## ISO-IEC-27001-Foundation Valid Exam Guide & ISO-IEC-27001-Foundation Original Questions

Only if you download our software and practice no more than 30 hours will you attend your test confidently. Because our ISO-IEC-27001-Foundation exam torrent can simulate limited-timed examination and online error correcting, it just takes less time and energy for you to prepare the ISO-IEC-27001-Foundation exam than other study materials. It is very economical that you just spend 20 or 30 hours then you have the ISO-IEC-27001-Foundation certificate in your hand, which is typically beneficial for your career in the future. Therefore, purchasing the ISO-IEC-27001-Foundation guide torrent is the best and wisest choice for you to prepare your test.

### APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q47-Q52):

#### NEW QUESTION # 47

Which aspect of ISO/IEC 27001 requires that contractors know about the organization's information security policies?

- A. Communication
- B. Nonconformity and corrective action
- **C. Awareness**
- D. Competence

**Answer: C**

Explanation:

Clause 7.3 (Awareness) requires:

"Persons doing work under the organization's control shall be aware of: (a) the information security policy; (b) their contribution to the effectiveness of the ISMS, including the benefits of improved information security performance; (c) the implications of not conforming with the ISMS requirements." This applies not only to employees but also contractors and external parties under the organization's control.

Competence (B) requires having skills, training, and experience, while Communication (C) covers defining communication processes (Clause 7.4). Nonconformity and corrective action (A) is part of Clause 10 (Improvement).

Therefore, the specific requirement that ensures contractors are made aware of the information security policies is found in Clause 7.3 Awareness. Correct answer: D.

#### NEW QUESTION # 48

Which attribute is NOT a required focus of continual ISMS improvement?

- A. Suitability
- B. Effectiveness
- C. Adequacy
- **D. Importance**

**Answer: D**

Explanation:

Clause 10.2 (Continual Improvement) specifies that the organization must "continually improve the suitability, adequacy and effectiveness of the information security management system." This makes it clear that three attributes are explicitly required to be addressed:

\* Suitability: ensuring the ISMS continues to meet organizational needs in changing contexts.

\* Adequacy: ensuring the ISMS covers the necessary scope and provides sufficient control coverage.

\* Effectiveness: ensuring the ISMS achieves intended outcomes in protecting information security.

The word "importance" is not part of the continual improvement requirement. Importance is implicit in prioritization of risks and actions, but it is not a required continual improvement attribute in ISO/IEC 27001.

Therefore, option D: Importance is the correct choice as it is not specified.

This distinction reinforces that continual improvement is not about subjective importance, but about systematic enhancement of the ISMS's suitability, adequacy, and effectiveness.

#### NEW QUESTION # 49

What international standard provides guidance on the integration of ISO/IEC 27001 and the IT Service Management standard?

- A. None of the above
- B. ISO/IEC 20000-1
- C. ISO/IEC 27013
- D. ISO/IEC 27002

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27013 standards:

ISO/IEC 27013 is titled:

"Information technology - Security techniques - Guidance on the integrated implementation of ISO/IEC 27001 and ISO/IEC 20000-1."

This standard provides organizations with specific advice on how to integrate an Information Security Management System (ISMS) with an IT Service Management System (ITSMS). ISO/IEC 20000-1 is the IT Service Management requirements standard, but integration guidance is provided in 27013. ISO/IEC 27002 (A) is guidance for controls, not integration. Option D is incorrect since ISO/IEC 27013 explicitly exists for this purpose.

Therefore, the correct verified answer is B: ISO/IEC 27013.

#### NEW QUESTION # 50

Which statement describes a purpose of monitoring, measurement, analysis and evaluation according to ISO/IEC 27001?

- A. To track the use of outsourced processes
- B. To ensure that employees and contractors are competent
- C. To monitor the use of information assets
- D. To evaluate information security performance

**Answer: D**

Explanation:

Clause 9.1 requires:

"The organization shall evaluate the information security performance and the effectiveness of the information security management system." This is the central purpose of monitoring, measurement, analysis, and evaluation. Competence (B) is covered under Clause 7.2. Monitoring use of assets (C) and outsourced processes (D) may be done, but they are not the formal purpose described in the standard. Instead, performance evaluation ensures the ISMS continues to meet intended outcomes and supports continual improvement.

Thus, the verified purpose is A: To evaluate information security performance.

#### NEW QUESTION # 51

When are the information security policies required to be reviewed, according to the Policies for information security control?

- A. Every six months
- B. At planned intervals and if significant changes occur
- C. Annually
- D. According to a schedule defined by the Certification Body

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.1 (Policies for information security) specifies:

"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to
