Inspection alone cannot adequately manage risk for equipment:

- A. frequency dominated risk.
- B. that has cracking mechanisms.
- C. that is nearing end of service life.
- D. with high probability of failure.

答案: C

解題說明:

API 580, Section 5.6.4 outlines situations where "inspection may not be sufficient to manage risks," stating:

"Examples where inspection may not be sufficient... are: a) equipment nearing end of service life." In such scenarios, additional mitigation such as equipment replacement or redesign is often necessary to reduce risk to acceptable levels.
