Salesforce Analytics-DA-201 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">SAP Clean Core Extensibility and ABAP Cloud: This part of the exam targets the SAP S/4HANA Technical Consultant and covers concepts of clean core extensibility using ABAP in the cloud. The focus is on in-app and side-by-side extensibility techniques, ensuring that custom code complies with cloud-readiness principles and does not compromise the upgrade stability of core systems.
Topic 2	<ul style="list-style-type: none">ABAP Core Data Services and Data Modeling: This section of the exam measures the skills of the SAP ABAP Cloud Developer and covers the fundamental understanding of core data services (CDS) and how to design data models in the SAP ABAP environment. Candidates are expected to know how to define, consume, and optimize CDS views effectively to support application development in the cloud.
Topic 3	<ul style="list-style-type: none">ABAP SQL and Code Pushdown: This section of the exam measures the competencies of the SAP ABAP Cloud Developer related to performance optimization through ABAP SQL and code pushdown techniques. It ensures that the developer understands how to shift logic to the database layer using efficient SQL scripting to enhance performance in data-intensive applications.

Topic 4	<ul style="list-style-type: none"> • Object-Oriented Design: This section of the exam evaluates the SAP ABAP Cloud Developer's understanding of object-oriented principles in the ABAP context. It focuses on class-based programming, inheritance, interfaces, and polymorphism, all crucial for building modular and maintainable ABAP cloud applications.

Salesforce Analytics-DA-201 Exam Questions | Latest Analytics-DA-201 Guide Files

Up to now our Analytics-DA-201 real exam materials become the bible of practice material of this industry. Ten years have gone, and three versions have been made for your reference. They made the biggest contribution to the efficiency and quality of our Salesforce Certified Tableau Data Analyst practice materials, and they were popularizing the ideal of passing the exam easily and effectively. All Analytics-DA-201 Guide prep is the successful outcomes of professional team

Salesforce Certified Tableau Data Analyst Sample Questions (Q135-Q140):

NEW QUESTION # 135

You have the following Map.

You need the map to appear as shown in the following visualization.

What should you do?

- A. Drag Location to Size on the Marks card.
- B. Change the mark type to Map.
- C. Change the opacity to 75%.
- D. Drag Population to Size on the Marks card.
- E. **Change the mark type to Density.**

Answer: E

Explanation:

To create a map visualization that shows the concentration of data points in different locations, you need to change the mark type to Density. This will create a heatmap that uses color and size to indicate the density of the data points. You can also adjust the intensity and transparency of the density marks to suit your needs. References: The information is based on the following sources:

* Create Heatmaps that Show Trends or Density in Tableau

* Build a Simple Map - Tableau

NEW QUESTION # 136

You want to create the following table in a view.

□ Which function should you use to create the Position column?

- A. RANK
- B. **FIRST**
- C. INDKX
- D. LAST

Answer: B

Explanation:

To create the Position column, you should use the FIRST () function. The FIRST () function returns the number of rows from the current row to the first row in the partition. For example, the first row in a partition will return 0, the second row will return -1, and so on. In this question, the partition is defined by the Segment field, and the table is sorted by the Sales field in descending order. Therefore, the Position column shows the offset of each row from the first row in each segment, based on the sales ranking.

* Tableau Certified Data Analyst Exam Prep Guide, page 11, section "Creating Calculated Fields"

* Tableau Help: FIRST Function

NEW QUESTION # 137

You have the following chart that shows the cumulative of sales from various dates.

- You want the months to appear as shown in the following chart.
- What should you do?

- A. Convert the date to Attribute
- B. Convert the date to Exact Date
- C. Select Show Missing Values for the date
- D. **Convert the date to Continuous**

Answer: D

Explanation:

References: <https://help.tableau.com/current/pro/desktop/en-us/dates.htm> https://help.tableau.com/current/pro/desktop/en-us/dates_continuous.htm <https://help.tableau.com/current/pro/desktop/en-us/formatting.htm> To ensure the dates are shown in a continuous axis, you should convert the date to a continuous field. This will display the months in a sequence without any breaks, which is needed for showing a trend over time like the cumulative sum of sales.

NEW QUESTION # 138

You have a dashboard that contains a parameter named Start Date.

You need to create an extract from a Microsoft Excel file. The extract must be filtered based on Start Date.

What should you do?

- A. Create a custom SQL query to define the data source and create a calculated field based on Start Date.
Add the calculated field to the extract filter.
- B. **Create a data source based on the Excel worksheet and create a calculated field based on Start Date.**
Add the calculated field to the extract filter.
- C. Create a data source based on the Excel worksheet and create a calculated field based on Start Date.
From the Data pane, add the calculated field to the data source filter
- D. Create a custom SQL query that references Start Date in the WHERE clause.

Answer: B

NEW QUESTION # 139

You want to add a draft watermark to a dashboard as shown in the following exhibit.

Which type of object should you use?

- A. **Image**
- B. Horizontal
- C. Web page
- D. Sheet

Answer: A

Explanation:

References: <https://help.tableau.com/current/pro/desktop/en-us/dashboards.htm> https://help.tableau.com/current/pro/desktop/en-us/dashboards_create_layouts.htm https://help.tableau.com/current/pro/desktop/en-us/dashboards_create_watermarks.htm

To add a draft watermark to a Tableau dashboard, you would use an image object. You can overlay this image across your dashboard, possibly with some transparency, to achieve the watermark effect without interfering with the readability of the dashboard content.

NEW QUESTION # 140

.....

Once you learn all Analytics-DA-201 questions and answers in the study guide, try TestSimulate's innovative testing engine for exam

like Analytics-DA-201 practice tests. These tests are made on the pattern of the Analytics-DA-201 real exam and thus remain helpful not only for the purpose of revision but also to know the real exam scenario. To ensure excellent score in the exam, Analytics-DA-201 Braindumps are the real feast for all exam candidates. They contain questions and answers on all the core points of your exam syllabus.
