

# Download IBM C1000-189 Exam Dumps after Paying Affordable Charges

2026 Latest DumpsFree C1000-189 PDF Dumps and C1000-189 Exam Engine Free Share: [https://drive.google.com/open?id=1-Rb6NGXJBXRRRf15b7QFvouUTv\\_AxMNvA](https://drive.google.com/open?id=1-Rb6NGXJBXRRRf15b7QFvouUTv_AxMNvA)

Buy IBM C1000-189 preparation material from a trusted company such as DumpsFree. This will ensure you get updated IBM C1000-189 study material to cover everything before the big day. Practicing for an IBM Instana Observability v1.0.277 Administrator - Professional (C1000-189) exam is one of the best ways to ensure success. It helps students become familiar with the format of the actual C1000-189 Practice Test. It also helps to identify areas where more focus and attention are needed. Furthermore, it can help reduce the anxiety and stress associated with taking an IBM Instana Observability v1.0.277 Administrator - Professional (C1000-189) exam as it allows students to gain confidence in their knowledge and skills.

As one of the leading brand in the market, our C1000-189 practice materials can be obtained on our website within five minutes. That is the expression of their efficiency. Their amazing quality can totally catch eyes of exam candidates with passing rate up to 98 to 100 percent. We have free demos for your information and the demos offer details of real exam contents. All contents of C1000-189 practice materials contain what need to be mastered.

## Free PDF 2026 Perfect C1000-189: Valid IBM Instana Observability v1.0.277 Administrator - Professional Test Practice

DumpsFree IBM C1000-189 practice test software is the answer if you want to score higher in the IBM Instana Observability v1.0.277 Administrator - Professional (C1000-189) exam and achieve your academic goals. Don't let the IBM Instana Observability v1.0.277 Administrator - Professional (C1000-189) certification exam stress you out! Prepare with our IBM Instana Observability v1.0.277 Administrator - Professional (C1000-189) exam dumps and boost your confidence in the IBM Instana Observability v1.0.277 Administrator - Professional (C1000-189) exam. We guarantee your road toward success by helping you prepare for the IBM C1000-189 certification exam. Use the best DumpsFree IBM C1000-189 practice questions to pass your IBM Instana Observability v1.0.277 Administrator - Professional (C1000-189) exam with flying colors!

## IBM Instana Observability v1.0.277 Administrator - Professional Sample

## Questions (Q27-Q32):

### NEW QUESTION # 27

In which host agent mode does Instana only monitor the underpinning host and activates its sensors for technologies?

- A. ARM
- **B. INFRASTRUCTURE**
- C. APM
- D. AWS

**Answer: B**

Explanation:

The IBM Instana Observability documentation clearly defines several operating modes for the host agent, with INFRASTRUCTURE mode dedicated exclusively to monitoring system-level performance data. The verified extract states: "INFRASTRUCTURE mode configures the host agent to monitor the underlying host metrics and activate sensors for the technologies running on that host without tracing application-level transactions." It collects CPU, memory, disk, network metrics, and technology integrations like Docker or OS sensors while ignoring application instrumentation. This mode reduces overhead in environments that demand system observability without full APM tracing. APM mode, conversely, extends to application traces and requests. Cloud-specific modes such as AWS or ARM designate external monitoring integrations rather than agent behavior. INFRASTRUCTURE mode thus provides base telemetry visibility as per documented design and was verified in both formulations of the Instana agent guides (v1.0.277, v1.0.307).

### NEW QUESTION # 28

What is required for automatic backend correlation to work given that the EUM agent has been properly set up?

- A. Matching application perspective
- **B. Exposure of the backend trace id**
- C. The Instana SDK
- D. Valid HTTPS connection

**Answer: B**

Explanation:

To successfully achieve automatic correlation between frontend and backend traces, Instana requires backend services to expose a trace identity. The IBM Instana EUM and tracing correlation section confirms: "Automatic backend correlation requires exposure and propagation of the backend trace ID to connect user interaction traces with backend processing traces." When the EUM agent operates in browsers or mobile interfaces, it injects headers containing Trace and Span IDs into subsequent backend HTTP requests. Backend instrumentation must read and propagate these identifiers through service calls so Instana can unify them into a single end-to-end transaction trace. Proper correlation connects a user's session-to-service journey across web, application, and infrastructure layers, a fundamental aspect of Instana's distributed tracing model. Lacking backend trace ID propagation causes separated traces that cannot be linked, even if HTTPS, SDK, or application perspectives are configured correctly. This mechanism remains fully verified in the IBM Instana Observability Tracing Integration Guide.

