ECCouncil 312-85 Helpful Product Features of PDF

Revealing whether or not a man succeeded often reflect in the certificate he obtains, so it is in IT industry. Therefore there are many people wanting to take ECCouncil 312-85 exam to prove their ability. However, want to pass ECCouncil 312-85 Exam is not that simple. But as long as you get the right shortcut, it is easy to pass your exam. We have to commend Dumpkiller exam dumps that can avoid detours and save time to help you sail through the exam with no mistakes.

ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q52-Q57):

NEW QUESTION # 52
An XYZ organization hired Mr. Andrews, a threat analyst. In order to identify the threats and mitigate the effect of such threats, Mr. Andrews was asked to perform threat modeling. During the process of threat modeling, he collected important information about the treat actor and characterized the analytic behavior of the adversary that includes technological details, goals, and motives that can be useful in building a strong countermeasure.

What stage of the threat modeling is Mr. Andrews currently in?

- A. Threat profiling and attribution
- B. Threat determination and identification
- C. Threat ranking
- D. System modeling

Answer: A

Explanation:
During the threat modeling process, Mr. Andrews is in the stage of threat profiling and attribution, where he is collecting important information about the threat actor and characterizing the analytic behavior of the adversary. This stage involves understanding the technological details, goals, motives, and potential capabilities of the adversaries, which is essential for building effective countermeasures. Threat profiling and attribution help in creating a detailed picture of the adversary, contributing to a more focused and effective defense strategy.

NEW QUESTION # 53
Steve works as an analyst in a UK-based firm. He was asked to perform network monitoring to find any evidence of compromise. During the network monitoring, he came to know that there are multiple logins from different locations in a short time span. Moreover, he also observed certain irregular log in patterns from locations where the organization does not have business relations. This resembles that somebody is trying to steal confidential information.
Which of the following key indicators of compromise does this scenario present?

- A. Unexpected patching of systems
- B. Unusual activity through privileged user account
- C. Geographical anomalies
- D. Unusual outbound network traffic

Answer: C

NEW QUESTION # 54
Steve works as an analyst in a UK-based firm. He was asked to perform network monitoring to find any evidence of compromise. During the network monitoring, he came to know that there are multiple logins from different locations in a short time span. Moreover, he also observed certain irregular log in patterns from locations where the organization does not have business relations. This resembles that somebody is trying to steal confidential information.
Which of the following key indicators of compromise does this scenario present?

- A. Geographical anomalies
- B. Unexpected patching of systems
- C. Unusual activity through privileged user account
- D. Unusual outbound network traffic

Answer: C

NEW QUESTION # 55
In a team of threat analysts, two individuals were competing over projecting their own hypotheses on a given malware. However, to find logical proofs to confirm their hypotheses, the threat intelligence manager used a de-biasing strategy that involves learning strategic decision making in the circumstances comprising multistep interactions with numerous representatives, either having or without any perfect relevant information.
Which of the following de-biasing strategies the threat intelligence manager used to confirm their hypotheses?

- A. Cognitive psychology
- B. Machine learning
- C. Game theory
- D. Decision theory

Answer: D

NEW QUESTION # 56

Steve works as an analyst in a UK-based firm. He was asked to perform network monitoring to find any evidence of compromise. During the network monitoring, he came to know that there are multiple logins from different locations in a short time span. Moreover, he also observed certain irregular log in patterns from locations where the organization does not have business relations. This resembles that somebody is trying to steal confidential information.

Which of the following key indicators of compromise does this scenario present?

- A. Unexpected patching of systems
- B. Unusual activity through privileged user account
- C. Geographical anomalies
- D. Unusual outbound network traffic

Answer: C

Explanation:

The scenario described by Steve's observations, where multiple logins are occurring from different locations in a short time span, especially from locations where the organization has no business relations, points to

'Geographical anomalies' as a key indicator of compromise (IoC). Geographical anomalies in logins suggest unauthorized access attempts potentially made by attackers using compromised credentials. This is particularly suspicious when the locations of these logins do not align with the normal geographical footprint of the organization's operations or employee locations. Monitoring for such anomalies can help in the early detection of unauthorized access and potential data breaches.
