Just take action to purchase we would be pleased to make you the next beneficiary of our CIS-SPM exam practice.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q72-Q77):

NEW QUESTION # 72

How many WBS levels can be shown on the planning console?

- A. No Limit.
- B. One.
- C. Two.
- D. Three.

Answer: A

Explanation:

According to the ServiceNow documentation¹, the planning console can show as many WBS levels as desired, starting from the level 1 to the lowest system components. The WBS levels can be expanded or collapsed by clicking the plus or minus icons next to the task names. The planning console also allows users to create, edit, and delete tasks, as well as add dependencies, assign resources, and track progress.

NEW QUESTION # 73

How can the latest financial forecasts (actuals or planned costs) be compared to initial planned costs month over month in the new Project Workspace?

- A. Using the Cost plan breakdown form
- B. Using the project Details page
- C. Using the Financials Cost page
- D. Using the Compare Baselines page

Answer: D

NEW QUESTION # 74

Where do you define 'Roles' requested via resource plans?

- A. No need to define it differently, they are same as system roles.
- **B. Resource roles under resource management.**
- C. Under skill management modules.
- D. Roles under system security.

Answer: B

Explanation:

According to the Assigning Resource Roles document, you define 'Roles' requested via resource plans under resource roles in the Resource Management application. Resource roles are the roles that users can request or allocate for resource plans. The other options are not correct, as they are not the places where you define 'Roles' requested via resource plans. The system roles are the roles that grant access to various applications and modules in the system. The roles under system security are the roles that control the security settings and permissions for the system. The skill management modules are the modules that manage the skills and skill levels of users and groups.

NEW QUESTION # 75

Which role can configure the parameters of the demand workbench that is provided with the base system?

- **A. it_pps_admin.**
- B. it_project_manager.
- C. business_stakeholder.
- D. All roles.

Answer: A

Explanation:

Explanation

According to the Demand Workbench document, the role that can configure the parameters of the demand workbench that is provided with the base system is it_pps_admin. This role grants access to the Project Portfolio Suite application and allows the user to configure the demand workbench settings, such as the axes, the quadrants, the bubble size, and the color. The other options are not correct, as they are not roles that can configure the parameters of the demand workbench. The all roles option is too broad and does not specify a particular role. The business_stakeholder role grants access to the Business Stakeholder Portal and allows the user to view and submit demands. The it_project_manager role grants access to the Project Portfolio Management application and allows the user to create and update projects.

NEW QUESTION # 76

If an it_project_manager does not want to equally distribute hours across the resource plan time frame, what allocation spread should be used?

- A. Front Load.
- B. Back Load.
- **C. Any.**
- D. Even.

Answer: C

Explanation:

Explanation

If an it_project_manager does not want to equally distribute hours across the resource plan time frame, the allocation spread should be set to Any. This option allows the it_project_manager to manually enter the hours for each month or quarter in the resource plan. The other options (Even, Back Load, and Front Load) automatically distribute the hours evenly, from the end, or from the start of the time frame, respectively. You can find more information about the allocation spread in the Product Documentation for ServiceNow.

NEW QUESTION # 77
