Why the others are not correct:
* A. Document property is # This condition applies to information governance retention policies /labels (not DLP). Not available in DLP rules.
* B. Attachment's file extension is # This is supported in Exchange mail flow rules (transport rules) but not in advanced DLP rules.

*In a new country, open an office named Office1.
*Create a new user named User1.

NEW QUESTION # 204
You have a Microsoft 365 E5 subscription that contains three users named User1, User2, and User3 and a file named Filetdocx.
You create a sensitivity label named Label1 as shown in the following exhibit.

You apply Label1 to File1.
For which users can Microsoft 365 Copilot summarize File1?

- A. No user
- B. User1, User2, and User3
- C. User 1 only
- D. User1 and User2 only

Answer: A

Explanation:
The sensitivity label Label1 assigns permissions (User1 = Co-Author, User2 = Reviewer, User3 = Viewer) and enables Double Key Encryption (DKE). Microsoft 365 Copilot can summarize content only when the service can access the file using the user's permissions. Content protected with Double Key Encryption is not accessible to Microsoft cloud services (including Copilot); as a result, Copilot cannot open or process DKE- protected files for any user, even if they can open the file themselves in Office apps. Therefore, no user can use Microsoft 365 Copilot to summarize File1.
