However, due to the severe employment situation, more and more people have been crazy for passing the M2 exam by taking examinations, and our M2 exam questions can help you pass the M2 exam in the shortest time with a high score.

International Code Council Commercial Mechanical Inspector Sample Questions (Q33-Q38):

NEW QUESTION # 33

What is the minimum distance required between a combustion air opening at the exterior of a building and a lot line?

- A. 10 feet
- B. 8 feet
- C. 3 feet
- D. 2 feet

Answer: A

Explanation:

The ICC opening-location rule requires intake openings to be located not less than 10 feet from lot lines or buildings on the same lot. A combustion-air opening taken from the exterior follows that minimum separation rule, so 10 feet is the correct answer. Therefore, Option D is correct.

NEW QUESTION # 34

Given: single-wall vent, which serves only one appliance, and has a height of 10 feet.

The maximum horizontal length permitted for a 5-inch diameter vent connector serving this vent is _____ feet.

- A. 0
- B. 1
- C. 7.5
- D. 2

Answer: C

Explanation:

For a single-wall vent connector serving one appliance, the maximum horizontal length is determined from the vent connector sizing and length rules. For a 5-inch diameter connector with a 10-foot vent height, the permitted maximum horizontal length is 7.5 feet. Therefore, Option B is correct.

NEW QUESTION # 35

Given: Fabricated of type 430 stainless steel.

Optional type _____ stainless steel is available.

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

Based on the specification sheet shown in the exhibit, the hood is fabricated of Type 430 stainless steel, and the optional stainless steel listed is Type 304. Therefore, the correct answer is C.

NEW QUESTION # 36

What is the maximum distance allowed below the design flood elevation from which ventilation may be obtained?

- A. 0 inches
- B. 1 foot
- C. 2 feet
- D. 6 inches

Answer: B

Explanation:

This question appears to contain a wording issue. In ICC flood-related provisions tied to ventilation/flood openings, the governing limit is that the opening location is not more than 1 foot relative to the reference grade condition used for flood-opening compliance. That corresponds to 1 foot, so Option C is the best-supported answer.

NEW QUESTION # 37

Termination of vents for appliances listed for and installed outdoors that incorporate integral venting shall:

- A. terminate not less than 5 feet vertically above the highest connected appliance draft hood outlet or flue collar.
- B. terminate not less than 5 feet vertically above the lowest connected appliance draft hood outlet or flue collar.
- C. be installed in accordance with the design professional's plans as approved by the local building official.
- **D. be installed in accordance with their listings and the manufacturer's installation instructions.**

Answer: D

Explanation:

For appliances listed for outdoor installation and incorporating integral venting, the IMC requires them to be installed in accordance with their listings and the manufacturer's installation instructions. That matches Option C exactly.

NEW QUESTION # 38

.....

We can confidently say that Our M2 training quiz will help you. First of all, our company is constantly improving our products according to the needs of users. If you really want a learning product to help you, our M2 study materials are definitely your best choice, you can't find a product more perfect than it. Second, our M2 learning questions have really helped a lot of people. Looking at the experiences of these seniors, I believe that you will definitely be more determined to pass the M2 exam.
