You can change the difficulty of these questions, which will help you determine what areas appertain to more study before taking your EMC D-PE-OE-01 Exam Dumps. Here we listed some of the most important benefits you can get from using our EMC D-PE-OE-01 practice questions.

EMC Dell PowerEdge Operate v2 Exam Sample Questions (Q343-Q348):

NEW QUESTION # 343

What is the purpose of the ePSA on a Dell EMC PowerEdge server?

- A. System diagnostics while the operating system is running
- **B. System diagnostics before starting the operating system**
- C. External PowerEdge support assist
- D. Centralized PowerEdge support assist

Answer: B

NEW QUESTION # 344

A system engineer tried to remotely update the firmware of the PSUs on a PowerEdge 15G server, but the update failed.

An error message is received:

- PSU0006: Power supply X is incorrectly configured

What is the reason for the failure?

- A. The firmware is incompatible.
- **B. A mixed PSU configuration exists.**
- C. PSUs are connected to different voltages.
- D. The server has only one PSU.

Answer: B

NEW QUESTION # 345

What are key characteristics of SupportAssist Enterprise on Dell EMC PowerEdge 14G servers?

- A. Automated, Steady state, Predictive
- B. System generated, Proactive, Predictive
- C. Manual intervention, Steady state, Remediation
- **D. Automated, Proactive, Predictive**

Answer: D

NEW QUESTION # 346

SIMULATION

A customer has relocated one of their Dell PowerEdge platform servers from their main data center to a remote edge location, which uses a different network segment.

□ Reconfigure the iDRAC network settings with the following information: . IP Address (CIDR): 192.168.0.120 (/24) . Gateway: 192.168.0.1 . DNS Server 1: 10.10.0.1 . DNS Server 2: 10.10.0.2

Answer:

Explanation:

Answer in Explanation

Explanation:

To reconfigure the iDRAC network settings with a new IP address, gateway, and DNS servers, follow these steps in the iDRAC interface:

Step-by-Step Guide:

Access iDRAC Network Settings:

Log into the iDRAC interface.

Go to the iDRAC Settings tab in the top menu.

Select Network from the dropdown options. This will open the network configuration page.

Change IP Address and Subnet Mask:

In the Network settings, locate the section for IPv4 Settings.

Set the IP Address to 192.168.0.120.

For the Subnet Mask, since it's a /24 CIDR, set it to 255.255.255.0.

Configure the Gateway:

In the same section, find the field for Default Gateway.

Enter the Gateway as 192.168.0.1.

Update DNS Server Information:

Scroll down to the DNS Server settings.

Enter DNS Server 1 as 10.10.0.1.

Enter DNS Server 2 as 10.10.0.2.

Apply the Settings:

After entering all the new network information, click on Apply or Save to confirm the changes. The iDRAC interface may prompt for a restart to apply network changes.

Follow any prompts as needed.

Verify the Configuration:

After applying the changes, check that the iDRAC is accessible at the new IP address 192.168.0.120. Confirm that the gateway and DNS settings are properly configured by testing connectivity or accessing the iDRAC from a device within the same network segment.

By completing these steps, you will have reconfigured the iDRAC network settings for the new network segment, allowing remote management of the Dell PowerEdge server at the edge location.

NEW QUESTION # 347

A technician is on-site to update firmware on a server for which the iDRAC is not configured. In addition, the technician does not have access to the OS.

However, the site does have DHCP available on the production network as well as on an available workstation. The technician has access to the rack-mounted KVM.

How should the technician update the firmware on the server?

- A. Log in via telnet through a serial cable and configure the workstation as a proxy, then download the firmware
- B. Reboot the server, select F2, configure the network, and run Firmware Update
- C. Log in via SSH through a serial cable and configure the workstation as a proxy, then download the firmware
- **D. Reboot the server, select F10, configure the network, and run Firmware Update**

Answer: D

NEW QUESTION # 348

.....

If you want to get a higher position in your company, you must do an excellent work. Then your ability is the key to stand out.

Perhaps our D-PE-OE-01 study materials can help you get the desirable position. At present, many office workers are willing to choose our D-PE-OE-01 study materials to improve their ability. So you can also join them and learn our study materials. You will gradually find your positive changes after a period of practices. Then you will finish all your tasks excellently. You will become the lucky guys if there has a chance. Our D-PE-OE-01 Study Materials are waiting for you to have a try.
