

Updated AZ-120 Exam Questions–Key to Your Career Growth

How to Prepare for the AZ-120 Exam: Expert Tips and Strategies

AZ-120 Exam Dumps However, it is crucial to distinguish between ethical and unethical use of exam dumps. When used responsibly and as a supplementary resource, exam dumps can enhance the learning experience, serving as a diagnostic tool rather than a shortcut to certification. Integrating Exam Dumps into Your Study Plan: To make the most of AZ-120 exam dump resources, it's essential to integrate them into a well-structured study plan. Begin by thoroughly understanding the exam objectives outlined by the certification authority. Break down the domains and allocate time to each based on their weightage in the exam. Consider supplementing the exam dumps with official documentation, textbooks, online courses, and practical hands-on experience. A holistic approach ensures a comprehensive understanding of the subject matter. Active Learning Strategies: Mere passive reading of an exam dump is unlikely to yield optimal results.

7 Key Reasons to Incorporate AZ-120 Exam Dumps in Your Study Plan

Adopt an active learning approach by engaging with the material dynamically. Start by working through a set of questions from the exam dump, and critically assess your answers. Understand the underlying concepts, principles, and methodologies behind each question to reinforce your knowledge. Create flashcards or summary notes based on key points **AZ-120 Dumps** extracted from the exam dump. This aids in quick reviews and reinforces your understanding of essential concepts. Simulating Exam Conditions: One of the primary advantages of utilizing exam dumps is the ability to simulate exam conditions. Dedicate specific time slots to complete practice exams using the dump. This not only helps in improving time management but also provides a realistic preview of the exam environment.

The software keeps track of the previous Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) practice exam attempts and shows the changes of each attempt. You don't need to wait days or weeks to get your performance report. The software displays the result of the Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) practice test immediately, which is an excellent way to understand which area needs more attention.

Microsoft AZ-120 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Design and Implement High Availability and Disaster Recovery (HADR): This topic prepares Microsoft Solution Architects to design and implement robust high availability and disaster recovery solutions for SAP workloads on Azure virtual machines. The focus is on maintaining continuous availability and mitigating potential disruptions, aligning with enterprise standards for business continuity.
Topic 2	<ul style="list-style-type: none">Design and Implement an Infrastructure to Support SAP Workloads on Azure: In this topic, Microsoft Solution Architects master the design and implementation of compute solutions, networking configurations, and storage solutions specific to SAP workloads on Azure virtual machines. By addressing essential infrastructure components, this topic ensures the ability to build scalable, reliable environments tailored to SAP workload demands.

Topic 3	<ul style="list-style-type: none"> • Migrate SAP Workloads to Azure: This topic equips Microsoft Solution Architects with expertise in identifying the requirements for target infrastructure, designing Azure environments tailored for SAP workloads, and implementing integration with SAP RISE. The focus is on guiding the target audience to effectively assess existing SAP workloads and ensure seamless migration to Azure while maintaining compatibility and performance benchmarks.
Topic 4	<ul style="list-style-type: none"> • Maintain SAP Workloads on Azure: This topic enables Microsoft Solution Architects to optimize performance and costs while monitoring and maintaining SAP workloads on Azure. Practical insights into proactive maintenance and performance tuning ensure consistent and efficient workload operations in Azure environments.

100% Pass Quiz 2026 Professional Microsoft AZ-120: Planning and Administering Microsoft Azure for SAP Workloads Exam Certification Cost

TheExam-Killer is one of the leading and reliable platforms that has been helping Planning and Administering Microsoft Azure for SAP Workloads AZ-120 exam candidates in their preparation. With high pass rate and Planning and Administering Microsoft Azure for SAP Workloads AZ-120 at a preferential price. To enhance your competitiveness in your field.

Microsoft AZ-120 Exam covers a wide range of topics, including planning and deploying Azure for SAP workloads, configuring Azure infrastructure for SAP workloads, managing and monitoring SAP workloads on Azure, and optimizing the performance of SAP workloads on Azure. Candidates are expected to have a deep understanding of SAP architecture and operations, as well as experience with Azure services such as virtual machines, storage, networking, and security. AZ-120 exam consists of 40-60 multiple-choice questions and is available in multiple languages.

Microsoft AZ-120 exam is an excellent certification for IT professionals who want to showcase their expertise in managing SAP workloads in the Azure cloud environment. Planning and Administering Microsoft Azure for SAP Workloads certification validates the skills and knowledge required to perform various tasks related to SAP workloads in Azure, including deploying SAP systems, managing Azure resources, and monitoring SAP workloads. Planning and Administering Microsoft Azure for SAP Workloads certification is also beneficial for organizations that are looking to migrate their SAP systems to the Azure cloud and need skilled professionals to manage their systems.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q118-Q123):

NEW QUESTION # 118

You have an Azure Active Directory (Azure AD) tenant and an SAP Cloud Platform tenant.

