## TOP Practice CCFA-200b Questions: CrowdStrike Certified Falcon Administrator - 2024 Version - High-quality CrowdStrike CCFA-200b Pdf Files

Printing these CCFA-200b valid questions and reading them in a handy paper format is another feature offered by ExamPrepAway CrowdStrike CCFA-200b PDF for test applicants who prefer more conventional reading experience. These incredible features of CrowdStrike CCFA-200b PDF Questions help applicants practice for the CCFA-200b exam wherever and whenever they want, according to their timetables.

### CrowdStrike CCFA-200b Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• <b>Host Management and Setup:</b> This domain addresses filtering and organizing hosts, disabling detections and understanding their effects, managing Reduced Functionality Mode situations, locating inactive sensors and their retention, and utilizing relevant management reports.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Policy Application:</b> This domain encompasses configuring prevention policies for security posture, sensor update policies, RTR audit policies, containment policies with IP exclusions, and managing quarantined files.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Sensor Deployment:</b> This domain focuses on verifying installation prerequisites, applying default policies and best practices, uninstalling sensors, and troubleshooting sensor issues across supported operating systems.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Dashboards and Reports:</b> This domain covers understanding different sensor report types and their use cases, and interpreting various audit logs for tracking platform activities.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Group Creation:</b> This domain covers assigning endpoints to appropriate groups for policy application and following best practices for managing host group structures.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• <b>Workflows:</b> This domain focuses on configuring automated workflows that execute predefined actions when specific triggers or conditions are met.</li> </ul>

## CrowdStrike Certified Falcon Administrator - 2024 Version Sample Questions (Q47-Q52):

### NEW QUESTION # 47

What is the primary concern with Windows sensors going into Reduced Functionality Mode?

- A. The hosts have been powered off or otherwise cannot communicate with the Falcon cloud
- **B. The sensors do not have full visibility into all events occurring on the host**
- C. The sensors are unable to report any of their recorded events
- D. The operating systems on these hosts have crashed

**Answer: B**

Explanation:

The primary concern with Windows RFM is that sensors do not have full visibility into all events occurring on the host. In Windows RFM, the sensor continues operating at reduced capacity and can still report events and trigger detections, but it temporarily unhooks from some kernel elements. Without those kernel elements, some detection patterns and a small number of preventions may not trigger. The host is not necessarily offline, powered off, or unable to communicate with the cloud. RFM is also not the same as an operating system crash; it is a protective compatibility state. The CCFA sensor deployment topic emphasizes that RFM reduces visibility and prevention coverage, which is why administrators should identify and remediate RFM hosts promptly.

### NEW QUESTION # 48

What three things does a workflow condition consist of?

- A. A beginning, a middle, and an end
- B. Notifications, alerts, and API's
- C. Triggers, actions, and alerts
- **D. A parameter, an operator, and a value**

**Answer: D**

Explanation:

A workflow condition consists of a parameter, an operator, and a value. A workflow condition is a rule that defines when a workflow should be triggered based on certain criteria or filters. A parameter is a variable or attribute that can be used to filter or match detection events, such as severity, tactic, or host group. An operator is a symbol or word that specifies how to compare or evaluate the parameter and the value, such as equals, contains, or greater than. A value is a constant or expression that provides the

expected or desired result for the parameter, such as high, credential dumping, or default group.

#### NEW QUESTION # 49

You are attempting to install the Falcon sensor on a host with a slow Internet connection and the installation fails after 20 minutes. Which of the following parameters can be used to override the 20-minute default provisioning window?

- A. Timeout=0
- B. ExtendedWindow=1
- C. ProvNoWait=1
- D. Timeout=30

**Answer: C**

Explanation:

"ProvNoWait=1

The sensor does not abort installation if it can't connect to the CrowdStrike cloud within 20 minutes (10 minutes, in Falcon sensor version 6.21 and earlier). (By default, if the host can't contact our cloud, it will retry the connection for 20 minutes. After that, the host will automatically uninstall its sensor.)"

"ProvWaitTime=3600000

The sensor waits for 1 hour to connect to the CrowdStrike cloud when installing (the default is 20 minutes)."

#### NEW QUESTION # 50

The alignment of a particular prevention policy to one or more host groups can be completed in which of the following locations within Falcon?

- A. Policy alignment is configured in the "Host Management" section in the Hosts application
- B. Policy alignment is configured only once during the initial creation of the policy in the "Create New Policy" pop-up window
- C. Policy alignment is configured in the General Settings section under the Configuration menu
- D. Policy alignment is configured in each policy in the "Assigned Host Groups" tab

**Answer: D**

Explanation:

The alignment of a particular prevention policy to one or more host groups can be completed in each policy in the "Assigned Host Groups" tab. This tab allows the administrator to select which host groups will use the policy, as well as view the number of hosts and sensors assigned to each group. The other options are either incorrect or not available.

#### NEW QUESTION # 51

Under the "Next-Gen Antivirus: Cloud Machine Learning" setting there are two categories, one of them is "Cloud Anti-Malware" and the other is:

- A. Sensor Anti-Malware
- B. Advanced Machine Learning
- C. Adware & PUP
- D. Execution Blocking

**Answer: C**

Explanation:

With EDR license, if you go to "Audit logs > Machine-learning prevention monitoring", three options appear: Cloud Anti-malware, Sensor Anti-malware and Adware&PUP. Therefore, answer is A.

#### NEW QUESTION # 52

.....

Do you want to have a new change about your life? Do you want to get more respects from other people? Do you long to become a powerful people? If your answer is yes, it is high time for you to use the CCFA-200b question torrent from our company. As the saying goes, opportunities for those who are prepared. If you have made up your mind to get respect and power, the first step you need to do is to get the CCFA-200b Certification, because the certification is a reflection of your ability. If you have the CCFA-200b certification, it will be easier for you to get respect and power. Our company happened to be designing the CCFA-200b exam question.
