They should also have experience in configuring and customizing Salesforce to meet various business needs. CRT-211 exam consists of 60 multiple-choice questions, and candidates are given 105 minutes to complete it. To pass the exam, candidates need to score at least 68%, and the certification is valid for two years. Overall, the CRT-211 Certification is an excellent way for Salesforce professionals to demonstrate their advanced knowledge and skills in administering and configuring Salesforce.

Salesforce Certification Preparation for Advanced Administrator Sample Questions (Q209-Q214):

NEW QUESTION # 209

Ursa Major Solar has a global customer base. Recent issues with customs have greatly delayed shipping to Canadian customers. While the Country field is already on the page layout, the sales team wants Canadian customers highlighted as a potential challenge for fulfillment until the shipping issue is resolved. How should the administrator solve this issue?

- A. Add a rich text component to the Lightning page. Use conditional visibility to only show the component if the account is Canadian.
- **B. Create an in-app guidance prompt for Canadian records.**
- C. Modify the page layouts to move the Country field into its own section.
- D. Create a new record type and page layout for Canadian customers, ensuring their pages look different.

Answer: B

NEW QUESTION # 210

Northern Trail Outfitters has many users set up as system administrators to perform Salesforce Administration. Which two functions would a delegated administrator be able to perform in order to help the existing Salesforce Administrator? Choose 2 answers

- **A. Configure updates to sharing rules.**
- B. Make updates to permission set configurations.
- C. Manage custom objects and customize nearly every aspect.
- **D. Set up users and password management.**

Answer: A,D

Explanation:

Delegated administrators in Salesforce are designated users who are given limited administrative privileges to assist system administrators without having full access to all administrative functions. The two functions they can typically perform, which align with the permissions available to delegated admins, are:

Set up users and password management:

Delegated administrators can create and manage user accounts, which includes setting up new users, resetting passwords, and updating user details.

This is particularly useful for helping with user management tasks without providing full system administrator access.

Configure updates to sharing rules:

Delegated administrators can manage sharing rules within their specific groups or roles, which helps control access to records based on criteria set within the organization.

This level of access allows them to modify sharing rules to ensure appropriate data access without requiring full administrative control over all settings.

The other options listed are not within the scope of delegated administrator capabilities:

Manage custom objects and customize nearly every aspect: Delegated administrators do not have the ability to manage custom objects or perform extensive customization. These functions are reserved for system administrators with broader privileges.

Make updates to permission set configurations: Delegated administrators cannot create or modify permission sets. This is also restricted to full administrators, as it involves controlling access at a granular level across the org.

By utilizing delegated administrators for user and sharing rule management, organizations can maintain security and control while also sharing some administrative workload.

NEW QUESTION # 211

At Ursa Major Solar, several different planetary teams handle leads depending on which planet the lead is coming from. While most of the teams only need a few fields filled out to work the lead, the Jupiter team requires additional information to be filled out, such as which moon the lead is coming from. The administrator needs to automate which team is allocated the lead record based on the planet and ensure that every team has all of the information they need.

Which two features will satisfy these requirements?

Choose 2 answers

- A. Validation Rules
- **B. Assignment Rules**
- **C. Matching Rules**
- D. Workflow Rules

Answer: B,C

NEW QUESTION # 212

An administrator is trying to deploy a change set from a newly upgraded sandbox source org with new features to a destination sandbox org on a previous release. Some metadata in the change set cannot be deployed because they've changed between releases.

What should the administrator do to deploy the changes to a sandbox?

- A. Submit a ticket to Salesforce to update the source org to the latest release.
- **B. Create a new sandbox on the new release version and deploy the change set to the new org.**
- C. Make the changes manually through the user interface in the source org.
- D. Refresh the sandbox destination org and then deploy the change set.

Answer: B

Explanation:

Data Loader is a tool that allows administrators to import or export large amounts of data (more than 50,000 records) from or to Salesforce using CSV files. Data Loader can be used for inserting, updating, deleting, upserting, exporting, or extracting data. Bulk API is an API that allows administrators to process large batches of records asynchronously in the background. Bulk API can handle millions of records with high performance and minimal system resources. By using Data Loader with Bulk API enabled, an administrator can import a large amount of historical data (more than 100,000 records) from another system efficiently and securely.

NEW QUESTION # 213

The administrator of Universal Containers is testing an approval process in a recently refreshed Developer Pro sandbox and is finding that none of the notification emails are being sent to the approvers.

which two reasons could be the cause?

Choose 2 answers

- **A. The email addresses for the users are incorrect.**
- B. Workflow emails only work in Full sandboxes.
- C. HTML templates are unavailable in sandboxes.
- **D. The deliverability access level setting is incorrect.**

Answer: A,D
