## Valid C-ACDET-2506 New Braindumps Pdf & Passing C-ACDET-2506 Exam is No More a Challenging Task

The SAP wants to win the trust of SAP C-ACDET-2506 exam candidates at any cost. To do this the SAP is offering some important features with SAP C-ACDET-2506 exam. These C-ACDET-2506 Exam Questions features are valid, updated, and real

## SAP C-ACDET-2506 Exam Syllabus Topics:

| Topic   | Details   |
|---------|---|
| Topic 1 | <ul style="list-style-type: none"><li>Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.</li></ul>                         |
| Topic 2 | <ul style="list-style-type: none"><li>Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.</li></ul> |
| Topic 3 | <ul style="list-style-type: none"><li>Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.</li></ul>  |

## SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q18-Q23):

### NEW QUESTION # 18

In a Greenfield deployment scenario, how should translation migrations be performed for header field labels, help tips, and validity condition error messages?

- A. User with Partner Administrator can configure translation.
- B. Translations are included in migrations and are listed as AMLStringResource in the migration UI.
- C. Create a package to migrate translations by ICM.
- D. Contact an SAP Deployment lead for customization help.

**Answer: B**

Explanation:

In Greenfield deployments, translations for custom field labels, help tips, and validation/error messages are migrated as part of the configuration migration package and are represented in the migration UI as AMLStringResource entries. This structured approach ensures all language-specific content is consistently moved alongside configuration settings.

While administrators and deployment leads may support translation tasks, the migration of translation strings is managed automatically via this AML-based mechanism, not through manual reconfiguration or separate ICM packages.

This ensures a seamless multilingual user experience immediately upon go-live without requiring additional manual translation imports.

### NEW QUESTION # 19

A customer has requested that a Contracts field be added to an export event. After creating the field, assigning the appropriate check box in the advanced section, and publishing, this field still cannot be found in the export.

What can be done to rectify this? Note: There are 2 correct answers to this question.

- A. A custom visibility expression needs to be added stating isVisibleInExport == true.
- B. The data definition needs to be refreshed.
- C. Custom fields cannot be added to import/exports.

- D. The field must be accepted and published in the data definition.

**Answer: B,D**

#### NEW QUESTION # 20

Which of the following accurately describes the migration of flex master data templates using the migration tool?

- A. Only the data of the flex master data templates is migrated; templates must be created manually.
- B. Neither the templates nor the data is migrated using the tool
- C. The templates are migrated by the tool, but the data must be loaded manually later.
- D. Both the templates and their data are fully migrated by the tool.

**Answer: C**

#### NEW QUESTION # 21

How can you create a field label with Italics?

- A. Formatting of a field label is not possible
- B. By selecting the option "Italic label"
- C. By marking the text in the field and selecting Ctrl-I
- D. By using standard HTML formatting like `<i>label</i>` can be added to the field label
- E. Find the correct folder

**Answer: D**

Explanation:

In SAP Ariba, field labels themselves do not support rich text formatting directly in the UI, meaning you cannot use Ctrl-I or a specific "Italic label" toggle to style the label. However, SAP allows the use of basic HTML tags, including `<i>` for italics, in help tip text or validation/error message text associated with fields. By embedding HTML tags like `<i>...</i>`, administrators can add italicized text in these auxiliary field descriptions, enhancing clarity and user guidance.

This is because SAP Ariba's UI rendering engine processes simple HTML in certain field-related text areas but treats field labels as plain text for consistency and localization reasons.

Therefore, the correct method for italicizing field-related text is using HTML tags in Help Tips or validation messages, not in the label itself.

This behavior is documented in SAP Ariba configuration best practices, emphasizing limited HTML support to maintain UI integrity and accessibility standards.

#### NEW QUESTION # 22

How can you create a field label with italics?

- A. By marking the text in the field and select Ctrl-I
- B. By using standard HTML formatting like `label` can be added to the field label
- C. Formatting of a field label is not possible
- D. By selecting the option "Italic label"

**Answer: B**

#### NEW QUESTION # 23

.....

SAP C-ACDET-2506 So as you see, we are the corporation with ethical code and willing to build mutual trust between our customers, Latest C-ACDET-2506 dumps exam training resources in PDF format download free try from SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite is the name of SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite exam dumps which covers all the knowledge points of the real SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite exam, SAP C-ACDET-2506 We will try our best to help our customers get the latest information about study materials. The size of the problem really is unknown, C-ACDET-2506 revisited that tricky question: is something something

worth it, But enough about this horrible dystopian future, C-ACDET-2506 Exam Preparation Platform are attracting a lot of attention these days.
