## 시험대비 AB-730높은 통과율 덤프공부문제 최신버전 덤프샘플문제 다운로드

PassTIP는 전문적인 IT인증시험덤프를 제공하는 사이트입니다. AB-730인증시험을 패스하려면 아주 현명한 선택입니다. PassTIP에서는 AB-730관련 자료도 제공함으로 여러분처럼 IT 인증시험에 관심이 많은 분들한테 아주 유용한 자료이자 학습가이드입니다. PassTIP는 또 여러분이 원하도 필요로 하는 최신 최고버전의 AB-730문제와 답을 제공합니다.

## 최신 Microsoft Certified AB-730 무료 샘플문제 (Q98-Q103):

질문 # 98

Hotspot Question

You are creating an agent in the Microsoft 365 Copilot app.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
You can configure the agent to search shared mailboxes.	<input type="radio"/>	<input type="radio"/>
You can use natural language prompts to create the agent.	<input type="radio"/>	<input type="radio"/>
You can configure the agent to use another agent as a knowledge source.	<input type="radio"/>	<input type="radio"/>

정답:

설명:

Statements	Yes	No
You can configure the agent to search shared mailboxes.	<input checked="" type="radio"/>	<input type="radio"/>
You can use natural language prompts to create the agent.	<input checked="" type="radio"/>	<input type="radio"/>
You can configure the agent to use another agent as a knowledge source.	<input checked="" type="radio"/>	<input type="radio"/>

질문 # 99

You need to access Microsoft 365 Copilot from a web browser. Which URL should you use?

- A. <https://myapps.microsoft.com>
- B. <https://copilotstudio.microsoft.com>
- C. <https://m365.cloud.microsoft>
- D. <https://myaccount.microsoft.com>

정답: C

설명:

Microsoft 365 Copilot can be accessed via its dedicated web experience for enterprise users. The correct web entry point for Microsoft 365 Copilot is <https://m365.cloud.microsoft>, which provides authenticated access to Copilot features within the Microsoft 365 environment.

This URL routes users into the Microsoft 365 ecosystem where Copilot integrates with organizational data such as SharePoint, OneDrive, Teams, and Outlook. It ensures that users are authenticated through Microsoft Entra ID and that access controls are enforced according to tenant policies.

Option B refers to Copilot Studio, which is used to build and manage custom copilots and agents rather than access the Microsoft 365 Copilot chat experience. Option C (My Apps) is a general application launcher portal. Option D is an incorrect account management URL and does not provide Copilot access.

Therefore, to access Microsoft 365 Copilot from a web browser, the correct URL is <https://m365.cloud.microsoft>.

질문 # 100

You are comparing the difference between Microsoft 365 Copilot and Microsoft 365 Copilot Chat.

What is available in both versions?

- A. the Researcher agent
- B. Copilot Notebooks
- C. Copilot Pages

정답: C

설명:

A key feature available in both Microsoft 365 Copilot and Microsoft 365 Copilot Chat is Enterprise Data Protection (EDP), which ensures that user data and prompts are not used to train the underlying AI models.

Both versions also support key productivity features when signed in with a work or school account, including:

Web-grounded chat: Both can generate answers based on public web data and the latest Large Language Models (LLMs).

File Uploads: Both allow users to upload files to summarize or analyze.

Image Generation: Both can create images directly in the chat interface.

\*-> Copilot Pages: Both allow users to turn AI-generated responses into editable, shareable documents.

Contextual Awareness: Both can understand the context of an open file (Word, Excel, PowerPoint) or email (Outlook) in the side pane.

### 질문 # 101

You are using Microsoft 365 Copilot to enhance your productivity in Microsoft Excel.

Which two tasks can you achieve by using Copilot in Excel? Each correct answer presents a complete the solution.

NOTE: Each correct selection is worth one point.

- A. Build a pivot table based on your data.
- B. Insert a custom chart that has specific formatting.
- C. Customize the conditional formatting rules for your data.
- D. Generate a summary of key insights from your data.

정답: A,D

설명:

Microsoft 365 Copilot in Excel enhances productivity by enabling users to analyze, format, and visualize data instantly using natural language prompts. It automates complex tasks like formula generation, trend identification, and data cleaning, significantly reducing manual effort and speeding up decision-making. Key capabilities include generating pivot tables, creating charts, and summarizing data effortlessly.

Key Productivity Enhancements in Excel with Copilot:

[C] Data Analysis and Insights: Copilot can analyze complex datasets, identify trends, and generate insights without requiring manual setup, helping users make data-driven decisions faster.

Formula Generation and Manipulation: It suggests and creates complex formulas, functions, and data manipulation techniques, which speeds up calculations and analysis.

Data Cleaning and Formatting: Copilot automates the cleaning of inconsistent entries, such as removing duplicates or handling missing values, and enhances table formatting for easier interpretation.

[D] Visualization and Chart Creation: It can instantly generate charts and pivot tables based on conversational prompts, turning raw data into visual insights.

Workflow Automation: By acting as an AI assistant, it automates routine, time Reference:

### 질문 # 102

Hotspot Question

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Microsoft 365 Copilot uses contextual information from your organization to suggest prompts.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot can use contextual information from your organization to train the large language model. (LLM).	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot uses contextual information from your organization to augment a prompt before sending the prompt to the large language model (LLM).	<input type="radio"/>	<input type="radio"/>

정답:

설명:

Explanation:

Box 1: Yes

Yes - Microsoft 365 Copilot uses contextual information from your organization to suggest prompts.

Microsoft 365 Copilot leverages contextual information from your organization to suggest relevant prompts, a process aimed at improving productivity by reducing the need to search for information. This feature, often enhanced by Context IQ, scans your recent activity--including emails, calendar meetings, chats, and documents--to provide personalized, tailored suggestions.

Box 2: No

No - Microsoft 365 Copilot can use contextual information from your organization to train the large language model (LLM).

How Microsoft 365 Copilot actually uses organizational data:

\*-> No Training on Customer Data: Customer data, including prompts, responses, and data accessed through Microsoft Graph (emails, chats, documents, etc.), is not used to train the underlying foundation LLMs that power Copilot.

Grounding (Contextual Use): Copilot uses organizational context to "ground" responses. It retrieves relevant data in real-time via Microsoft Graph to ensure answers are accurate and tailored to your organization.

Box 3: Yes

Yes - Microsoft 365 Copilot uses contextual information from your organization to suggest augment a prompt, before sending the prompt to the large language model (LLM).

It uses a process called grounding to improve the relevance and accuracy of its responses by connecting to your organization's data via the Microsoft Graph.

Instead of just relying on the general knowledge of a Large Language Model (LLM), Copilot acts as an intermediary, augmenting your prompt with real-time organizational context before the LLM processes it.
