CompTIA Project+ Certification Exam certification helps individuals to enhance their project management skills and is highly valued by employers in various industries such as IT, healthcare, finance, and telecommunications.

CompTIA Project+ Certification Exam Sample Questions (Q38-Q43):

NEW QUESTION # 38

A company is creating a new technology. The company is concerned that the project details could be compromised if a cloud service is used, and another company could launch the technology before the current projected delivery. Which of the following can the company do to minimize this risk?

- A. Ensure all team members have signed a non-disclosure agreement.
- B. Use an on-premises project management scheduling tool.
- C. Mandate overtime to get the project completed sooner.
- **D. Limit access to members of the project team.**

Answer: D

Explanation:

Limiting access to members of the project team is a way to minimize the risk of compromising the project details if a cloud service is used. This means that only authorized and trusted individuals can access, view, modify, or share the project information stored in the cloud. Limiting access can prevent unauthorized access, data leakage, cyberattacks, or espionage from external parties who might want to steal or sabotage the new technology. Limiting access can also reduce the risk of human error, negligence, or misconduct from internal parties who might accidentally or intentionally expose or misuse the project information¹²³. NEW QUESTION # 39

As a result of an approved change, the project manager updates the project plan with the newest project end date. Which of the following change control processes should the project manager complete NEXT?

- A. Implement the change.
- B. Conduct an impact assessment.
- C. Document the request in the change control log.
- **D. Communicate the change deployment.**

Answer: D

Explanation:

The project manager should communicate the change deployment next after updating the project plan with the newest project end date as a result of an approved change. Communicating the change deployment involves informing all relevant parties about when and how the change will be implemented and what are the expected outcomes and benefits. Communicating the change deployment can help to ensure alignment, readiness, and support for the change and avoid any confusion or resistance.

NEW QUESTION # 40

A project team evaluated the performance of a new reporting system and the quantity of queries to be processed during predetermined time stamps.

Which of the following is the current status of the process?

- **A. The process is out of control and should be revised.**
- B. Based on the rule of seven, the process is under control
- C. The goal should be adjusted since most of the data points are close to the lower limit.
- D. The amount of data is insufficient to determine if quality is low.

Answer: A

Explanation:

The process is out of control and should be revised. The project manager can use the rule of seven to determine the status of the process based on the control chart. The rule of seven states that if seven or more consecutive measurements fall on one side of the mean that there's an assignable cause that needs investigation. In this case, the last seven data points are all below the mean, which

indicates that the process is out of control and in need of adjustment¹²

NEW QUESTION # 41

A project manager prefers to have immediate contact with team members because it allows for faster response times and more interactive discussions. Which of the following communication methods should the project manager use?

- A. Informal
- **B. Synchronous**
- C. Formal
- D. Asynchronous

Answer: B

Explanation:

The project manager should use synchronous communication methods if they prefer to have immediate contact with team members. Synchronous communication is a type of communication that occurs in real time and allows for faster response times and more interactive discussions. Examples of synchronous communication methods include phone calls, video conferences, instant messaging, and face-to-face meetings. Synchronous communication can help to build rapport, clarify doubts, and resolve issues quickly among team members.

Synchronous communication should be used when the project manager prefers to have immediate contact with team members. Synchronous communication allows for real-time interaction and feedback, enabling faster response times and more interactive discussions. References: CompTIA Project+ Study Guide Section 3.1.3

NEW QUESTION # 42

Which of the following software programs would be best to use to store information related to business transactions?

- A. Customer relationship management
- B. Content management system
- C. Record management system
- **D. Enterprise resource planning**

Answer: D

Explanation:

Enterprise resource planning (ERP) software is a type of software that integrates various business functions and processes, such as accounting, finance, inventory, sales, purchasing, human resources, and more. ERP software helps businesses store, organize, and manage information related to business transactions, such as invoices, payments, orders, receipts, and reports. ERP software also provides real-time data analysis, reporting, and forecasting capabilities¹².