You need to ensure that users sign in automatically by using their Azure AD accounts when they connect to SAP Cloud Platform. Which four actions should you perform in sequence? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION # 119

You plan to migrate an SAP environment to Azure.

You need to create a design to facilitate end-user access to SAP applications over the Internet, while restricting user access to the virtual machines of the SAP application servers.

What should you include in the design?

- A. Configure a public IP address for each SAP application server
- B. Deploy an internal Azure Standard Load Balancer for incoming connections
- C. Configure point-to-site VPN connections for each user

- **D. Use an SAP Web Dispatcher to route all incoming connections**

Answer: D

Explanation:

- * A public internet user can reach the SAP Web-Dispatcher over port 443
- * The SAP Web-Dispatcher can reach the SAP Application server over port 443
- * The App Subnet accepts traffic on port 443 from 10.0.0.0/24
- * The SAP Application server sends traffic on port 30015 to the SAP DB server
- * The DB subnet accepts traffic on port 30015 from 10.0.1.0/24.
- * Public Internet Access is blocked on both App Subnet and DB Subnet.

Topic 1, Litware, inc

Case Study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all question include on this exam in the time provided.

To answer the question included in a case study, you will need to reference information that is provided in the case study. Case studies might contain and other resources that provide information about the scenario that is describe in the case study. Each question is independent of the other question in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answer and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To Start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such the content requirements, existing environment, and problem statements, if the case study has an All Information tab, note that the information displayed its identical to the information displayed on the subsequence tabs. When you are ready to answer a question click the Question button to return to the question.

Overview

Litware, inc. is an international manufacturing company that has 3,000 employees.

Litware has two main offices. The offices are located in Miami, FL, and Madrid Spain.

Existing Environment

Infrastructure

Litware currently uses a third-party provider to host a datacenter in Miami and a disaster recovery datacenter in Chicago, it. The network contains an Active Directory domain named litware.com. Litware has two third-party applications hosted in Azure. Litware already implemented a site-to-site VPN connection between the on-premises network and Azure.

SAP Environment

Litware currently runs the following SAP products:

- * Enhancement Pack 6 for SAP ERP Central Component 6.0 (SAP ECC 6.0)
- * SAP Extended Warehouse Management (SAP EWM)
- * SAP Business Warehouse (SAP BW)
- * SAP NetWeaver Process Integration (PI)
- * SAP Solution Manager

All users run on the Windows Server platform. All databases use Microsoft SQL Server. Currently, you have 20 production servers.

You have 30 non-production servers including five testing severs, five development servers, five quality assurance (QA) servers, and 15 pre=production servers.

Currently, all SAP applications are in the litware.com domain.

Problem Statements

The current version of SAP ECC has a transaction that, when run in batches overnight, tables eight hours to complete. You confirm that upgrading to SAP Business Suite on HANA will improve performance because of code changes and the SAP HANA database platform.

Litware is dissatisfied with the performance of its current hosted infrastructure vendor. Litware experienced several hardware failures and the vendor struggled to adequately its 24/7 business operation.

Business Goals

Litware identifies the following business goals:

- * Increase the performance of SAP ECC application by moving to SAP HANA. All other database will remain on SQL Server.
- * Move away from the current infrastructure vendor to increase the stability and availability of the SAP services.
- * Use the new Environment, Health and Safety (EH&S) in Recipe Management function.
- * Ensure that any migration activities can be completed within a 48-hour period during a weekend.

Planned Changes

Litware identifies the following planned changes:

- * Migrate SAP to Azure.
- * Upgrade and migrate SAP ECC to SAP business Suite on HANA Enhancement Pack 8.

Technical Requirements

Litware identifies the following technical requirements:

- * Implement automated backups.
- * Support load testing during the migrate.
- * Identify opportunities to reduce costs during the migration.
- * Continue to use the Litware.com domain for all SAP landscapes.
- * Ensure that all SAP applications and databases are highly available.
- * Remove all SAP components from the on-premises network once the migrate is complete.
- * Minimize the purchase of additional SAP licenses. SAP HANA license were already purchased.
- * Ensure that SAP can provide technical support for all the SAP landscapes deployed to Azure.

NEW QUESTION # 120

You have an SAP landscape on Azure.

You plan to deploy a new SAP application server by using an Azure Resource Manager template.

You need to ensure that all new servers are deployed with Azure Disk Encryption enabled.

How should you complete the relevant component of the template? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐
