

Fast Download C1000-173 Technical Training & Authoritative High C1000-173 Passing Score & Accurate IBM IBM Cloud Pak for Data v4.7 Architect

P.S. Free 2025 IBM C1000-173 dumps are available on Google Drive shared by Itcertmaster: https://drive.google.com/open?id=1YqbVuvkt6E26pH_kkq1mO95yteAL5iwT

For candidates who will buy C1000-173 training materials online, they may pay more attention to privacy protection. We respect your private information, and your personal identification information will be protected well if you choose us. Once the order finishes, your personal information will be concealed. In addition, C1000-173 Exam Dumps contain not only quality but also certain quantity. It will be enough for you to pass the exam. In order to build up your confidence for C1000-173 exam dumps, we are pass guarantee and money back guarantee, if you fail to pass the exam, we will give you full refund.

Windows, Mac, iOS, Android, and Linux support this C1000-173 practice exam. The desktop IBM Cloud Pak for Data v4.7 Architect (C1000-173) practice test software is similar to the web-based C1000-173 format as far as its features are concerned. But it works offline only on the Windows operating system. The offline C1000-173 Practice Exam can be taken easily just by just installing the software on your Windows laptop or computer. All three IBM Cloud Pak for Data v4.7 Architect (C1000-173) formats of Itcertmaster are according to the latest content of the IBM C1000-173 examination.

High C1000-173 Passing Score & New C1000-173 Exam Guide

Using Itcertmaster C1000-173 exam study material you will get a clear idea of the actual IBM C1000-173 test layout and types of C1000-173 exam questions. On the final IBM C1000-173 exam day, you will feel confident and perform better in the IBM C1000-173 certification test. IBM C1000-173 dumps come in three formats: IBM C1000-173 PDF Questions formats, Web-based and desktop IBM C1000-173 practice test software are the three best formats of Itcertmaster C1000-173 valid dumps. C1000-173 pdf dumps file is the more effective and fastest way to prepare for the IBM C1000-173 exam.

IBM C1000-173 Exam Syllabus Topics:

Topic	Details
Topic 1	Security Requirements: This domain targets a Security Architect and focuses on planning security for a Cloud Pak for Data deployment. It includes managing certificates that secure communications, identity management systems, and access and authorization controls to enforce secure and compliant user and service interactions. The auditing features and their integration with enterprise audit systems are crucial to ensure traceability and accountability. Asset interchange security involves safeguarding data movement between services.

Topic 2	Architect with Analytic Services: This domain targets a Data Analytics Architect and focuses on designing solutions using analytic components of Cloud Pak for Data. Architecting with DataStage involves creating data integration and ETL pipelines. Data Refinery architectures prepare and cleanse data for analysis. Db2 Big SQL solutions address querying large distributed data sets with SQL, facilitating analytics across diverse data sources.
Topic 3	Architect with AI Series: This section measures the skills of an AI Solution Architect and includes designing architectures for solutions involving various IBM Watson AI services. Architecting with Watson Assistant involves creating conversational AI interfaces. Watson Discovery solutions focus on building cognitive search and content analytics applications. Watson Pipelines solutions involve orchestrating data science workflows. Watson OpenScale architectures enable AI model monitoring and governance. Architecting with Match 360 supports personalized engagement by integrating multi-channel customer insights.
Topic 4	Architect with Data Source Services: This domain measures expertise of a Data Integration Architect and includes architecting solutions with data replication technologies to synchronize data across systems. IBM Data Virtualization architecture enables access to and querying of disparate data sources without data movement. Architecting with watsonx.data focuses on building intelligent data lakes and query engines. Architecting with Db2-related services involves designing scalable data management and processing architectures using IBM's Db2 platforms.

IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q39-Q44):

NEW QUESTION # 39

Which feature distinguishes DataStage from other data transformation tools in Cloud Pak for Data?

- A. User-defined custom data processing capabilities
- B. High performance parallel execution engine
- C. Graphical builder interface
- D. Wide variety of data transformation tools

Answer: B

Explanation:

What sets DataStage apart in the IBM Cloud Pak for Data ecosystem is its high-performance parallel execution engine. While other tools may offer graphical interfaces and transformation libraries, DataStage is designed for enterprise-grade ETL with scalable parallelism. It optimizes performance by processing large data volumes using parallel pipelines across multiple cores or nodes. This architecture ensures faster execution and is ideal for complex data integration tasks.

NEW QUESTION # 40

Are there any special considerations for the client to migrate existing server jobs to DataStage in Cloud Pak for Data?

- A. Server jobs migrate with no changes.
- B. Server jobs can be converted to parallel jobs prior to migration using MettletCI.
- C. Server jobs are automatically migrated to Watson Pipeline flows.
- D. Server jobs migrate directly to parallel jobs that always require modification.

Answer: B

Explanation:

Legacy DataStage server jobs are not automatically compatible with DataStage on Cloud Pak for Data, which uses a parallel engine architecture. MettletCI is the recommended tool to convert server jobs into parallel jobs before migration. This conversion allows reusability and ensures the migrated jobs can run efficiently in the CP4D environment. Direct migration without modification (option D) is not possible, and they do not migrate to Watson Pipelines (option A).

NEW QUESTION # 41

In the context of Watson Assistant, what purpose do storage classes serve?

- A. Are only relevant for aesthetic classification
- B. Impact the font size of stored data
- C. Determine the latency and throughput for data access
- D. They categorize storage by color only

Answer: C

NEW QUESTION # 42

When granting a user access to the Data Engineer role, which two permissions will the user be associated with as part of this role?

- A. Monitor project workload
- B. Manage platform
- C. Create projects
- D. Manage data protection rules
- E. Manage workflows

Answer: C,D

Explanation:

The Data Engineer role in IBM Cloud Pak for Data includes permissions necessary for managing the data pipeline lifecycle. This includes the ability to create projects, manage data assets, and configure data protection rules, which are critical for ensuring data privacy and governance. The role does not include platform-level administrative privileges like managing the platform or monitoring all workloads. Workflow management is typically assigned to users with broader project or orchestrator roles.

NEW QUESTION # 43

If a Cloud Pak for Data cluster is air-gapped, it is unable to reach the internet, and a private registry must be configured for installations and upgrades. Beyond container images, what other components need to be addressed?

- A. Utilities, like pip, still require a connection to the internet by default.
- B. Data movement between nodes must be blocked via firewall rules.
- C. Platform monitoring messages are sent via an internet messaging hub.
- D. License validation requires periodic updates via internet proxy.

Answer: A

Explanation:

In air-gapped (offline) environments, it's not just the container images that require preparation. Package managers like pip (for Python) and other utilities commonly attempt to pull dependencies from public internet repositories. These must be redirected to internal mirrors or handled via offline bundles. If left unaddressed, certain operations within components like Jupyter notebooks, Watson Studio, or pipelines may fail. License validation and monitoring do not inherently require internet access, and data movement between nodes is part of normal cluster function-not something to be blocked.

NEW QUESTION # 44

.....

Our reliable C1000-173 question dumps are developed by our experts who have rich experience in the fields. Constant updating of the C1000-173 prep guide keeps the high accuracy of exam questions thus will help you get use the C1000-173 Exam quickly. During the exam, you would be familiar with the questions, which you have practiced in our C1000-173 question dumps. That's the reason why most of our customers always pass exam easily.
