

# 100% Pass 2026 NS0-528: Implementation Engineer - Data Protection Exam—Professional New Exam Name

What's more, part of that ITexamReview NS0-528 dumps now are free: <https://drive.google.com/open?id=1bBa5UGFBueAj0QtSFXXM1cMdJkqYtPqi>

Compared with other education platform on the market, ITexamReview is more reliable and highly efficiently. It provide candidates who want to pass the NS0-528 exam with high pass rate study materials, all customers have passed the exam in their first attempt. They all need 20-30 hours to learn on our website can pass the exam. NS0-528 Exam Dump is really a high efficiently exam tool that can help you save much time and energy to do other things.

## Network Appliance NS0-528 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>NetApp ONTAP Business Continuity Solutions: This section of the exam measures the skills of Disaster Recovery Specialists and covers advanced business continuity technologies. This includes the configuration and operation of SnapMirror active sync for continuous data replication and the execution of SVM-DR (Storage Virtual Machine Disaster Recovery) operations to ensure high availability.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>NetApp Data Protection Software: This section of the exam measures the skills of DevOps Engineers and focuses on the deployment and administration of NetApp's proprietary data protection software. A key part of this domain involves applying these solutions to protect modern containerized applications running in Kubernetes environments.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Data Protection Solutions: This section of the exam measures the skills of Storage Architects and covers the foundational principles of designing data protection solutions. It focuses on creating comprehensive design documentation, understanding the various components involved, and identifying all critical solution dependencies to ensure a robust and reliable data protection strategy.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Troubleshooting and Testing: This section of the exam measures the skills of Support Engineers and focuses on the practical skills needed to maintain data integrity. It involves troubleshooting common data protection configuration issues, executing well-defined Disaster Recovery (DR) procedures, and performing data restore operations to recover from data loss.</li></ul>

Topic 5	<ul style="list-style-type: none"> <li>• NetApp ONTAP Core Data Protection Features: This section of the exam measures the skills of Systems Administrators and validates core knowledge of data protection and redundancy within the ONTAP environment. It encompasses understanding how data efficiencies impact protection strategies and the practical knowledge required to deploy these data protection solutions effectively in a hybrid cloud infrastructure.</li> </ul>

## Implementation Engineer - Data Protection Exam Study Guide Provides You With 100% Assurance of Getting Certification - ITexamReview

To pass Network Appliance NS0-528 certification exam seems to be a very difficult task. Having registered NS0-528 test, are you worrying about how to prepare for the exam? If so, please see the following content, I now tell you a shortcut through the NS0-528 Exam. The certification training dumps that can let you pass the test first time have appeared and it is ITexamReview Network Appliance NS0-528 exam dumps. If you would like to sail through the test, come on and try it.

### Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q244-Q249):

#### NEW QUESTION # 244

A FAS2750 cluster administrator experiences network issues during replication updates that pass over a low- bandwidth WAN link to their DR site. They also replicate locally to another cluster for testing and development. The administrator wants to enable network compression only on the existing WAN Link SnapMirror jobs.

In this scenario, which statement is correct?

- A. Network compression is a global option and it cannot be used.
- B. Network compression must be enabled when initializing the replica, the current jobs need to be deleted and new ones created.
- C. Network compression is possible but not on a FAS2750.
- **D. The current DR transfers must be aborted and the option enabled on each job, then resume the transfer.**

**Answer: D**

#### NEW QUESTION # 245

What is a cloud tiering policy in NetApp ONTAP?

- A. A set of rules for encrypting data to protect it from unauthorized access
- B. A set of rules for compressing data to reduce storage space
- **C. A set of rules for moving data between on-premises and cloud storage**
- D. A set of rules for optimizing data access

**Answer: C**

#### NEW QUESTION # 246

Your customer wants to implement a solution to protect only a select number of NFSv3 volumes in a particular aggregate that stores their mission-critical application data. The customer wants the volume's data replicated to secondary storage and have application write operations fail if they cannot be replicated.

The customer needs to maintain a zero RPO and a very low RTO. In this scenario, which solution satisfies these requirements?

- A. Mirrored SVMs using MetroCluster
- B. SnapMirror Synchronous using Sync mode
- C. SnapMirror Synchronous using StrictSync mode
- **D. Mirrored aggregates using SyncMirror**

**Answer: D**

#### NEW QUESTION # 247

In a clustered Data ONTAP environment, the customer is using SnapVault to back up data from a primary to a secondary cluster. Policies, Resource Pools, and Storage Efficiency are configured in OnCommand Unified Manager 6.

OnCommand Workflow Automation takes care of the secondary provisioning. The customer wants to update the SnapMirror Policy with a custom Snapshot copy label.

What should be done to make sure that the Snapshot copies will be transferred to the secondary cluster?

- **A. Re-initialize the SnapMirror relationship without transferring a new baseline.**
- B. Add the SnapMirror label in the efficiency policy of the secondary system.
- C. Re-initialize the SnapMirror relationship and transfer a new baseline.
- D. Add the SnapMirror label in the SnapMirror policy of the secondary system.

**Answer: A**

#### NEW QUESTION # 248

An ONTAP administrator is trying to configure a three-way-disaster recovery solution. Cluster 2 is within 50 km of Cluster 1, the primary cluster, with an RTT of 7 ms. Cluster 3 is over 300 km from Cluster 1 with an RTT of 29 ms.

In this scenario, what are two topologies that would accomplish this task? (Choose two.)

- **A. a cascade topology from Cluster 1 to Cluster 2 with SnapMirror Synchronous, and then SnapMirror asynchronous from Cluster 2 to Cluster 3**
- B. a fan out topology with SnapMirror Synchronous from Cluster 1 to Cluster 2 and SnapMirror Synchronous to Cluster 3
- C. a cascade topology from Cluster 1 to Cluster 2 with SnapMirror Synchronous, and then SnapMirror Synchronous from Cluster 2 to Cluster 3
- **D. a fan out topology with SnapMirror Synchronous from Cluster 1 to Cluster 2 and SnapMirror asynchronous from Cluster 1 to Cluster 3**

**Answer: A,D**

#### NEW QUESTION # 249

.....

One of the biggest challenges of undertaking a Network Appliance NS0-528 exam is managing your time effectively. This means setting aside enough time to study. Many students struggle with this challenge because they are not able to set aside enough time to study and end up rushing through the material at the last minute. Our Network Appliance NS0-528 Pdf Dumps offer an alternate way by providing relevant Network Appliance NS0-528 questions and answers to prepare in the shortest possible time.