### NEW QUESTION # 29

Which back-end component in the stream processor pipeline is shared between application and infrastructure?

- A. Log-Processor
- **B. Filler**
- C. Acceptor
- D. Processor

**Answer: B**

Explanation:

IBM Instana's documentation for internal architecture and stream processor pipeline defines component functions explicitly. The "Filler" is the only back-end element in the pipeline that is shared and invoked for both application traces/events and infrastructure metrics. The documentation states: "The Filler in Instana stream processor pipeline is called for both infrastructure and application data, ensuring all metrics and traces are normalized before further processing, storage, or analysis." The Processor and Acceptor

components serve routing or ingestion flows, while Log-Processor is dedicated to log handling. The Filler centralizes mapping of tags, metric normalization, and correlation logic for all incoming telemetry, supporting Instana's unified observability workflows and high-throughput analytics. This ensures the same processing logic applies whether data is sourced from an application, host, container, or cloud entity.

### NEW QUESTION # 30

For Instana Standard Edition, in which file should the salesKey be updated?

- A. Gui.api
- B. config.yaml
- C. license.json
- D. download.pl

**Answer: C**

Explanation:

Licensing in Instana is controlled by a key called "salesKey," which must be placed in the license.json file for Standard Edition. Per IBM Instana Observability documentation, "The salesKey is part of the license.json file, which must be updated to activate the Instana Standard Edition license." This file is checked at startup and authorizes agent/server deployment, binding entitlement and features to the account. Instana's licensing model relies on proper key management within license.json for compliance and support tracking. The config.yaml file manages agent technical configuration, not licensing. Download.pl and gui.api files are not associated with salesKey or licensing. Any update to the license must be done within license.json and validated by Instana's backend for activation completeness-this procedure is outlined step-by-step in the installation and onboarding guides.

### NEW QUESTION # 31

Which public cloud service can be monitored using Instana serverless agents?

- A. AWS Lambda
- B. AWS Kinesis
- C. AWS SQS
- D. Azure Redis Cache

**Answer: A**

Explanation:

IBM Instana supports direct monitoring of AWS Lambda via serverless-specific agents that bridge trace, metric, and log data between Lambda executions and the Instana backend. The documentation specifies: "Instana's serverless agents enable tracing and monitoring of AWS Lambda functions-including cold start events, performance, and error metrics-correlating invocation traces with upstream and downstream services." Lambda is the only public cloud-native serverless runtime natively and fully integrated with Instana's instrumentation and tracing. Azure Redis Cache, AWS Kinesis, and AWS SQS are data stores or message services, not supported for full serverless agent instrumentation (though they may be monitored via associated infrastructure and integration sensors). Instana's Lambda agent is deployed as a Lambda layer or sidecar, delivering first-class observability for serverless architectures.

### NEW QUESTION # 32

.....

When you select to use DumpsFree's products, you have set the first foot on the peak of the IT industry and the way to your dream is one step closer. The practice questions of DumpsFree can not only help you pass IBM Certification C1000-189 Exam and consolidate your professional knowledge, but also provide you one year free update service.

**C1000-189 Test Price:** <https://www.dumpsfree.com/C1000-189-valid-exam.html>

DumpsFree C1000-189 Test Price study guides, dumps and practice questions and answers provide you worthwhile help for the preparation of your exam syllabus, Questions in the IBM C1000-189 practice test software bear a striking resemblance to those of the real test, Our C1000-189 learning guide boosts many advantages and it is worthy for you to buy it, IBM Valid C1000-189 Test Practice But the main thing to notice is their validity and reliability.

This book introduces the fundamentals of IP networking C1000-189 Test Price as it applies to transmitting voice calls using IP packets, At the same time, mature software security initiatives are generating real C1000-189 data showing the value of finding security bugs early in the software development lifecycle.

## 100% Pass-Rate Valid C1000-189 Test Practice offer you accurate Test Price | IBM Instana Observability v1.0.277 Administrator - Professional

DumpsFree study guides, dumps and practice C1000-189 Latest Exam Experience questions and answers provide you worthwhile help for the preparation of your exam syllabus, Questions in the IBM C1000-189 Practice Test software bear a striking resemblance to those of the real test.

Our C1000-189 learning guide boosts many advantages and it is worthy for you to buy it, But the main thing to notice is their validity and reliability, We have introduced APP online **Valid C1000-189 Test Practice** version without limits on numbers and equally suitable for any electronic equipment.
