

Juniper JN0-683 Latest Practice Materials, JN0-683 Learning Materials

P.S. Free 2026 Juniper JN0-683 dumps are available on Google Drive shared by BraindumpQuiz: https://drive.google.com/open?id=1IZ_TeFIJto30gyPskhrot-QaD21zMX92

All contents of the JN0-683 exam questions are masterpieces from experts who imparted essence of the exam into our JN0-683 study prep. So our high quality and high efficiency JN0-683 practice materials conciliate wide acceptance around the world. By incubating all useful content JN0-683 training engine get passing rate from former exam candidates of 98 which evince our accuracy rate and proficiency.

Users are buying something online (such as JN0-683 learning materials), always want vendors to provide a fast and convenient sourcing channel to better ensure the user's use. Because without a quick purchase process, users of our JN0-683 learning materials will not be able to quickly start their own review program. So, our company employs many experts to design a fast sourcing channel for our JN0-683 Learning Materials. All users can implement fast purchase and use our learning materials.

JN0-683 Learning Materials, Exam Topics JN0-683 Pdf

There are a lot of leading experts and professors in different field in our company. The first duty of these leading experts and professors is to compile the JN0-683 exam questions. In order to meet the needs of all customers, the team of the experts in our

company has done the research of the JN0-683 Study Materials in the past years. And they have considered every detail of the JN0-683 practice braindumps to be perfect. That is why our JN0-683 learning guide enjoys the best quality in the market!

Juniper Data Center, Professional (JNCIP-DC) Sample Questions (Q32-Q37):

NEW QUESTION # 32

What are two supported methods for exporting data when using the Junos telemetry interface?
(Choose two.)

- A. using SNMP
- B. using gRPC
- C. using REST
- D. using UDP

Answer: B,D

Explanation:

The Junos Telemetry Interface (JTI) supports streaming real-time data from devices using modern, efficient protocols: using UDP

JTI supports UDP-based streaming, often with Juniper's JTIs streaming protocol (for low-latency telemetry).

using gRPC

JTI supports gRPC/gNMI for structured, reliable telemetry export.

NEW QUESTION # 33

Which two requirements are needed to facilitate over-the-top DCI? (Choose two.)

- A. EVPN route-types must be advertised to all leaf devices.
- B. All spine loopbacks in each network must be reachable.
- C. EVPN route-types must be advertised to all spine devices.
- D. All leaf VTEPs in each network must be reachable.

Answer: A,D

Explanation:

All leaf VTEPs in each network must be reachable: In over-the-top Data Center Interconnect (DCI) using EVPN-VXLAN, the leaf VTEPs (VXLAN Tunnel Endpoints) in both data centers need to be reachable from each other. This is crucial for the successful exchange of VXLAN traffic and the proper operation of the overlay network between the data centers.

EVPN route-types must be advertised to all leaf devices: To extend Layer 2 and Layer 3 services seamlessly across data centers in OTT DCI, EVPN route types must be advertised to all leaf devices to maintain the unified control plane and support endpoint reachability.

NEW QUESTION # 34

Which two statements are true about IP fabrics using unnumbered BGP? (Choose two.)

- A. Unnumbered BGP peering automatically provisions IPv4 peering.
- B. Unnumbered BGP peering automatically provisions IPv6 peering.
- C. Unnumbered BGP requires that family inet is configured on each interface.
- D. Unnumbered BGP requires that family inet6 is configured on each interface.

Answer: A,C

Explanation:

* Understanding Unnumbered BGP:

* Unnumbered BGP (Border Gateway Protocol) allows BGP peering between routers without assigning specific IP addresses to the interfaces. Instead, it uses the loopback address or another router identifier for the BGP session, making IP address management more straightforward in large-scale networks.

* Family inet Configuration:

* Option C: The family inet configuration is required on each interface involved in unnumbered BGP peering to support IPv4 address families. This ensures that IPv4 peering sessions can be established between devices.

* Automatic IPv4 Peering:

* Option D: Unnumbered BGP peering automatically provisions IPv4 peering sessions. This simplifies the configuration by eliminating the need to manually assign and manage IP addresses for BGP peering.

Conclusion:

* Option C: Correct- Unnumbered BGP requires the family inet configuration for IPv4.

* Option D: Correct- Unnumbered BGP automatically provisions IPv4 peering, simplifying setup.

