GH-900 Valid Test Prep - New GH-900 Exam Labs

The Microsoft GH-900 Dumps PDF File material is printable, enabling your off-screen study. This format is portable and easily usable on smart devices including laptops, tablets, and smartphones. Microsoft GH-900 dumps team of professionals keeps an eye on content of the Microsoft GH-900 Exam and updates its product accordingly. Our pdf is a very handy format for casual and quick preparation of the Microsoft certification exam.

Microsoft GH-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Project Management: This section is designed for Project Coordinators and Product Managers and focuses on using GitHub Projects for project management. Candidates learn to create and manage GitHub Projects, utilize project boards for organizing tasks, and integrate project workflows with issues and pull requests to maintain project visibility and progress.
Topic 2	<ul style="list-style-type: none">• Benefits of the GitHub Community: This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects.
Topic 3	<ul style="list-style-type: none">• Collaboration Features: This section measures skills of Software Engineers and Team Leads and covers collaborative workflows using GitHub. It includes forking repositories, creating and managing pull requests, reviewing and merging code changes, and using GitHub Actions to support CI• CD pipelines. Candidates also explore project management features such as creating and managing issues, using labels, milestones, and project boards, and tracking progress through GitHub Projects.
Topic 4	<ul style="list-style-type: none">• Working with GitHub Repositories: This domain targets Repository Administrators and Content Managers, focusing on managing repository settings and permissions. Candidates learn to configure repositories, use templates, and effectively manage files by adding, editing, and deleting. The domain also addresses versioning of files and the use of GitHub Desktop for streamlined file management tasks within repositories.

Microsoft GitHub Foundations Sample Questions (Q51-Q56):

NEW QUESTION # 51

New open source contributors can receive funding from GitHub sponsors:

- A. Using PayPal as a payment processor.
- B. By including GitHub matching funds.
- C. After setting up a sponsored developer profile.
- D. Equal to 95% of the contribution value.

Answer: C

Explanation:

GitHub Sponsors allows developers and organizations to financially support open-source contributors directly on the GitHub platform.

Setting Up a Sponsored Developer Profile:

Option D is correct because before a contributor can receive funding through GitHub Sponsors, they need

NEW QUESTION # 52

What qualifier finds issues that mention a certain user?

- A. Smentioned:
- B. threads:
- C. mentions:
- D. mentioned:

Answer: C

Explanation:

The qualifier mentions: is used in GitHub's search functionality to find issues that mention a certain user. For example, if you want to find all issues where a specific user is mentioned, you would use mentions:username. This helps in tracking where a user has been involved in discussions across issues or pull requests.

NEW QUESTION # 53

Which of the following two-factor authentication (2FA) methods can you use to secure a GitHub account?

(Each answer presents a complete solution. Choose three.)

- A. Security questions
- B. Single sign-on
- C. GitHub mobile
- D. Security keys
- E. Authenticator app

Answer: C,D,E

Explanation:

The following two-factor authentication (2FA) methods can be used to secure a GitHub account:

A . Authenticator app: You can use an authenticator app (like Google Authenticator or Authy) to generate time-based one-time passwords (TOTP) for logging in.

C . GitHub mobile: The GitHub mobile app can also be used to receive 2FA codes, adding convenience for users who prefer to manage everything from their mobile devices.

D . Security keys: Physical security keys (such as YubiKeys) can be used as a strong form of 2FA, requiring physical access to the key to authenticate.

Security questions and Single sign-on (SSO) are not considered 2FA methods in the context of GitHub account security.

NEW QUESTION # 54

When using Organizations, GitHub Teams is better than GitHub Free because it offers:

- A. Advanced tools and insights in private repositories.
- B. Increased GitHub Actions minutes and additional GitHub Packages storage.
- C. Expanded storage and priority support.
- D. Authentication with SAML single sign-on and increased GitHub Actions minutes.

Answer: D

Explanation:

GitHub Teams, as part of GitHub's paid plans, offers additional features and capabilities compared to GitHub Free, particularly for organizations.

GitHub Teams Benefits:

Option B is correct because GitHub Teams provides advanced security features like SAML single sign-on for secure authentication, as well as increased minutes for running GitHub Actions, which are essential for continuous integration and deployment workflows.

Incorrect Options:

Option A is incorrect because private repositories and advanced tools are features available, but the key differentiator in this context is the SAML SSO and additional GitHub Actions minutes.

Option C is incorrect because while expanded storage and priority support are valuable, SAML SSO and increased GitHub Actions minutes are more central to the differences between GitHub Free and GitHub Teams.

Option D is partially correct, but since the question asks for the best reason, Option B provides the most critical features that differentiate GitHub Teams from GitHub Free.

GitHub Docs: About GitHub Teams

NEW QUESTION # 55

Which of the following are included as pre-defined repository roles?

(Each answer presents a complete solution. Choose three.)

- A. View
- **B. Write**
- C. Security
- **D. Maintain**
- E. Delete
- **F. Triage**

Answer: B,D,F

Explanation:

GitHub provides several pre-defined repository roles that determine the level of access and permissions a user has within a repository. The roles that are included by default are:

Triage: Allows users to manage issues and pull requests without write access to the code.

Maintain: Provides more extensive access, including managing settings, but without full administrative control.

Write: Grants permission to push changes and manage issues and pull requests.

Roles like "Security" and "Delete" are not standard pre-defined roles, and "View" is generally referred to as "Read" in GitHub's permission structure.

NEW QUESTION # 56

.....

However, you should keep in mind to pass the GitHub Foundations (GH-900) certification exam is not an easy task. It is a challenging job.
