The Plat-Arch-202 PC test engine is suitable for any windows system, while the Plat-Arch-202 online test engine can be installed on any electronic device. All the Plat-Arch-202 exam content are the same and valid for different formats.

Salesforce Certified Platform Development Lifecycle and Deployment Architect Sample Questions (Q124-Q129):

NEW QUESTION # 124

The CTO at Universal Containers is complaining to the software development managers that he has no visibility of their teams' work status.

What two software development methodologies should an architect suggest to solve this issue, and why?

Choose 2 answers

- A. Kanban, because one of its basic elements is to make everything visible, creating consistent transparency of work items

- B. DevOps, because monitoring and logging practices help you stay informed of performance in real time.
- C. Waterfall, because it defines a fixed schedule and duration for each activity.
- D. Scrum, because openness is one of the five core Scrum values.

Answer: A,D

NEW QUESTION # 125

Universal Containers (UC) has recently acquired other companies that have their own Salesforce orgs. These companies have been merged as new UC business units.

The CEO has requested an architect to review the org strategy, taking into consideration two main factors:

* The CEO wants business process standardization among all business units.

* Business process integration is not required as the different business units have different customers and expertise.

Which org strategy should the architect recommend in this scenario, and why?

- A. A Multi-org strategy, as they could deploy a common managed package into the orgs of the different business units.
- B. Multi-org strategy, as it is uncommon for the diversified business units to get used to working in the same space as the other business units.
- C. Single-org strategy, as the high level of business process standardization will be easier to implement in a single org.
- D. Single-org strategy, as costs increase as the number of orgs go up.

Answer: A

NEW QUESTION # 126

Which two ways should a developer working on a data loading integration that operates between different Salesforce environments insert multiple related records in one call or transaction?

Choose 2 answers

- A. REST API Composite Request
- B. REST API SObject Tree Request
- C. Bulk API 2.0
- D. Streaming API

Answer: A,B

NEW QUESTION # 127

Universal Containers business users often observe that newly released features are resulting in other previously existing and stable functionality being broken. Which approach should an Architect recommend to prevent regression?

- A. Freeze development of new features and re -architect the system to remove the bugs
- B. Utilize unit and functional test automation as part of a continuous integration strategy
- C. Utilize the developer console to run test suites for the affected functionality
- D. Utilize Salesforce Apex Hammer to automatically test all functionality

Answer: B

NEW QUESTION # 128

Universal containers have recently replaced a custom service center application with Salesforce Service Cloud. Administrators are now confused about which fields and classes are actively being utilized and how future implementations can be maintained. Choose 2 answers

- A. Create a governance framework focused on high-level business strategy and goals.
- B. Create an adoption plan for end users using Salesforce dashboards and reports.
- C. Create a design standard requiring integration to use declarative configurations patterns
- D. Create a governance process requiring all projects to create project deliverable documentation.
- E. Create a standard method for deprecating classes and fields using design standards.

Answer: D,E

NEW QUESTION # 129

.....

In the present market you are hard to buy the valid study materials which are used to prepare the Plat-Arch-202 certification like our Plat-Arch-202 latest question.
