
- D. Understand data reliability

Answer: C

Explanation:
When prioritizing intelligence requirements, it is crucial to understand the frequency and impact of various threats. This approach helps in allocating resources effectively, focusing on threats that are both likely to occur and that would have significant consequences if they did. By assessing threats based on these criteria, Henry can ensure that the threat intelligence program addresses the most pressing and potentially damaging threats first, thereby enhancing the organization's security posture. This prioritization is essential for effective threat management and for ensuring that the most critical threats are addressed promptly.References:

NEW QUESTION # 28

Tim is working as an analyst in an ABC organization. His organization had been facing many challenges in converting the raw threat intelligence data into meaningful contextual information. After inspection, he found that it was due to noise obtained from misrepresentation of data from huge data collections. Hence, it is important to clean the data before performing data analysis using techniques such as data reduction. He needs to choose an appropriate threat intelligence framework that automatically performs data collection, filtering, and analysis for his organization.
Which of the following threat intelligence frameworks should he choose to perform such task?

- A. HighCharts
- B. SIGVERIF
- C. Threat grid
- D. TC complete

Answer: C

Explanation:
Threat Grid is a threat intelligence and analysis platform that offers advanced capabilities for automatic data collection, filtering, and analysis. It is designed to help organizations convert raw threat data into meaningful, actionable intelligence. By employing advanced analytics and machine learning, Threat Grid can reduce noise from large data sets, helping to eliminate misrepresentations and enhance the quality of the threat intelligence.
This makes it an ideal choice for Tim, who is looking to address the challenges of converting raw data into contextual information and managing the noise from massive data collections.
