What's more, we will provide the most considerate after sale service for our customers in twenty four hours a day seven days a week, therefore, our company is really the best choice for you to buy the PDI Training Materials.

Salesforce Platform Developer I (PDI) Sample Questions (Q190-Q195):

NEW QUESTION # 190
How should a developer write unit tests for a private method in An Apex class?

- A. Mark the Apex class as global.
- B. Use the SeeAllData annotation.
- C. Add a test method in the Apex class,
- D. Use the @TestVisible annotation.

Answer: D

Explanation:
To write unit tests for a private method in an Apex class:
Option C: Use the @TestVisible annotation.

Example:
public class MyClass {
@TestVisible
private static void myPrivateMethod() {
// Implementation
}
}
Reference:
"Use the @TestVisible annotation to allow test methods to access private or protected members of another class outside the test class."
- Apex Developer Guide: The @TestVisible Annotation
Why Other Options Are Incorrect:
Option A: You cannot add test methods inside a non-test Apex class. Test methods must be in a test class annotated with @IsTest.
Option B: Using SeeAllData=true allows access to organization data but does not affect the visibility of private methods.
Option D: Marking the Apex class as global changes its access modifier but does not expose private methods to test methods.

NEW QUESTION # 191
Which Lightning Web Component custom event property settings enable the event to bubble up the containment hierarchy and cross the Shadow DOM boundary?

- A. bubbles: true, composed: true
- B. bubbles: true, composed: false
- C. bubbles: false, composed: true
- D. bubbles: false, composed: false

Answer: A

Explanation:
* Why These Settings?
* bubbles: true: Enables the event to propagate up the containment hierarchy.
* composed: true: Allows the event to cross the Shadow DOM boundary.
* Why Not Other Options?
* Other combinations (e.g., bubbles: false) prevent the event from propagating or crossing the Shadow DOM boundary.
* Custom Events in LWC: https://developer.salesforce.com/docs/component-library/documentation/en
/lwc/lwc.events_create_dispatch

NEW QUESTION # 192
In the Lightning UI, where should a developer look to find information about a Paused Flow Interview?

- A. In the system debug log by Altering on Paused Row Interview
- B. On the Paused Row Interviews related List for a given record
- C. In the Paused Interviews section of the Apex Rex Queue
- D. On the Paused Row Interviews component on the Home page

Answer: C

NEW QUESTION # 193
In the following example, which sharing context will myMethod execute when it is invoked?

- A. Sharing rules will be Inherited from the calling context.
- B. Sharing rules will be enforced by the instantiating class.
- C. Sharing rules will be enforced for the running user.
- D. Sharing rules will not be enforced for the running user.

Answer: A

NEW QUESTION # 194

Management asked for opportunities to be automatically created for accounts with annual revenue greater than $1, 000,000. A developer created the following trigger on the Account object to satisfy this requirement.

for (Account a : Trigger.new) {
if (a.AnnualRevenue > 1000000) {
List<Opportunity> oppList = [SELECT Id FROM Opportunity WHERE AccountId = :a.Id]; if (oppList.size() == 0) { Opportunity oppty = new Opportunity(Name = a.Name, StageName = 'Prospecting', CloseDate = System.
today().addDays(30));
insert oppty;
}
}
}

Users are able to update the account records via the UI and can see an opportunity created for high annual revenue accounts. However, when the administrator tries to upload a list of 179 accounts using Data Loader, it fails with system, Exception errors. Which two actions should the developer take to fix the code segment shown above?
Choose 2. answers

- A. Move the DML that saves opportunities outside the for loop.
- B. Use Database query to query the opportunities.
- C. Check if all the required fields for Opportunity are being added on creation.
- D. Query for existing opportunities outside the for loop.

Answer: A,D

Explanation:
This is a classic bulkification problem, covered under"Apex Development Best Practices"in the PD1 guide.
Reference:Apex Developer Guide - Bulk Design Patterns
D (Correct):DML operations (like insert) in a loop can cause theDML 151 limiterror. Moving them outside the loop and collecting records in a list before performing a single DML operation is best practice.Reference:
