## Fantastic 350-701 Training Materials & Guaranteed Cisco 350-701 Exam Success with Professional VCE 350-701 Dumps

Our 350-701 practice engine is admired by all our customers for our experts' familiarity and dedication with the industry all these years. By their help, you can qualify yourself with high-quality 350-701 exam materials. Our experts pass onto the exam candidate their know-how of coping with the exam by our 350-701 Training Questions. And i can say that our 350-701 study guide is the unique on the market for its high-effective.

## Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q603-Q608):

### NEW QUESTION # 603

Which Cisco solution integrates Encrypted Traffic Analytics to perform enhanced visibility, promote compliance, shorten response times, and provide administrators with the information needed to provide educated and automated decisions to secure the environment?

- A. Cisco DNA Center
- B. Cisco SDN
- C. Cisco ISE
- D. **Cisco Security Compliance Solution**

**Answer: D**

### NEW QUESTION # 604

Which solution combines Cisco IOS and IOS XE components to enable administrators to recognize applications, collect and send network metrics to Cisco Prime and other third-party management tools, and prioritize application traffic?

- A. Cisco Security Intelligence
- B. Cisco Model Driven Telemetry
- C. Cisco DNA Center

- D. Cisco Application Visibility and Control

**Answer: D**

Explanation:

Explanation:

The Cisco Application Visibility and Control (AVC) solution leverages multiple technologies to recognize, analyze, and control over 1000 applications, including voice and video, email, file sharing, gaming, peer-to-peer (P2P), and cloud-based applications. AVC combines several Cisco IOS/IOS XE components, as well as communicating with external tools, to integrate the following functions into a powerful solution...

#### NEW QUESTION # 605

Drag and drop the suspicious patterns for the Cisco Tetration platform from the left onto the correct definitions on the right.

**Answer:**

Explanation:

#### NEW QUESTION # 606

Which two prevention techniques are used to mitigate SQL injection attacks? (Choose two)

- A. Write SQL code instead of using object-relational mapping libraries.
- B. Check integer, float, or Boolean string parameters to ensure accurate values.
- C. Use prepared statements and parameterized queries.
- D. Secure the connection between the web and the app tier.
- E. Block SQL code execution in the web application database login.

**Answer: C,E**

Explanation:

SQL injection attacks are a type of code injection technique that exploit the use of dynamic SQL queries in web applications. Attackers can inject malicious SQL statements into user input fields, such as login forms, search boxes, or URLs, and execute them on the underlying database. This can result in unauthorized access, data theft, data corruption, or denial of service.

To prevent SQL injection attacks, web developers should use the following techniques:

\* Use prepared statements and parameterized queries: Prepared statements are SQL queries that are precompiled and executed with user-supplied parameters. Parameterized queries are SQL queries that use placeholders for user input and bind them to actual values at runtime. Both techniques separate the SQL code from the user input, making it impossible for attackers to inject SQL commands into the query. For example, in Java, PreparedStatement is a class that implements parameterized queries. In PHP, PDO and mysqli are extensions that support prepared statements.

\* Block SQL code execution in the web application database login: Web applications should use a dedicated database user account with limited privileges to connect to the database. This account should only have the permissions necessary to perform the required operations, such as select, insert, update, or delete. It should not have the permissions to execute arbitrary SQL commands, such as create, drop, alter, grant, or revoke. This way, even if an attacker manages to inject SQL code into the query, the database will reject it due to insufficient privileges.
