Latest Professional-Cloud-Database-Engineer Braindumps Pdf & Latest Professional-Cloud-Database-Engineer Test Cram

Our Professional-Cloud-Database-Engineer exam questions are supposed to help you pass the exam smoothly. Don't worry about channels to the best Professional-Cloud-Database-Engineer study materials so many exam candidates admire our generosity of offering help for them. Up to now, no one has ever challenged our leading position of this area. The existence of our Professional-Cloud-Database-Engineer learning guide is regarded as in favor of your efficiency of passing the exam. And the pass rate of our Professional-Cloud-Database-Engineer training braindumps is high as 98% to 100%.

Google Professional-Cloud-Database-Engineer Certification Exam is designed to test the skills and knowledge of professionals who work with databases on the Google Cloud Platform. It is intended for individuals who have experience in designing, developing, and managing databases, as well as those who are skilled in using Google Cloud's database services.

Google Professional-Cloud-Database-Engineer certification is highly valued in the IT industry and can lead to better job opportunities and higher salaries. It demonstrates a candidate's ability to design and manage databases on the cloud using Google Cloud Platform, which is becoming increasingly popular among organizations looking to move their data to the cloud. Additionally, the certification validates the candidate's expertise in database management and can help them stand out in a crowded job market.

Newest Latest Professional-Cloud-Database-Engineer Braindumps Pdf Help You to Get Acquainted with Real Professional-Cloud-Database-Engineer Exam Simulation

First and foremost, in order to cater to the different needs of people from different countries in the international market, we have prepared three kinds of versions of our Professional-Cloud-Database-Engineer learning questions in this website. Second, we can assure you that you will get the latest version of our Professional-Cloud-Database-Engineer Training Materials for free from our company in the whole year after payment on Professional-Cloud-Database-Engineer practice materials. Last but not least, we will provide the most considerate after sale service on our Professional-Cloud-Database-Engineer study guide for our customers in twenty four hours a day seven days a week.

Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q90-Q95):

NEW QUESTION # 90
Your organization has a security policy to ensure that all Cloud SQL for PostgreSQL databases are secure. You want to protect sensitive data by using a key that meets specific locality or residency requirements. Your organization needs to control the key's lifecycle activities. You need to ensure that data is encrypted at rest and in transit. What should you do?

- A. Create the database with Google-managed encryption keys.
- B. Create the database with customer-managed encryption keys.
- C. Create the database persistent disk with customer-managed encryption keys.
- D. Create the database persistent disk with Google-managed encryption keys.

Answer: C

NEW QUESTION # 91
You are deploying a new Cloud SQL instance on Google Cloud using the Cloud SQL Auth proxy. You have identified snippets of application code that need to access the new Cloud SQL instance. The snippets reside and execute on an application server running on a Compute Engine machine. You want to follow Google- recommended practices to set up Identity and Access Management (IAM) as quickly and securely as possible.
What should you do?

- A. For each application code, set up a common shared user account.
- B. For each application code, set up a dedicated user account.
- C. For the application server, set up a common shared user account.
- D. For the application server, set up a service account.

Answer: D

Explanation:
https://cloud.google.com/sql/docs/mysql/sql-proxy#using-a-service-account

NEW QUESTION # 92
You are managing two different applications: Order Management and Sales Reporting. Both applications interact with the same Cloud SQL for MySQL database. The Order Management application reads and writes to the database 24/7, but the Sales Reporting application is read-only. Both applications need the latest data.
You need to ensure that the Performance of the Order Management application is not affected by the Sales Reporting application. What should you do?

- A. Use a Cloud SQL federated query for the Sales Reporting application.
- B. Create two separate databases in the instance, and perform dual writes from the Order Management application.
- C. Queue up all the requested reports in PubSub, and execute the reports at night.
- D. Create a read replica for the Sales Reporting application.

Answer: D

NEW QUESTION # 93
You are migrating an on-premises application to Google Cloud. The application requires a high availability (HA) PostgreSQL database to support business-critical functions. Your company's disaster recovery strategy requires a recovery time objective (RTO) and recovery point objective (RPO) within 30 minutes of failure. You plan to use a Google Cloud managed service. What should you do to maximize uptime for your application?

- A. Deploy Cloud SQL for PostgreSQL in a regional configuration with HA enabled. Create a cross-region read replica, and promote the read replica as the primary node for disaster recovery.
- B. Migrate the PostgreSQL database to multi-regional Cloud Spanner so that a single region outage will not affect your application. Update the schema to support Cloud Spanner data types, and refactor the application.
- C. Deploy Cloud SQL for PostgreSQL in a regional configuration with HA enabled. Take periodic backups, and use this backup to restore to a new Cloud SQL for PostgreSQL instance in another region during a disaster recovery event.
- D. Deploy Cloud SQL for PostgreSQL in a regional configuration. Create a read replica in a different zone in the same region and a read replica in another region for disaster recovery.

Answer: A

Explanation:
The best answer is deploy an HA configuration and have a read replica you could promote to the primary in a different region

NEW QUESTION # 94
You are managing a set of Cloud SQL databases in Google Cloud. Regulations require that database backups reside in the region where the database is created. You want to minimize operational costs and administrative effort. What should you do?

- A. Configure the automated backups to use a regional Cloud Storage bucket as a custom location.
- B. Disable automated backups, and create an on-demand backup routine to a regional Cloud Storage bucket.
- C. Use the default configuration for the automated backups location.
- D. Disable automated backups, and configure serverless exports to a regional Cloud Storage bucket.

Answer: B

NEW QUESTION # 95
......

We hope that you can use your time as much as possible for learning on the Professional-Cloud-Database-Engineer practice questions. So we have considered every detail of the Professional-Cloud-Database-Engineer study guide to remove all unnecessary programs. If you try to download our Professional-Cloud-Database-Engineer study materials, you will find that they are so efficient! And even you free download the demos on the website, you can feel the convenience and efficiency. It is simple and easy to study with our Professional-Cloud-Database-Engineer learning braindumps.
