BCS Foundation Certificate in Business Analysis is a certification exam designed to test the fundamental knowledge and understanding of business analysis practices. PC-BA-FBA-20 Exam serves as a starting point for individuals who are interested in pursuing a career in business analysis. BCS Foundation Certificate in Business Analysis V4.0 certification exam is designed to test the foundational knowledge that is necessary for a career in business analysis, including knowledge of key concepts, tools, techniques, and terminology.

BCS Foundation Certificate in Business Analysis V4.0 Sample Questions (Q70-Q75):

NEW QUESTION # 70
When running workshops it is useful to have someone with a role that includes specific responsibility for keeping attendees focused on achieving the objective of the workshop.
Which of the following terms describes this role?

- A. The arbitrator.
- B. The stakeholder.
- C. The facilitator.
- D. The scribe.

Answer: C

NEW QUESTION # 71
A software house is developing a software package specifically for hotel management. A business analyst has been employed because of her familiarity with the hotel industry.
Which of the following competencies has she been employed to bring to the project?

- A. Team leadership.
- B. Problem solving.
- C. Project management
- D. Domain knowledge.

Answer: D

NEW QUESTION # 72
The senior managers of an organisation recognise that they employ knowledgeable, committed staff.
Under which category of a SWOT will this be recorded?

- A. Opportunities.
- B. Threats.
- C. Weaknesses,
- D. Strengths.

Answer: D

NEW QUESTION # 73
Which of the following is NOT a diagrammatic documentation style for requirements?

- A. Business process

- B. Data model
- C. Use case model
- D. User story

Answer: D

Explanation:
Requirements documentation generally follows two main styles: text-based and diagrammatic (or model-based).
Data model (A), Use case model (C), and Business process models (D - e.g., UML Activity Diagrams or BPMN) are all forms of diagrammatic documentation, using standardised graphical notation to express requirements.
A User story (B) is a short, simple, text-based statement written in the format: "As a [role], I want [goal] so that [benefit]". It is a form of text-based requirement documentation used primarily in Agile environments, not a diagrammatic style.
(Reference: BCS Requirements Engineering - Documentation Styles)

NEW QUESTION # 74
The horizontal bar of the T-shaped professional describes what?

- A. The multi-disciplinary breadth of skill and knowledge
- B. The variants of a business analyst.
- C. The deep and specific domain knowledge
- D. Professional techniques of a business analyst.

Answer: A

Explanation:
The T-shaped professional model is used in business analysis to describe the ideal mix of skills and knowledge. The 'T' shape consists of a vertical bar and a horizontal bar. The vertical bar represents the deep and specific domain knowledge or core expertise (e.g., business analysis techniques, specific industry knowledge). The horizontal bar (the top of the 'T') represents the multi-disciplinary breadth of skill and knowledge that an individual can apply to various situations. This breadth includes soft skills like communication, facilitation, leadership, and a broad understanding of different business areas (like finance, operations, IT, and strategy). It is this breadth that allows the business analyst to collaborate effectively across different teams and disciplines, understand the context of the change, and recommend truly holistic solutions.
