Oracle 1Z0-076 Certification Exam Syllabus and Exam Questions

Oracle 1Z0-076 Exam

www.DBExam.com
Get complete detail on 1Z0-076 exam guide to crack Oracle Database 19c - Data Guard Administration. You can collect all information on 1Z0-076 tutorial, practice test, books, study material, exam questions, and syllabus. Firm your knowledge on Oracle Database 19c - Data Guard Administration and get ready to crack 1Z0-076 certification. Explore all information on 1Z0-076 exam with number of questions, passing percentage and time duration to complete test.

P.S. Free & New 1z1-076 dumps are available on Google Drive shared by UpdateDumps: https://drive.google.com/open?id=1u1hpV9fTwfq5FJK84QUSL87YOn_vixqb

For years our company is always devoted to provide the best 1z1-076 practice questions to the clients and help them pass the test 1z1-076 certification smoothly. Our company tried its best to recruit the famous industry experts domestically and dedicated excellent personnel to compile the 1z1-076 cram guide and serve for our clients wholeheartedly. Our company sets up the service tenet that customers are our gods and the strict standards for the quality of our 1z1-076 training materials.

The Oracle 1z1-076 practice exam will be a great help because you are left with little time to prepare for the Oracle 1z1-076 certification exam which you cannot waste to make time for the Oracle 1z1-076 Exam Questions. Get the Oracle 1z1-076 certification by preparing through Oracle 1z1-076 exam questions that will help you pass the Oracle 1z1-076 exam.

Authentic Oracle 1z1-076 Exam Hub | New 1z1-076 Braindumps Files

For customers who are bearing pressure of work or suffering from career crisis, Oracle Database 19c: Data Guard Administration learn tool of inferior quality will be detrimental to their life, render stagnancy or even cause loss of salary. So choosing appropriate 1z1-076 test guide is important for you to pass the exam. One thing we are sure, that is our 1z1-076 Certification material is reliable. With our high-accuracy 1z1-076 test guide, our candidates can grasp the key points, and become sophisticated with the exam content. You only need to spend 20-30 hours practicing with our Oracle Database 19c: Data Guard Administration learn tool, passing the exam would be a piece of cake.

Oracle Database 19c: Data Guard Administration Sample Questions (Q33-

Q38):

NEW QUESTION # 33

Examine the following parameter settings of the physical standby database:

* STANDBY_FILE_MANAGEMENT=AUTO

* ENABLED_PDBS_ON_STANDBY=<null>

During which TWO tasks are files automatically created in the physical standby database after structure changes on the primary database?

- A. Adding or dropping a redo file group
- B. Creating a PDB from the existing PDB within the same CDB
- C. Performing transportable tablespaces
- D. Adding a data file or creating a tablespace
- E. Renaming a data file in the primary database

Answer: B,D

Explanation:

When STANDBY_FILE_MANAGEMENT is set to AUTO, the Oracle Data Guard automatically creates, deletes, and renames files on the standby database to match the changes made on the primary database. The tasks that lead to the automatic creation of files on the standby include:

* Adding a data file or creating a tablespace (C): When a new tablespace is created or a new data file is added on the primary database, the standby database automatically replicates this action, maintaining structural consistency with the primary database.

* Creating a PDB from the existing PDB within the same CDB (D): Creating a new Pluggable Database (PDB) within a Multitenant Container Database (CDB) on the primary database triggers an automatic creation of the corresponding PDB within the standby CDB. References:

* Oracle Data Guard Concepts and Administration Guide

NEW QUESTION # 34

Examine the fast-start failover configuration:

```
DGMGRL> show fast_start failover;
```

```
Fast-Start Failover: Enabled in Zero
```

```
Protection Mode: MaxAvailabilit  
Lag Limit: 0 seconds
```

```
Threshold: 180 seconds  
Active Target: South_Sales  
Potential Targets: "East_Sales,  
East_Sales valid  
West_Sales valid  
Observer: observer.example.com  
Shutdown Primary: TRUE  
Auto-reinstate: TRUE  
Observer Reconnect: (none)  
Observer Override: FALSE
```

```
Configurable Failover Conditions  
Health Conditions: ORACLE
```

```
Corrupted Controlfile YES  
Corrupted Dictionary YES  
Inaccessible Logfile NO  
Stuck Archiver YES
```

- A. You must disable fast-start failover first to change the fast-start failover target to East sales.
- B. If South_Sales develops a problem and cannot be the target of a failover, the broker automatically changes the fast-start failover target to one of the other candidate targets.
- C. The observer will initiate a failover when the primary database is unable to produce local archived redo log files.
- D. The observer is running.
- E. A failover may occur if the observer has lost connectivity to the primary database, even if the Fast-Start Failover target standby database has a good connection to the primary database

Answer: C,D,E

NEW QUESTION # 35

Which three can be done using Data Guard Broker?

