100% Pass DEP-2025 - Accurate Exam Questions Apple Deployment and Management Exam Vce

For your convenience, NewPassLeader has prepared Apple Deployment and Management Exam exam study material based on a real exam syllabus to help candidates go through their exams. Candidates who are preparing for the DEP-2025 Exam suffer greatly in their search for preparation material. You would not need anything else if you prepare for the exam with our DEP-2025 Exam Questions.

Apple Deployment and Management Exam Sample Questions (Q224-Q229):

NEW QUESTION # 224

What do you need for account-driven Device Enrollment?

- A. Google Workspace or Microsoft Entra ID
- B. A personal Apple Account
- C. A supervised device
- **D. A Managed Apple Account**

Answer: D

Explanation:

Apple's account-driven enrollment allows users to self-enroll devices into MDM without the need for profiles distributed manually. To use this enrollment method, Apple requires the user to sign in with a Managed Apple Account created in Apple Business Manager or Apple School Manager. When the user enters their credentials, the device recognizes the account as managed and begins the enrollment process. Apple Learning highlights that this workflow simplifies enrollment for end users while ensuring the device is linked to organizational management. Supervision is not a prerequisite here, and personal Apple IDs are not eligible. Identity providers like Google Workspace or Microsoft Entra ID may provide federated authentication for the Managed Apple Account, but the account itself must exist as a managed entity in ABM or ASM.

References: Apple Platform Deployment - "Account-driven enrollment for devices."

NEW QUESTION # 225

Which feature allows IT administrators to manage Bluetooth settings on a device?

- A. MDM
- B. Find My
- C. iCloud
- **D. Configuration profiles**

Answer: D

Explanation:

Configuration profiles allow IT administrators to manage Bluetooth settings, such as disabling Bluetooth entirely or restricting pairing with specific devices, enhancing security and compliance. These profiles are deployed via MDM or manually. Find My (option B) and iCloud (option C) are unrelated to Bluetooth management. MDM (option D) delivers profiles, but the profiles define the settings. The Apple Platform Deployment Guide details Bluetooth configuration via profiles.

NEW QUESTION # 226

A Mac user deferred a managed software update after the deadline for the update passed. What happens next?

- A. The user receives notifications that the update is overdue and needs immediate attention
- B. All update notifications are disabled to reduce user distraction
- C. The user receives a reminder that they can still defer the update for up to 30 days
- **D. The update automatically installs without the user's intervention if the deadline is missed**

Answer: D

Explanation:

Post-deadline, updates install automatically. The Mobile Device Management Protocol Reference states, "If a user defers a managed software update past the MDM-enforced deadline, macOS will automatically install it to ensure compliance." Reference:

Mobile Device Management Protocol Reference, "Software Updates" section.

macOS Deployment Reference, "Update Enforcement" section.

NEW QUESTION # 227

Which MDM feature skips all Setup Assistant panes automatically on a Mac that's plugged into Ethernet?

- A. Fast Track
- B. Quick Setup
- C. Return to Service
- **D. Auto Advance**

Answer: D

Explanation:

Apple introduced Auto Advance for macOS as a way to completely automate Setup Assistant. When a Mac is connected to Ethernet and assigned to an MDM server through Automated Device Enrollment, Auto Advance skips every Setup Assistant pane, including language, region, Apple ID, and account creation. Apple Learning explains that this feature is particularly useful for enterprise deployments, labs, or shared environments where IT does not want users making configuration choices. Auto Advance ensures the Mac enrolls into MDM, applies configuration profiles, and lands directly on the desktop with minimal interaction. Options like Quick Setup or Fast Track are not actual Apple deployment features, while Return to Service is related to iOS/iPadOS redeployment workflows, not Mac. Auto Advance is the verified method to bypass all Setup Assistant panes seamlessly. References: Apple Platform Deployment - "Automate Setup Assistant with Auto Advance."

NEW QUESTION # 228

Which feature prevents a wiped device from being reactivated without authorization?

- A. MDM
- **B. Activation Lock**
- C. Find My
- D. iCloud

Answer: B

Explanation:

Activation Lock is a security feature tied to a user's Apple ID or Managed Apple ID that prevents a wiped device from being reactivated without the original credentials or organizational authorization (via MDM or ABM/ASM). It's automatically enabled when Find My is active on a device with an Apple ID. Find My (option B) enables locating and wiping but doesn't enforce reactivation protection alone. MDM (option C) can manage Activation Lock but isn't the feature itself. iCloud (option D) supports Activation Lock but isn't the feature. The Apple Platform Security Guide explains Activation Lock's role in theft deterrence.

NEW QUESTION # 229

.....

The page of our DEP-2025 simulating materials provides demo which are sample questions. The purpose of providing demo is to let customers understand our part of the topic and what is the form of our DEP-2025 study materials when it is opened? In our minds, these two things are that customers who care about the DEP-2025 Exam may be concerned about most. We will give you our software which is a clickable website that you can visit the product page.
