## AP-213 Valid Exam Registration | AP-213 Valid Exam Answers

In the past ten years, we always hold the belief that it is dangerous if we feel satisfied with our AP-213 study engine and stop renovating. Luckily, we still memorize our initial determination. We are proud that our AP-213 learning questions are so popular in the market. Please remember that all experiences will become your valuable asset in life. And it is never too late to learn more and something new. Just buy our AP-213 Exam Braindumps, you will find that you can reach your dream easily.

## Salesforce Manufacturing Cloud Accredited Professional Sample Questions (Q64-Q69):

### NEW QUESTION # 64

Which two options are recommended to collaborate with channel partners in Manufacturing Cloud?

- A. External Apps
- B. Visualforce pages
- C. Manufacturing Cloud license for external users
- D. Experience Cloud
- E. Lightning Classic Apps

Answer: A,D

Explanation:

To collaborate with channel partners in Manufacturing Cloud, it is recommended to use external apps and Experience Cloud. External apps are applications that run outside of Salesforce but can integrate with Salesforce data and functionality. They can provide custom solutions for specific business needs and extend the capabilities of Manufacturing Cloud. For example, external apps can enable partners to access inventory levels, order status, product catalogs, and pricing information from Salesforce. Experience Cloud, formerly known as Community Cloud, is a platform that allows you to create branded digital experiences for your customers, partners, and employees. It can help you engage with your channel partners and provide them with self-service tools, collaboration features, and personalized content. For example, Experience Cloud can enable partners to view and update sales agreements, account forecasts, rebates, and targets from Salesforce. It can also help you train and onboard your partners, monitor their performance, and reward them for their achievements. #### NEW QUESTION # 65

What out-of-the-box Manufacturing Cloud function can be used to notify users if automated processes fail?

- A. Automated Processes Notifications
- B. Manufacturing Cloud Home Page Notifications related
- **C. Email Notifications**
- D. Automated Processes Status report

**Answer: C**

Explanation:

Email notifications are an out-of-the-box Manufacturing Cloud function that can be used to notify users if automated processes fail. Automated processes are workflows, processes, or Apex triggers that update records based on certain criteria or events. If an automated process fails, Salesforce sends an email to either the admin who last modified the associated flow or the Apex exception email recipients. The email includes the data that's involved in the process or flow, including user-entered data, and the error message that caused the failure.

You can configure the email recipients and the email content in the Process Automation Settings page in Setup. References: = Select Flow and Process Error Email Recipients, Troubleshoot Flow Errors

#### NEW QUESTION # 66

Partner managers from Universal Containers (UC) are performing onsite visits to their distribution partners.

During the visit they have a goal of getting partners to renew the terms of their sales agreements with UC.

Leadership wants to understand how effective these in-person visits are in getting partners to renew. They would also like to standardize the tasks to be performed during these visits and report on this data in Salesforce.

Which features should a Manufacturing Cloud consultant recommend to meet these requirements?

- A. Partner Visit Management, Advanced Account Forecasting, and CRM Analytics for Manufacturing
- B. Partner Visit Management, Experience Cloud, and Service Console for Manufacturing
- **C. Partner Visit Management, Action Plans, and Generic Visit Key Performance Indicators**

**Answer: C**

Explanation:

To meet the requirements of UC, a Manufacturing Cloud consultant should recommend the following features: Partner Visit Management, Action Plans, and Generic Visit Key Performance Indicators. Partner Visit Management helps sales managers schedule visits to dealer and distributor locations, monitor performance, follow up on sales agreements, and capture key metrics<sup>1</sup>. Action Plans allow sales managers to create lists of tasks and associated assessment indicators that are commonly repeated across multiple visits<sup>2</sup>. Generic Visit Key Performance Indicators enable sales managers to compare the expected metrics versus the actual metrics for the key performance indicators they defined and then take necessary actions<sup>3</sup>.

These features help UC to standardize the tasks to be performed during visits, understand how effective these visits are in getting partners to renew, and report on this data in Salesforce. The other features are not relevant for the given scenario. Advanced Account Forecasting is used to create holistic forecasts based on sales agreements, orders, opportunities, and account metrics<sup>4</sup>. CRM Analytics for Manufacturing is used to gain insights into sales performance, pipeline health, and customer satisfaction.

Experience Cloud is used to create branded digital experiences for customers, partners, and employees. Service Console for Manufacturing is used to provide customer service and support across multiple channels. #### NEW QUESTION # 67

How does Salesforce Manufacturing Cloud help businesses monitor and evaluate system performance against their business process flows while identifying deviations or areas of improvement?

- A. Through Seamless integration with Enterprise Resource Planning (ERP) and Inventory systems
- **B. By providing real-time analytics for manufacturing performance metrics**
- C. With built-in demand forecasting and inventory tracking features

**Answer: B**

#### NEW QUESTION # 68

Which three options can be defined by an Admin in the Setup area in Account Manager Targets?

- **A. Team Member Hierarchy**
- **B. Distribution Frequency**
- C. Default Currency
- D. Price Book
- **E. Target Measure Type**

**Answer: A,B,E**

Explanation:

Account Manager Targets is a feature of Manufacturing Cloud that allows you to set up and manage sales goals and track performance for your account managers and their teams. To use this feature, you need to enable it in Setup and define some settings that affect how targets are created, assigned, and distributed. The three options that can be defined by an admin in the Setup area in Account Manager Targets are:

**Target Measure Type:** This is the unit of measurement for the targets, such as revenue, volume, or any custom measure. You can define up to three target measure types for your org and assign them to different target types. For example, you can have a target type for revenue and another one for volume, and use different target measure types for each one.

**Team Member Hierarchy:** This is the hierarchy that determines how targets are rolled up from individual account managers to their managers and so on. You can use the standard User Role hierarchy or a custom hierarchy based on a custom object. The hierarchy affects how targets are distributed, aggregated, and reported.

**Distribution Frequency:** This is the frequency at which targets are distributed from parent targets to child targets. You can choose from monthly, quarterly, or yearly distribution. The distribution frequency affects how targets are calculated and displayed for different time periods.