NEW QUESTION # 35

Exhibit.

```
user@switch> ping overlay tunnel-type vxlan vni 100 tunnel-src 192.168.2.10 tunnel-dst 192.168.2.20
mac 00:00:5E:00:53:cc count 1
ping-overlay protocol vxlan
  vni 100
    tunnel src ip 192.168.2.10
    tunnel dst ip 192.168.2.20
    mac address 00:00:5E:00:53:cc
    count 5
    ttl 255

WARNING: following hash-parameters are missing -
  hash computation may not succeed

  end-host smac
  end-host dmac
  end-host src ip
  end-host dst ip
  end-host protocol
  end-host 14-src-port
  end-host 14-dst-port
Request for seq 1, to 192.168.2.20, at 09-24 23:53:54 PDT.089 msecs
Response for seq 1, from 192.168.2.20, at 09-24 23:53:54 PDT.089 msecs, rtt 6 msecs
Overlay-segment present at RVTEP 192.168.2.20
End-System Not Present
```

Referring to the exhibit, which statement is correct?

- A. VNI 100 is not configured on the remote VTEP.
- B. The MAC address is known but not reachable by the remote VTEP
- C. The remote VTEP is not responding.
- D. The MAC address is unknown and not in the forwarding table of the remote VTEP.

Answer: D

Explanation:

* Analyzing the Exhibit Output:

* The command ping overlay tunnel-type vxlan is used to test the VXLAN tunnel between two VTEPs (VXLAN Tunnel Endpoints). The output shows a warning about missing hash parameters, but more importantly, it displays the result: End-System Not Present.

* Understanding the Response:

* The message End-System Not Present indicates that the remote VTEP (192.168.2.20) did not find the MAC address 00:00:5E:00:53:CC in its forwarding table. This typically means that the MAC address is unknown to the remote VTEP, and as a result, it could not forward the packet to the intended destination.

Conclusion:

* Option B: Correct- The MAC address is unknown and is not in the forwarding table of the remote VTEP, which is why the system reports that the "End-System" is not present.

NEW QUESTION # 36

Why is a designated forwarder required in a multihomed CE-to-PE VXLAN environment using EVPN signalling?

- A. The designated forwarder is required to prevent flooding of MAC addresses to multihomed hosts.

- B. The designated forwarder is required to prevent a traffic storm from being received on multihomed hosts.
- **C. The designated forwarder is required to prevent duplicate packets from being received on multihomed hosts.**
- D. The designated forwarder is required to prevent packets from looping between the PEs.

Answer: C

Explanation:

* Understanding Multihomed CE-to-PE VXLAN Environment:

* In a VXLAN environment using EVPN signaling, multiple PEs (Provider Edge devices) can be connected to the same CE (Customer Edge device). This setup is referred to as multihoming, where a CE device has multiple connections to the network to ensure redundancy and load balancing.

* Role of the Designated Forwarder:

* The designated forwarder (DF) is a mechanism used in EVPN to manage the forwarding of broadcast, unknown unicast, and multicast (BUM) traffic in a multihomed environment. The DF is selected to ensure that only one of the PEs forwards this type of traffic to the CE, preventing loops and unnecessary duplicate packets.

* Avoiding Duplicate Packets:

* Without a designated forwarder, all PEs connected to a multihomed CE could potentially forward the same packet to the CE, resulting in duplicate packets. This duplication can cause issues with packet processing on the CE, leading to inefficiencies and potential network problems.

Conclusion:

* Option D: Correct- The designated forwarder is essential to prevent duplicate packets from being received on multihomed hosts, ensuring that only one PE forwards BUM traffic to the CE.

NEW QUESTION # 37

.....

our company made our JN0-683 practice guide with accountability. Our JN0-683 training dumps are made by our JN0-683 exam questions responsible company which means you can gain many other benefits as well. We offer free demos of our for your reference, and send you the new updates if our experts make them freely. What is more, we give some favorable discount on our JN0-683 Study Materials from time to time, which mean that you can have more preferable price to buy our products.

JN0-683 Learning Materials: <https://www.braindumpquiz.com/JN0-683-exam-material.html>

JN0-683 certification is very helpful, recognized as a valid qualification in this industry, Juniper JN0-683 Latest Practice Materials There are 24/7 customer assisting to support you when you are looking for our help, Juniper JN0-683 Latest Practice Materials As old saying goes, time and tide wait no man, Juniper JN0-683 Latest Practice Materials The language is simple and easy to be understood, The top Juniper JN0-683 certification benefits are proven skills, more career opportunities, an increase in salary, instant promotion, and membership in professional community groups.

Transforming and Cropping the Layers, You can open the Play Books JN0-683 app by tapping the Apps icon on the home screen and then swiping from right to left to view the second page in the Apps screen.

High-quality JN0-683 Latest Practice Materials & Effective JN0-683 Learning Materials & Practical Exam Topics JN0-683 Pdf

JN0-683 Certification is very helpful, recognized as a valid qualification in this industry, There are 24/7 customer assisting to support you when you are looking for our help.

As old saying goes, time and tide wait no man, The language is simple and easy to be understood, The top Juniper JN0-683 certification benefits are proven skills, more career opportunities, JN0-683 Actual Exam Dumps an increase in salary, instant promotion, and membership in professional community groups.