- A. Automating failover to a specified target standby database.
- B. Monitoring and managing redo transport services, and log apply services.
- C. Converting physical standby databases to snapshot standby databases.
- D. Configuring the standby control file, server parameter file, and data files for a standby database.
- E. Create a new physical standby database.
- F. Define logical standby database skip rules.

Answer: A,C,E

NEW QUESTION # 36

Your Data Guard environment consists of these components and settings:

1. A primary database
 2. Two remote physical standby databases
 3. The redo transport mode is set to sync
 4. Real-time query is enabled for both standby databases
 5. The DB_BLOCK_CHECKING parameter is set to TRUE on both standby databases
- You notice an increase in redo apply lag time on both standby databases.

Which two would you recommend to reduce the redo apply lag on the standby databases?

- A. Decrease the redo log file size on the primary database.
- B. Increase the size of the buffer cache on the physical standby database instances.
- C. Increase the number of standby redo log files on the standby databases.
- **D. Lower DB_BLOCK_CHECKING to MEDIUM or low on the standby databases.**
- **E. Increase the size of standby redo log files on the standby databases.**

Answer: D,E

Explanation:

To reduce the redo apply lag on standby databases, one could increase the size of the standby redo log files. Larger redo log files can accommodate more redo data, which may reduce the frequency of log switches and allow for more continuous application of redo data. Additionally, lowering the DB_BLOCK_CHECKING parameter to MEDIUM or LOW on the standby databases can help improve redo apply performance. High block checking can impose additional CPU overhead during the application of redo data, potentially increasing apply lag times. By reducing the level of block checking, you can lessen this overhead and help reduce the apply lag.

NEW QUESTION # 37

You must design an Oracle Data Guard configuration for a DSS database that meets these permanent requirements:

1. Creating and maintaining bitmap indexes should not impact the performance of the primary database.
 2. Creating and maintaining materialized views should not impact the performance of the primary database.
- Additionally, there are these requirements, only one of which is ever done at any one time:
1. It should be possible to apply designated patches with a minimum amount of downtime.
 2. Upgrading to a new database release should be performed with the least possible amount of downtime.
 3. New application software releases should be tested against an exact and up-to-date replica of the primary database.

Which configuration meets these requirements with the fewest of databases?

- A. a primary database with one physical standby database
- B. a primary database with two physical standby databases
- C. a primary database with two logical standby databases
- D. A primary database with one logical and one physical standby database
- **E. a primary database with one logical standby database**

Answer: E

Explanation:

* Logical standby databases allow the execution of DDL and DML operations, which makes them suitable for maintaining bitmap indexes and materialized views without affecting the performance of the primary database.

* Logical standby databases can be used for performing rolling upgrades and patching with minimum downtime, meeting another requirement.

* They also enable the testing of new application software releases against an up-to-date replica of the primary database, fulfilling the last requirement.

Other configurations involving physical standby databases or combinations of logical and physical standby databases might not meet all the specified requirements as efficiently or with the same level of performance isolation for the primary database.

NEW QUESTION # 38

.....

We are committed to provide you the best and the latest 1z1-076 training materials for you. Quality of the 1z1-076 exam dumps has get high evaluation among our customers, they think highly of it, since we help them pass the exam easily. Furthermore if we have the updated version, our system will send the Latest 1z1-076 Exam Dumps to your email address automatically, you don't need to

worry about missing the latest version, you just need to concentrate your attention on practicing, and we will do the rest for you.

Authentic 1z1-076 Exam Hub: <https://www.updatedumps.com/Oracle/1z1-076-updated-exam-dumps.html>

Besides 1z1-076 study materials are edited by professional experts, they are quite familiar with the dynamics of the exam center, Oracle 1z1-076 Certificate Exam Their quality with low prices is unquestionable, They can avoid spending unnecessary money and choose the most useful and efficient 1z1-076 study materials, In doing so, the test taker will never take the same test twice, although the concepts tested in the Authentic 1z1-076 Exam Hub will remain the same from test to test.

The rest of Mark's day he spends going back 1z1-076 and forth between construction work and Directly, In a computer, your data is stored in memory and so a variable name is 1z1-076 Certificate Exam just a human representation of the address of something in the computer's memory.

Pass Guaranteed Quiz The Best Oracle - 1z1-076 Certificate Exam

Besides 1z1-076 Study Materials are edited by professional experts, they are quite familiar with the dynamics of the exam center, Their quality with low prices is unquestionable.

They can avoid spending unnecessary money and choose the most useful and efficient 1z1-076 study materials, In doing so, the test taker will never take the same test twice, 1z1-076 Certificate Exam although the concepts tested in the Oracle Database 19c will remain the same from test to test.

Our 1z1-076 dumps torrent will do you a big favor of solving all your problems and offering the most convenient and efficient approaches to make it.
