Up to now, more than 98 percent of buyers of our PEGACPRSA22V1 practice braindumps have passed it successfully. And our PEGACPRSA22V1 training materials can be classified into three versions: the PDF, the software and the app version. Though the content is the same, but the displays are different due to the different study habits of our customers. So we give emphasis on your goals, and higher quality of our PEGACPRSA22V1 Actual Exam.

Are you still distressed that you are young learner of PEGACPRSA22V1 exam prep? From now on, TestPDF will solve all your worries about the PEGACPRSA22V1 test. The textbooks of PEGACPRSA22V1 test questions contain different perspective materials. Even if you are young learners, you can master PEGACPRSA22V1 Test Questions easily. Having it, you will have the key to pass PEGACPRSA22V1 exam and will have unprecedented confidence. So what are you waiting for?

New PEGACPRSA22V1 Test Voucher | Valid Braindumps PEGACPRSA22V1 Free

High quality practice materials like our Pegasystems PEGACPRSA22V1 learning dumps exert influential effects which are obvious and everlasting during your preparation. The high quality product like our Certified Pega Robotics System Architect 22 PEGACPRSA22V1 Real Exam has no need to advertise everywhere, the exam candidates are the best living and breathing ads.

The PEGACPRSA22V1 exam is a multiple-choice test, and candidates are given 90 minutes to complete it. The passing score for PEGACPRSA22V1 exam is 65%, and it is recommended that candidates have at least six months of experience working with Pega's RPA tools before attempting the exam.

Pegasystems PEGACPRSA22V1: Certified Pega Robotics System Architect 22 exam is the certification exam for individuals who want to become Certified Pega Robotics System Architects. Certified Pega Robotics System Architect 22 certification exam will test a candidate's knowledge, skills, and abilities in the use of Pega Robotics System Architect to design and develop intelligent automation solutions.

Pegasystems PEGACPRSA22V1 (Certified Pega Robotics System Architect 22) Exam is a certification exam designed for IT professionals who are interested in developing their skills and knowledge in Pega Robotics. Pega Robotics is a field that is rapidly growing in popularity, and this certification is an excellent way for professionals to validate their proficiency in this area. PEGACPRSA22V1 exam covers a wide range of topics, including Pega Robotics Studio, automation design, debugging and

deployment, and advanced robotics concepts.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q100-Q105):

NEW QUESTION # 100

Automation you are working on creates a data collection, so you have extracted a Data Table proxy. What action occurs when you drag the DataTableProxy from the Globals section of the Palette to the automation surface?

- A. A proxy design block is added to the automation surface.
- B. A This property is added to the automation surface.
- C. A GetTable method is added to the automation surface.
- **D. A Select Action dialog box opens.**
- E. A Quick Add dialog box opens.

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

In Pega Robot Studio, the DataTableProxy component acts as an intermediary between automations and a Data Table, allowing the automation to read, manipulate, and update tabular data stored in the project.

When you drag an element such as a DataTableProxy from the Globals section of the Palette onto the automation design surface, Pega Robot Studio presents the user with available actions (methods, properties, or events) that can be executed using that component. This is done through a Select Action dialog box, which lists all available methods associated with the DataTableProxy (e.g., GetTable, AddRow, RemoveRow, Find, Update, etc.).

From the Pega Robotics System Design and Implementation Guide (Data Table Proxy and Data Handling section):

"When a component such as a DataTableProxy or connector object is dragged from the Palette onto the automation design surface, the system opens the Select Action dialog box.

This dialog lists all available methods and properties of the selected object, allowing the developer to select the action to instantiate on the automation surface.

The dialog ensures developers can directly add the desired operation (such as GetTable or UpdateRow) without manually searching through the object's members." Detailed Reasoning:

* The DataTableProxy represents a data-handling object; it does not directly add a "property" or "method" by default when dragged.

* Instead, Robot Studio prompts you with a Select Action dialog box, allowing you to choose which specific method (like GetTable, FindRow, or AddRow) you want to include in your automation.

* After the selection is made, the chosen method (for example, GetTable) is then displayed on the automation surface.

Option Analysis:

- * A. Incorrect - A property is not automatically added; you must choose an action first.
- * B. Incorrect - The Quick Add dialog is used for linking variables and not for proxy components.
- * C. Incorrect - A "proxy design block" is not automatically added without specifying a method.
- * D. Correct - The Select Action dialog box opens to let you choose the method or property to add.
- * E. Incorrect - GetTable may be one of the options available, but it is not added automatically.

Hence, the correct answer is D - dragging a DataTableProxy from the Globals section triggers the Select Action dialog box to open, allowing the developer to choose which action to use.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, DataTableProxy Configuration and Action Selection section (Pega Robotics 19.1 and later).

NEW QUESTION # 101

The business requirement states the solution should update and save the address to all applicable applications in the solution. The interaction configuration file is already configured with the SaveAddress activity. You are now ready to add an Activity component to a project using standard naming conventions.

Which option meets the requirement for configuring the Activity component?

□

- A. Exhibit B
- **B. Exhibit A**
- C. Exhibit D
- D. Exhibit C

Answer: B

NEW QUESTION # 102

During project testing, an issue requires you to add a diagnostic log component to track the log files to help determine a resolution. After testing, you decide not to remove the diagnostic log component from the automation and decide to simply turn off the log component.

Which diagnostic log component setting allows you to turn the logging component off temporarily?

- **A. Setting the Mode to Off**
- B. Setting Type to Off
- C. Setting the Category to Off

Answer: A

Explanation:

NEW QUESTION # 103

A solution design document outlines several projects for the solution. You are assigned to the Loan Servicing project (LoanSvcPrj). The project uses the Interaction Framework function to communicate with the other projects.

Which three toolbox project items do you add to LoanSvcPrj? (Choose three.)

- **A. String Variable**
- B. Interaction Manager
- **C. Activity**
- D. Message Manifest
- **E. Interaction.xml**

Answer: A,C,E

NEW QUESTION # 104

You are debugging a script component for your project. When the automation executes your script, the intended result does not occur. You suspect that one or more variables within your script are not being set to the proper value. Your version of Pega Robot Studio does not support the use of breakpoints within the script designer.

In what two ways can you debug the script? (Choose two.)

- A. Add a breakpoint before calling the script so that you can assign a watch for the variable(s) used within the script.
- **B. Check with the Support team to upgrade Robotic Automation Studio to the version which contains script debugging.**
- **C. Enable Runtime logging and enter a diagnostic message to log the variable values during script execution.**
- D. Modify the script so that the variable values are returned in the automation.

Answer: B,C

NEW QUESTION # 105

.....

Our web-based practice exam software is an online version of the PEGACPRSA22V1 practice test. It is also quite useful for instances when you have internet access and spare time for study. To study and pass the certification exam on the first attempt, our web-based Pegasystems PEGACPRSA22V1 Practice Test software is your best option. You will go through Certified Pega Robotics System Architect 22 mock exams and will see for yourself the difference in your preparation.
