dbt Labs dbt Analytics Engineering Certification Exam Sample Questions (Q108-Q113):

NEW QUESTION # 108

dbt Model Snippet

- A. The logic contained within a custom macro.
- **B. The presence of filters on the source fct_orders or dim_customers.**
- C. The ref() functions aren't correctly resolving dependencies.
- D. The underlying data types of o.customer_id and c.customer_id mismatch.

Answer: B

Explanation:

Filters on sources frequently cause missing rows in joins. Check your source definitions and any model-level filtering. While the others could be issues, start with the most common cause.

NEW QUESTION # 109

You're setting up baseline comparisons with historical data

a. Which factors are crucial to consider when selecting or generating the baseline dataset?

- **A. The baseline should cover a representative time range relevant to your analysis.**
- **B. If using data, the baseline might need sanitization to remove PII-**
- **C. The baseline needs to align in structure (schemas) with the dbt models being tested.**
- D. The data volume in the baseline should be large enough to identify statistical patterns.

Answer: A,B,C

Explanation:

Each of these directly impacts the validity and usefulness of the baseline for comparison. B, while good, is less universally critical.

NEW QUESTION # 110

(Multiple Select)

- A. database
- **B. model-paths**
- **C. test-paths**
- D. materialized: view

Answer: B,C

Explanation:

model-paths and test-paths specify project directory structures- Options C would be within a model configuration, and D could be in a profile.

NEW QUESTION # 111

You're expanding your dbt deployment to support a new regional team based in a different geographic location from your main development team. They'll access the same production data in your centralized data warehouse. Which factors need careful consideration?

- **A. All of the above.**

- B. Controlling dbt access based on team membership and geographic location to align with security policies.
- C. Data residency regulations that might restrict the flow or storage of data between geographic regions.
- D. Potential network latency affecting performance of dbt runs for the geographically separate team.

Answer: A

Explanation:

A: Data regulations can heavily influence architecture and permissions. B: Network performance impacts user experience and execution times. C: Access control likely needs to consider region-specific restrictions.

NEW QUESTION # 112

(Multiple Select)

- A. Columns intended to contain timestamps actually store valid timestamp values.
- B. Foreign key relationships are consistently enforced.
- C. Tables intended to be empty as part of a process truly have zero records.

Answer: A,B,C

Explanation:

Each of these represents a common assumption about source data quality, and any violation could break your dbt models or produce incorrect results.

NEW QUESTION # 113
