Pass Guaranteed SAP - Authoritative C_TS462_2023 - Exam SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Sales Quick Prep

The language which is easy to be understood and simple, C_TS462_2023 exam questions are suitable for any learners no matter he or she is a student or the person who have worked for many years with profound experiences. So it is convenient for the learners to master the C_TS462_2023 Guide Torrent and pass the exam in a short time. The amount of the examinee is large. For the office workers, they are both busy in their job and their family life; for the students, they possibly have to learn or do other things.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Sales Sample Questions (Q30-Q35):

NEW QUESTION # 30

What are the characteristics of the process where new fields are copied from a customer master record to a sales document in SAP S/4HANA?

Note: There are 2 correct answers to this question.

- A. Fields are copied from the customer master tables directly to the sales order tables using Application Link Enabling (ALE) settings.
- B. Fields are copied from the customer master tables to the sold-to party, ship-to party, bill-to party or payer views using a user exit.
- C. Fields are copied from the customer master tables to the sales order tables using the condition technique.
- D. Fields are moved from the sold-to party, ship-to party, bill-to party or payer views to the sales order tables using a user exit.

Answer: B,D

Explanation:

In SAP S/4HANA, when new fields are copied from a customer master record to a sales document, the characteristics of this process include:

A . Fields are moved from the sold-to party, ship-to party, bill-to party, or payer views to the sales order tables using a user exit: User exits allow for the customization of standard SAP behavior without modifying the core code. This method can be used to copy additional fields from customer master data to sales documents, providing flexibility to meet specific business requirements.

B . Fields are copied from the customer master tables to the sold-to party, ship-to party, bill-to party, or payer views using a user exit: Similar to option A, this process involves using user exits to extend the standard SAP functionality. The fields can be copied to these partner function views within the sales document, enriching the document with additional data from the customer master.

Option C, involving the condition technique, is typically used for determining pricing conditions, not for copying fields from the customer master to sales documents. Option D, mentioning ALE settings, is not a standard approach for directly copying fields from customer master records to sales documents; ALE is more commonly used for integrating data across different systems.

NEW QUESTION # 31

Your company uses various strategies to supply your customers with goods and/or services. Which organizational structure element can be used to model these strategies?

- A. Distribution channel
- B. Sales office
- C. Shipping point
- D. Sales organization

Answer: A

Explanation:

The organizational structure element used to model various strategies for supplying customers is:

B . Distribution channel: This element defines the path through which goods and services flow from the company to the customer and can be used to model different distribution strategies.

NEW QUESTION # 32

When a user creates a sales order with reference to a quotation, a header text must be automatically copied from the sold-to party if it cannot be found in the quotation. If it is copied from the sold-to party, it must be in the sold-to party language. What must you do?

Note: There are 3 correct answers to this question.

- **A. Include the text type with an appropriate access sequence in the text determination procedure.**
- B. In the access sequence, set the partner function language for this text to "sold-to party".
- **C. Assign the text determination procedure to the sales document type.**
- **D. Assign an appropriate text type to the sales document type.**
- E. Ensure that the access sequence reads the sold-to party text first.

Answer: A,C,D

Explanation:

To ensure that a header text is automatically copied from the sold-to party to a sales order when it's not found in the quotation, and that it's in the sold-to party's language, you should:

A . Assign an appropriate text type to the sales document type: This ensures that the text field is available and can be populated in the sales document.

D . Include the text type with an appropriate access sequence in the text determination procedure: The access sequence specifies where the system looks for the text, starting with the quotation and then moving to the sold-to party if the text is not found in the quotation.

E . Assign the text determination procedure to the sales document type: This links the text determination rules, including the access sequence and text types, to the specific sales document type being used, ensuring that the text copying behavior is applied whenever a sales order of this type is created.

NEW QUESTION # 33

What are some of the prerequisites for the creation of a credit memo based on a credit memo request?

Note: There are 2 correct answers to this question.

- A. Copying control must exist between the sales document and the billing document.
- **B. The Billing Block field in the credit memo request must be empty.**
- **C. An appropriate reason for rejection must be assigned to the original sales order item.**
- D. The billing document of the original customer invoice must be cancelled.

Answer: B,C

Explanation:

Sales Process and Analytics

NEW QUESTION # 34

When performing backorder processing, which confirmation strategies can you select? Note: There are 3 correct answers to this question.

- **A. Gain**
- B. Drop
- C. Obtain
- **D. Redistribute**
- **E. Fill**

Answer: A,D,E
