Juniper JN0-460 Reliable Learning Materials - JN0-460 Reliable Exam Practice

Without doubt, possessing a JN0-460 certification in your pocket can totally increase your competitive advantage in the labor market and make yourself distinguished from other job-seekers. Therefore our JN0-460 study braindumps can help you with dedication to realize your dream, and it is a truism that it is a great opportunity for you to improve working efficiency and make the

process of our work more easily and smoothly. With our JN0-460 learning prep, your life can be much better!

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q57-Q62):

NEW QUESTION # 57
Which two devices support Group Based policy?

- A. EX4400
- B. EX4100
- C. EX9200
- D. EX4300

Answer: A,B

NEW QUESTION # 58
Which statement is correct about a 3-stage campus fabric IP Clos?

- A. The distribution layer is connected to the core layer.
- B. The core layer is connected to the access layer.
- C. The distribution layer is connected to the access layer.
- D. The core layer devices are connected to each other.

Answer: B

Explanation:
Juniper's officialCampus Fabric IP Clos designfor Mist Wired Assurance defines that the3-stage IP Clostopology eliminates the traditionaldistribution layerentirely. This architecture is intended for smaller campus environments that do not need an intermediate distribution layer between the access and core.
"Juniper's Wired Assurance supports 3-Stage and 5-Stage IP Clos deployments. The 3-Stage IP Clos is targeted towards deployments that do not require a Distribution Layer and have smaller scale requirements." Because the distribution layer is not present, the only hierarchical connection in a 3-stage campus fabric is between thecore and access layers. Traffic is routed directly at the access layer, and each access switch acts as a Layer-3 gateway (IRB) for its VLANs.
"In a campus fabric IP Clos architecture, Mist provisions Layer-3 (L3) integrated routing and bridging (IRB) interfaces on the access layer. All the access switches are configured with the same IP address for each L3 subnet." Additionally, the Juniper documentation explains that point-to-point links are configuredbetween layers, and in the case of the 3-stage design (with no distribution), this means between thecore and accessdevices:
"The point-to-point links between each layer utilize /31 addressing to conserve addresses." Therefore, the correct statement isC: The core layer is connected to the access layer.
OptionsAandBincorrectly mention a distribution layer that does not exist in this topology.
OptionDis incorrect because core (spine) devices in a Clos fabric are not interconnected with each other.

NEW QUESTION # 59
You have connected a new EX4400 series switch to an existing network.
Without logging into the switch, how would you determine the connectivity status of the switch?

- A. Look at the color of the connected port LED and count the number of times it blinks
- B. Look at the color of the power LED and count the number of times it blinks
- C. Look at the color of the me0 port LED and count the number of times it blinks
- D. Look at the color of the Cloud LED and count the number of times it blinks

Answer: D

NEW QUESTION # 60
Which of the following accurately describes VXLAN gateways?

- A. Convert between different encryption protocols
- B. They only operate at Layer 3 of the OSI model
- C. Are used to decrease network throughput
- D. Facilitate communication between VXLAN and non-VXLAN environments

Answer: D

NEW QUESTION # 61
You are using the Wired Visibility option as your Wired Assurance solution.
In this scenario, which two statements are correct? (Choose two.)

- A. Third party switches are supported.
- B. All devices are configurable using Mist Al.
- C. You must connect a Mist Managed AP to each switch.
- D. You must enable SNMP on all switches.

Answer: A,C

NEW QUESTION # 62
......

In spite of the high-quality of our Juniper JN0-460 study braindumps, our after-sales service can be the most attractive project in our JN0-460 guide questions. We have free online service which means that if you have any trouble using our Juniper JN0-460 Learning Materials or operate different versions on the platform mistakenly, we can provide help for you remotely in the shortest time.
